

Welcome

We're pleased to be consulting the local community on our proposals in advance of submitting a planning application.

Our team are here to discuss our plans, listen to your views and outline the next steps of our proposed plans for a Battery Energy Storage System extension to Swansea Greener Grid Park.

Neilston Greener Grid Park, 100 MW, Scotland
Parc Grid Neilston Greener, 100 MW, Yr Alban

Croeso

Rydyn ni'n falch o ymgynghori â'r gymuned leol ar ein cynigion cyn cyflwyno cais cynllunio.

Mae ein tîm yma i drafod ein cynlluniau, gwrandu ar eich barn ac amlinellu camau nesaf ein cynlluniau arfaethedig ar gyfer ymestyn System Batria Storio Ynni i Barc Grid Gwyddach Abertawe.

Neilston Greener Grid Park, under construction
Parc Grid Neilston Greener, sy'n cael ei adeiladu

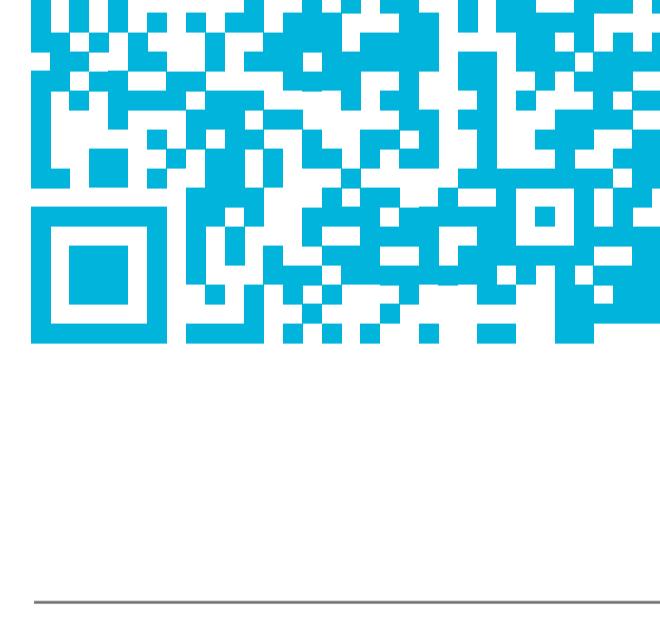

Indicative Timeline

September 2024 Construction of Swansea Greener Grid Park commenced	Spring 2025 New Swansea Greener Grid Park extension planning application	Summer 2025 Planning decision	Spring 2026 Swansea Greener Grid Park operational
2024 – 2025 Design works and technical assessments of proposed Swansea Greener Grid Park extension			Spring 2026 Construction of Swansea Greener Grid Park extension commences

Amserlen Ddangosol

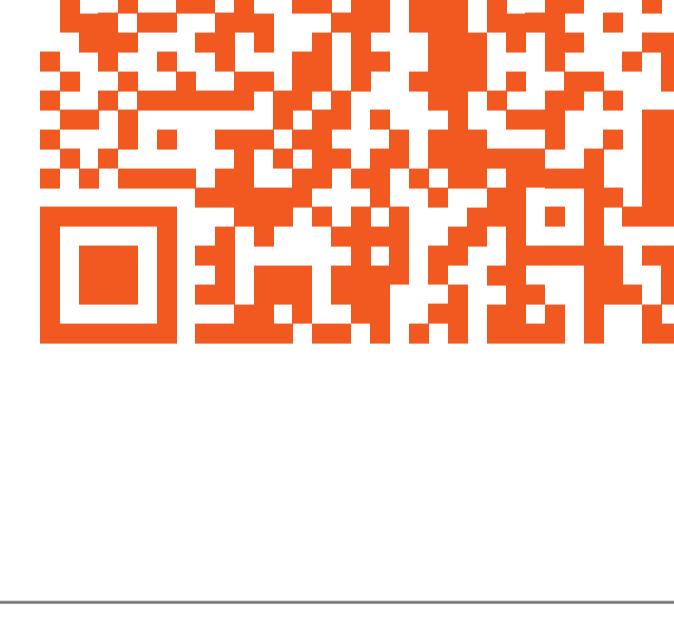

Medi 2024 Dechrau gwaith adeiladu Parc Grid Gwyddach Abertawe	Gwanwyn 2025 Cais cynllunio estyniad newydd Parc Grid Gwyddach Abertawe	Gwanwyn 2026 Parc Grid Gwyddach Abertawe yn weithredol
2024 – 2025 Gwaith dylunio ac asesiadau technegol o estyniad arfaethedig Parc Grid Gwyddach Abertawe	Haf 2025 Penderfyniad cynllunio	Gwanwyn 2026 Dechrau adeiladu estyniad Parc Grid Gwyddach Abertawe

Statkraft in UK

- Welsh Office in Cardiff since 2023
- Operating in the UK since 2006
- Employ almost 500 staff across our UK businesses, including 29 in Wales

● Operational
○ Operational (sold)
● Consented
● Construction
● Development
■ Offices/Control Centre
↗ Wind
Greener Grid Park™
⚡ Hydro
☀ Solar
H₂ Hydrogen

