

KEITH GREENER GRID PARK - ENERGY STORAGE

Virtual Exhibition Invitation

On the back of a successful public exhibition for our Keith Battery Energy Storage System (BESS) proposal, located next to the existing Keith Greener Grid Park, we are extending the duration of our virtual exhibition.

Batteries capture and store energy for future use. They increase the amount of renewable energy consumers can use by storing and releasing it when demand is high. This project will provide additional battery capacity at the existing Keith Greener Grid Park which is already helping toward the UK zero carbon emissions targets by increasing the stability of the electricity grid.

This extension is representative of Statkraft's good neighbour ethos. It will provide a further opportunity for us to receive your feedback. Community input often leads to the shaping of planning applications before they are submitted.

You can find more information about the proposal on www.statkraft.co.uk/keith-energy-storage. It will remain open until 1 December 2022.

VIRTUAL EXHIBITION KEITH BESS PROPOSAL

You can find the information about our proposal on www.statkraft.co.uk/keith-energy-storage. It will remain open until 1 December 2022

An application is expected to be submitted to Moray Council Planning Department in 2022, and there will be an opportunity to make representations on that planning application.

Comments made to Statkraft are not representations to the consenting authority.

Please note all comments should be received by Statkraft no later than 1 December 2022.

Thank you and we hope you can take part in the consultation .