Statkraft yn y Deyrnas Unedig

- Swyddfa yng Nghaerdydd ers 2023
- Yn gweithredu yn y Deyrnas Unedig ers 2006
- Yn cyflogi bron i 500 o staff ar draws ein busnesau yn y DU, gan gynnwys 29 yng Nghymru

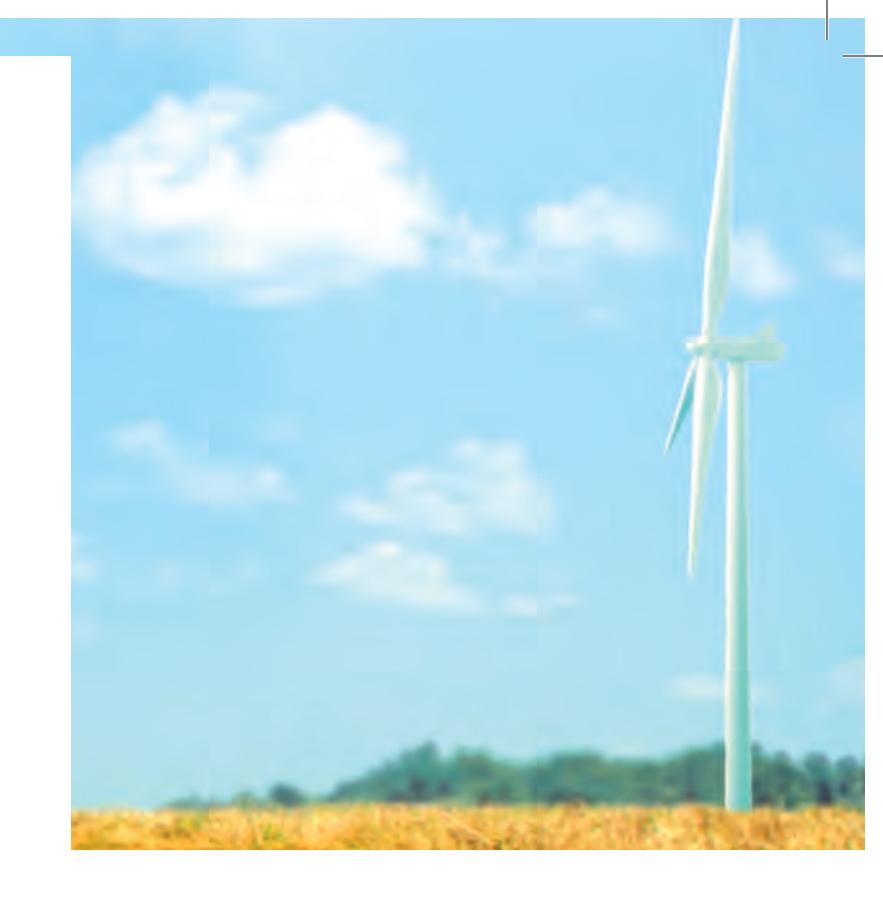

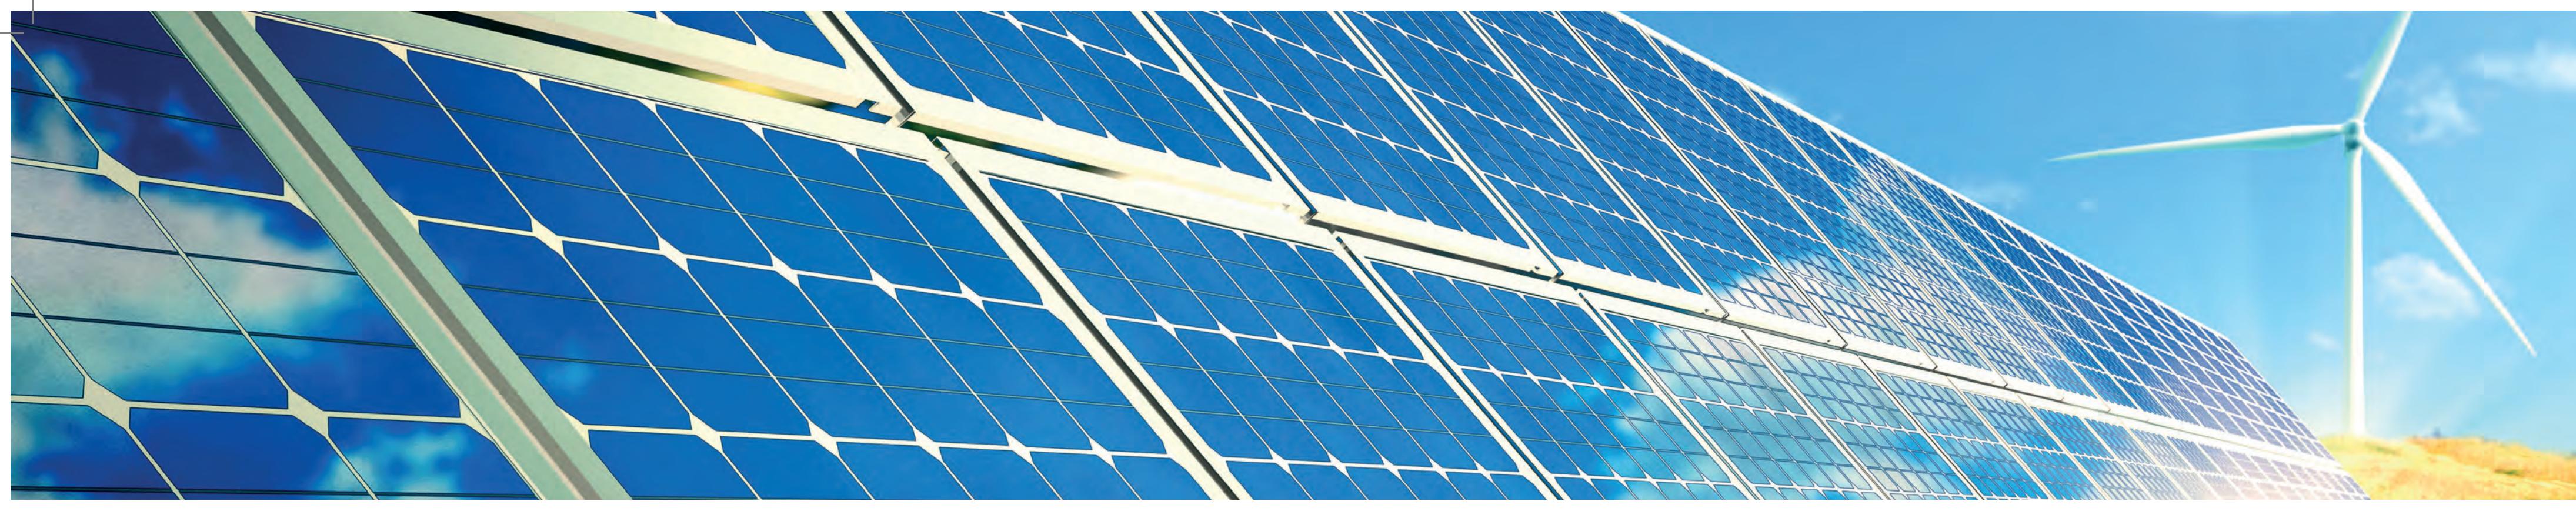

● Gweithredol
○ Gweithredol (wedi'i werthu)
● Caniatâd
● Adeiladu
● Datblygu
■ Swyddfeydd/Canolfan Reoli
↗ Gwynt
☀ Solar
Greener Parc Grid™
⚡ Hydro
H₂ Hydrogen

About Statkraft

- The largest generator of renewable energy in Europe
- Over 40 projects in operation or development across the UK
- Expertise in developing, constructing and operating wind, solar, hydro and grid stability projects
- Distributed over £4.5 million to support local communities near renewable energy projects

Ynglŷn â Statkraft

- Y generadur ynni adnewyddadwy mwyaf yn Ewrop
- Dros 40 o brosiectau ar waith neu'n cael eu datblygu ledled y DU
- Arbenigedd ym maes datblygu, adeiladu a gweithredu prosiectau gwynt, solar, hydro a sefydlogrwydd y grid
- Wedi dosbarthu dros £4.5 miliwn i gefnogi cymunedau lleol sydd yng nghyffiniau prosiectau ynni adnewyddadwy

About Greener Grid Parks

Greener Grid Parks are a collection of buildings, containing zero carbon technology which stabilise the grid, allowing more renewable energy to be transmitted through the network. They are not a wind or solar farm, the buildings resemble agricultural barns, storage units, or shipping containers.

This is provided by one or both of the following innovative technologies.

Greener Grid Park at Keith
Parc Grid Gwyddach yn Keith

Ynglŷn â Pharciau Grid Gwyddach

Mae Parciau Grid Gwyddach yn gasgliad o adeiladau, sy'n cynnwys technoleg ddi-garbon sy'n sefydlogi'r grid, gan ganiatâu i fwy o ynni adnewyddadwy gael ei drawsyrru drwy'r rhwydwaith. Nid ffermydd gwynt na solar ydyn nhw - mae'r adeiladau'n debyg i ysguboriau amaethyddol, unedau storio, neu gynwysyddion llonigau.

Darperir hyn gan un o'r technolegau arloesol canlynol, neu gan y ddau.

BESS at Neilston, under construction
BESS yn Neilston, sy'n cael ei adeiladu

Synchronous Compensator

Large machines with built-in flywheels provide grid stability without emitting any carbon dioxide – decarbonising the grid and saving consumers money.

Cydadferydd Cydamserol

Mae peiriannau mawr gyda chwylolwynion sy'n rhan ohonynt yn darparu sefydlogrwydd grid heb allyrru unrhyw garbon deuocsid – gan ddatgarboneiddio'r grid ac arbed arian i ddefnyddwyr.

Batteries (Battery Energy Storage System or BESS)

Batteries capture energy from the grid and store it for later use to keep supply and demand balanced. This is another innovative way we can provide stability to the grid.

Batis (System Batris Storio Ynni neu BESS)

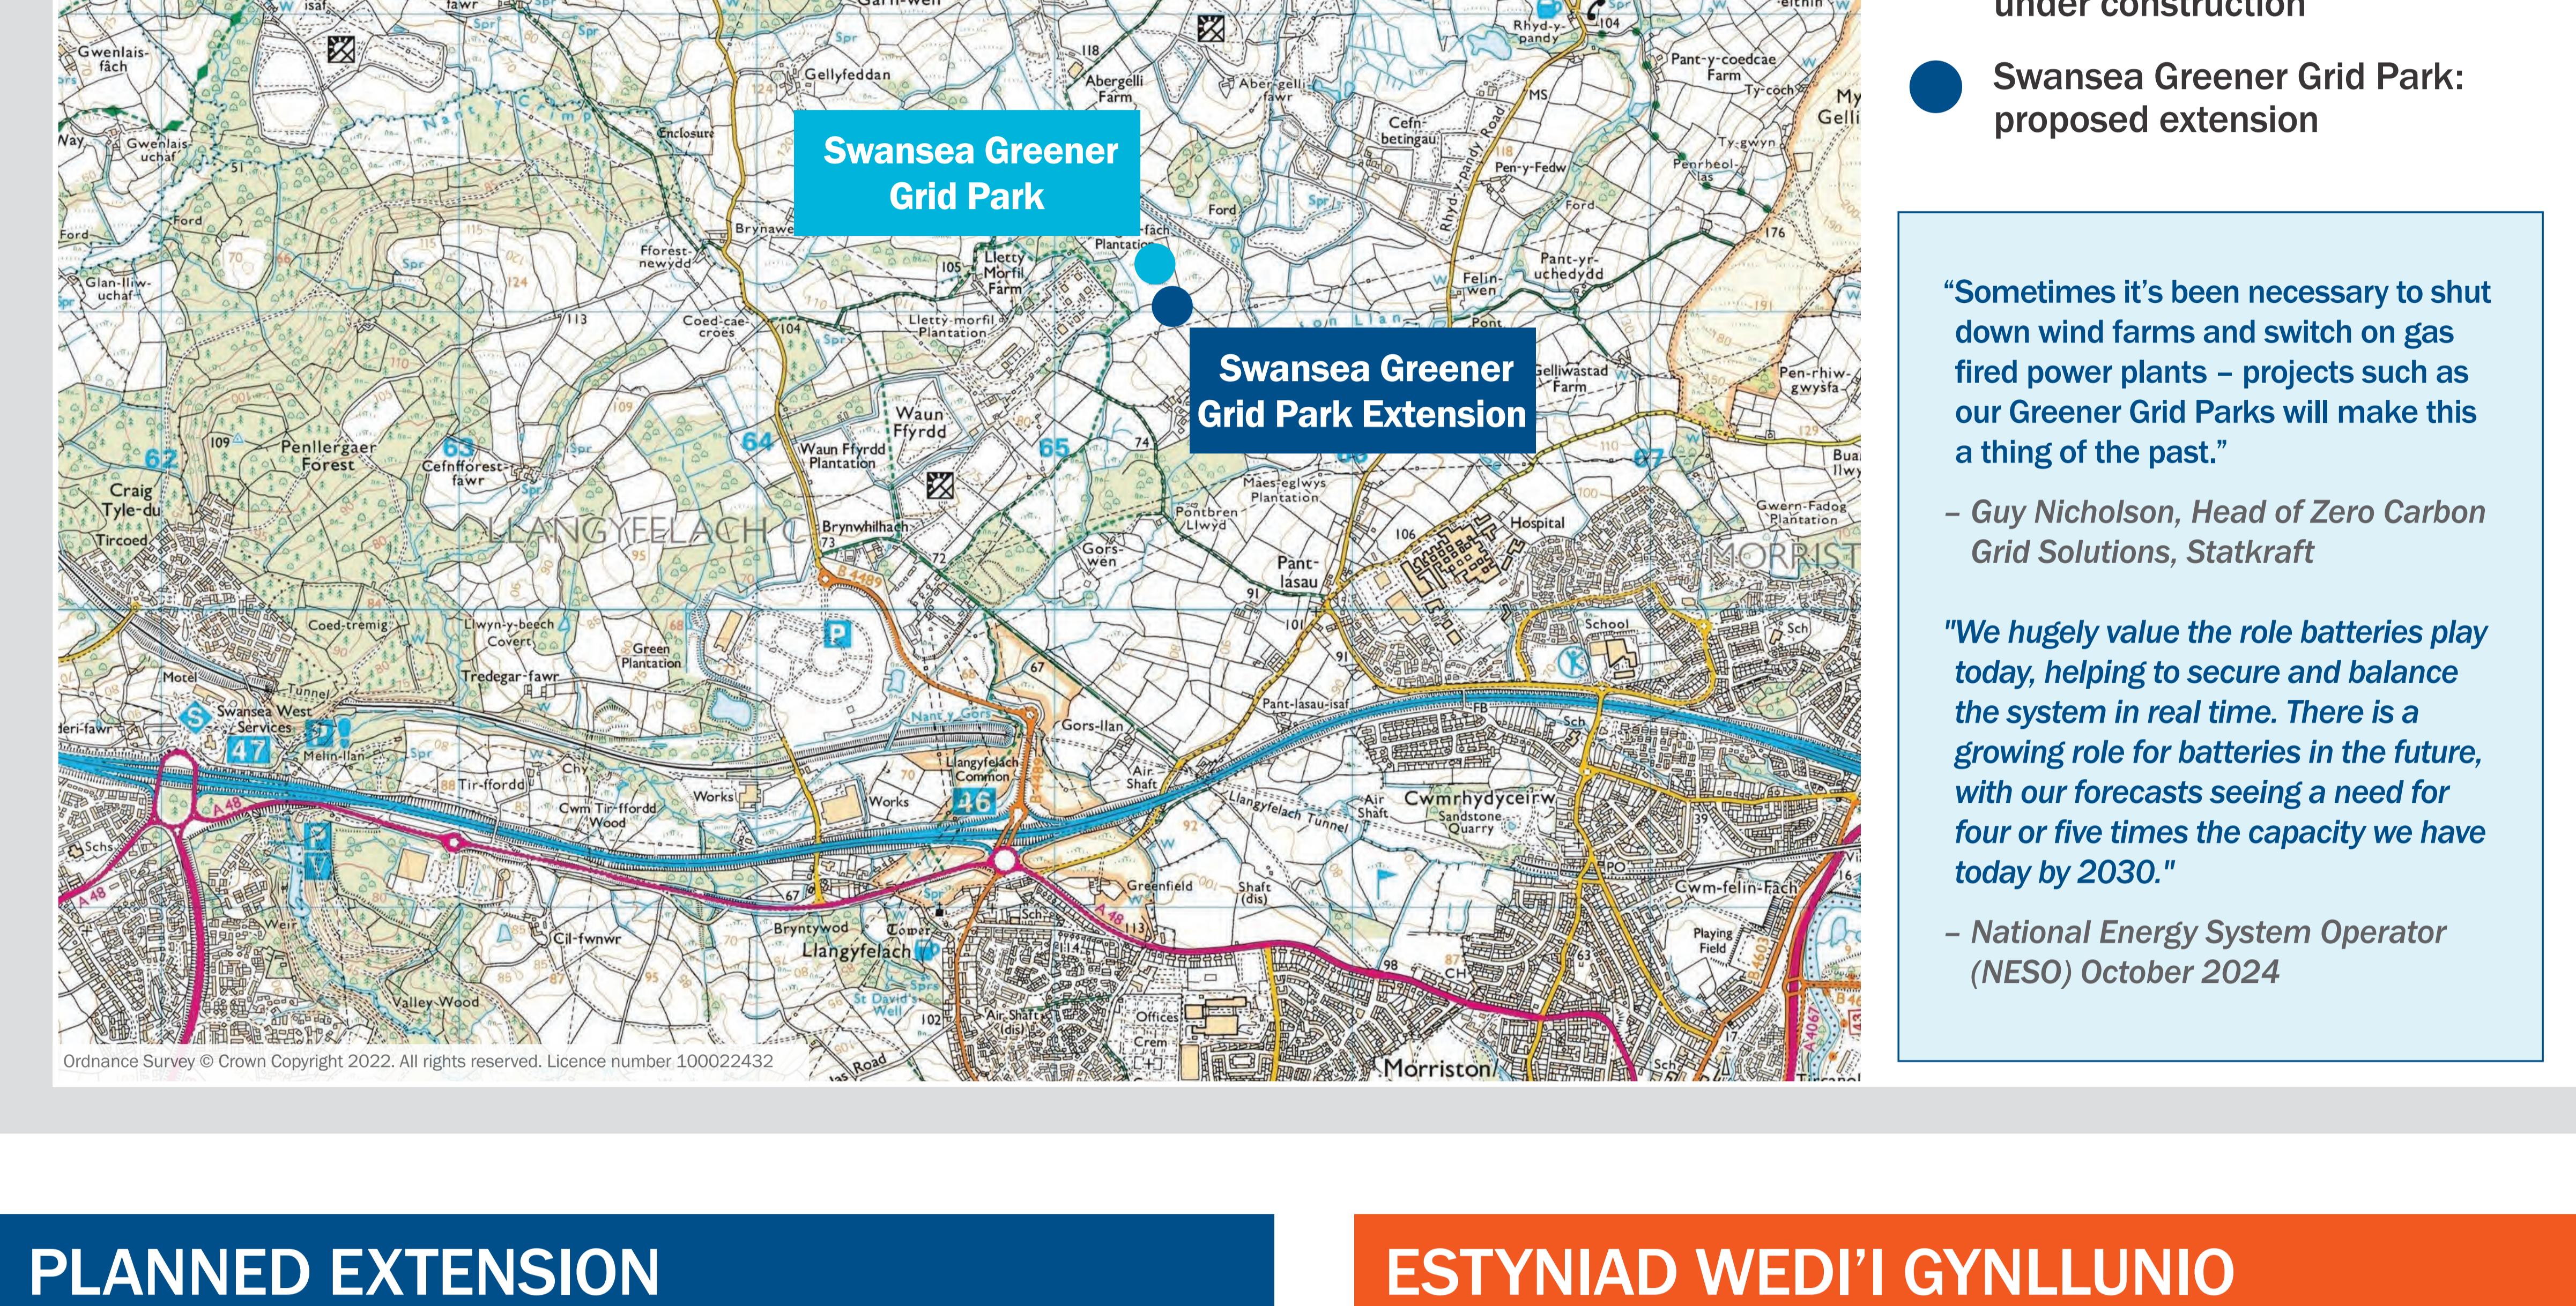

Mae batris yn dal ynni o'r grid ac yn ei storio i'w ddefnyddio'n ddiweddarach er mwyn sicrhau cydbwysedd rhwng y cyflenwad a'r galw. Dyma ffordd arloesol arall y gallwn ddarparu sefydlogrwydd i'r grid.

About Swansea Greener Grid Park

Ynglŷn â Pharc Grid Gwyrddach Abertawe

- The application received unanimous support from Swansea Council and is currently under construction.
- It will increase the stability of the electricity grid using synchronous compensators, allowing more renewable energy to be delivered to the network and help achieve zero carbon emissions.

- Cafodd y cais gefnogaeth unfrydol gan Gyngor Abertawe ac mae'n cael ei adeiladu ar hyn o bryd.
- Bydd yn cynyddu sefydlogrwydd y grid trydan gan ddefnyddio cydadferyddion cydamserol, gan ganiatâu i fwyo ynni adnewyddadwy gael ei ddanfon i'r rhwydwaith a helpu i gyflawni allyriadau di-garbon.

PLANNED EXTENSION

- 100MW Battery Energy Storage System (BESS)
- Batteries capture energy and store it for use later to keep supply and demand balanced.
- These systems can be charged by renewable energy sources like wind and solar.
- If planning permission is granted, we estimate the project will be operational in 2027.

ESTYNIAID WEDI'I GYNLLUNIO

- System Batis Storio Ynni 100MW (BESS)
- Mae batris yn dal ynni a'i storio i'w ddefnyddio'n ddiweddarach er mwyn cadw'r cydwysedd rhwng y cyflenwad a'r galw.
- Gellir gwefru'r systemau hyn gan ddefnyddio ffynonellau ynni adnewyddadwy fel gwynt a solar.
- Os rhoddir caniatâd cynllunio, rydyn ni'n amcangyfrif y bydd y prosiect ar waith yn 2027.

www.statkraft.co.uk/swansea-extension-cy/

Design Evolution

Our first planning application consented in 2021 included batteries alongside synchronous compensators. This was amended in 2023 to redesign the synchronous compensators, removing the battery elements, and is now under construction.

We are now applying to extend the Greener Grid Park on land to the south of the original site to add batteries back in. This extension will utilise the same access as the current site and the new design has been informed by updated environmental assessments and onsite constraints.

Esblyiad Dylunio

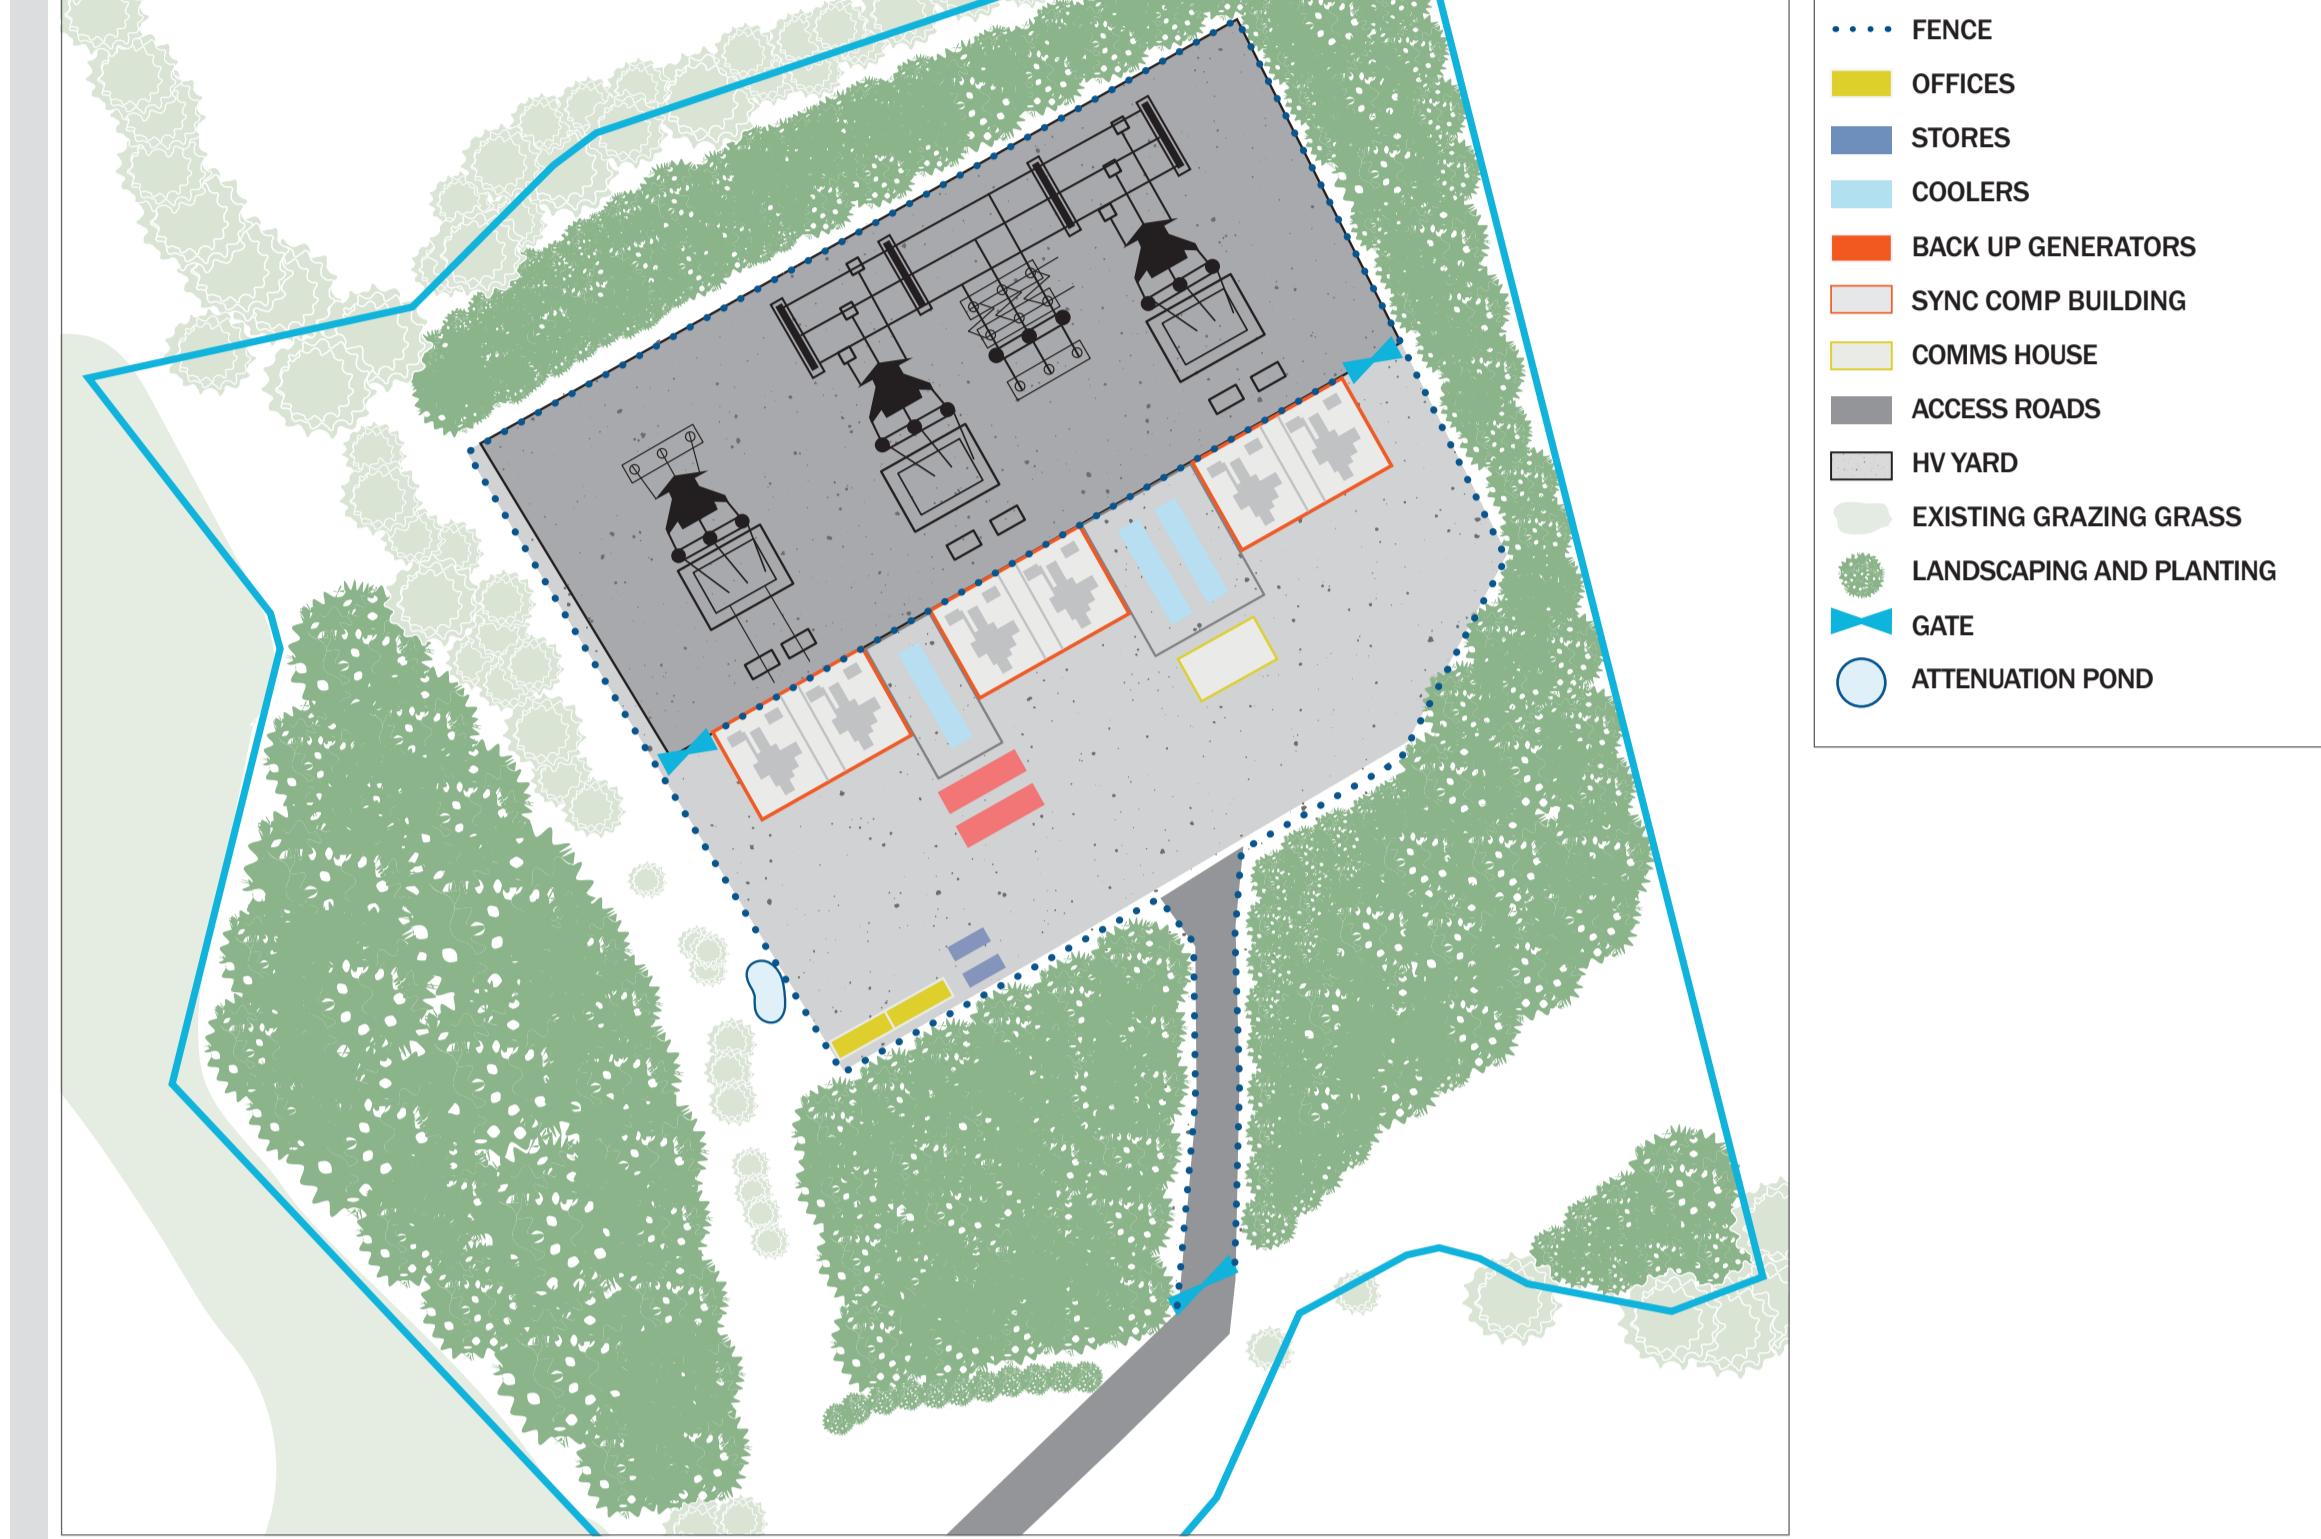

Cafodd ein cais cynllunio cyntaf ganiatâd yn 2021, ac roedd yn cynnwys darpariaethau batris ochr yn ochr â chydadferyddion cydamserol. Cafodd ei ddiwygio yn 2023 i ailgynllunio'r cydadferyddion cydamserol, gan waredu'r elfennau batri. Mae bellach yn cael ei adeiladu.

Rydyn ni bellach yn gwneud cais i ymestyn y Parc Grid Gwyddach ar dir i'r de o'r safle gwreiddiol i ychwanegu batris eto. Bydd yr estyniad hwn yn defnyddio'r un mynediad â'r safle presennol ac mae'r dyluniad newydd wedi'i lywio gan asesiadau amgylcheddol wedi'u diweddu a chyfyngiadau'r safle.

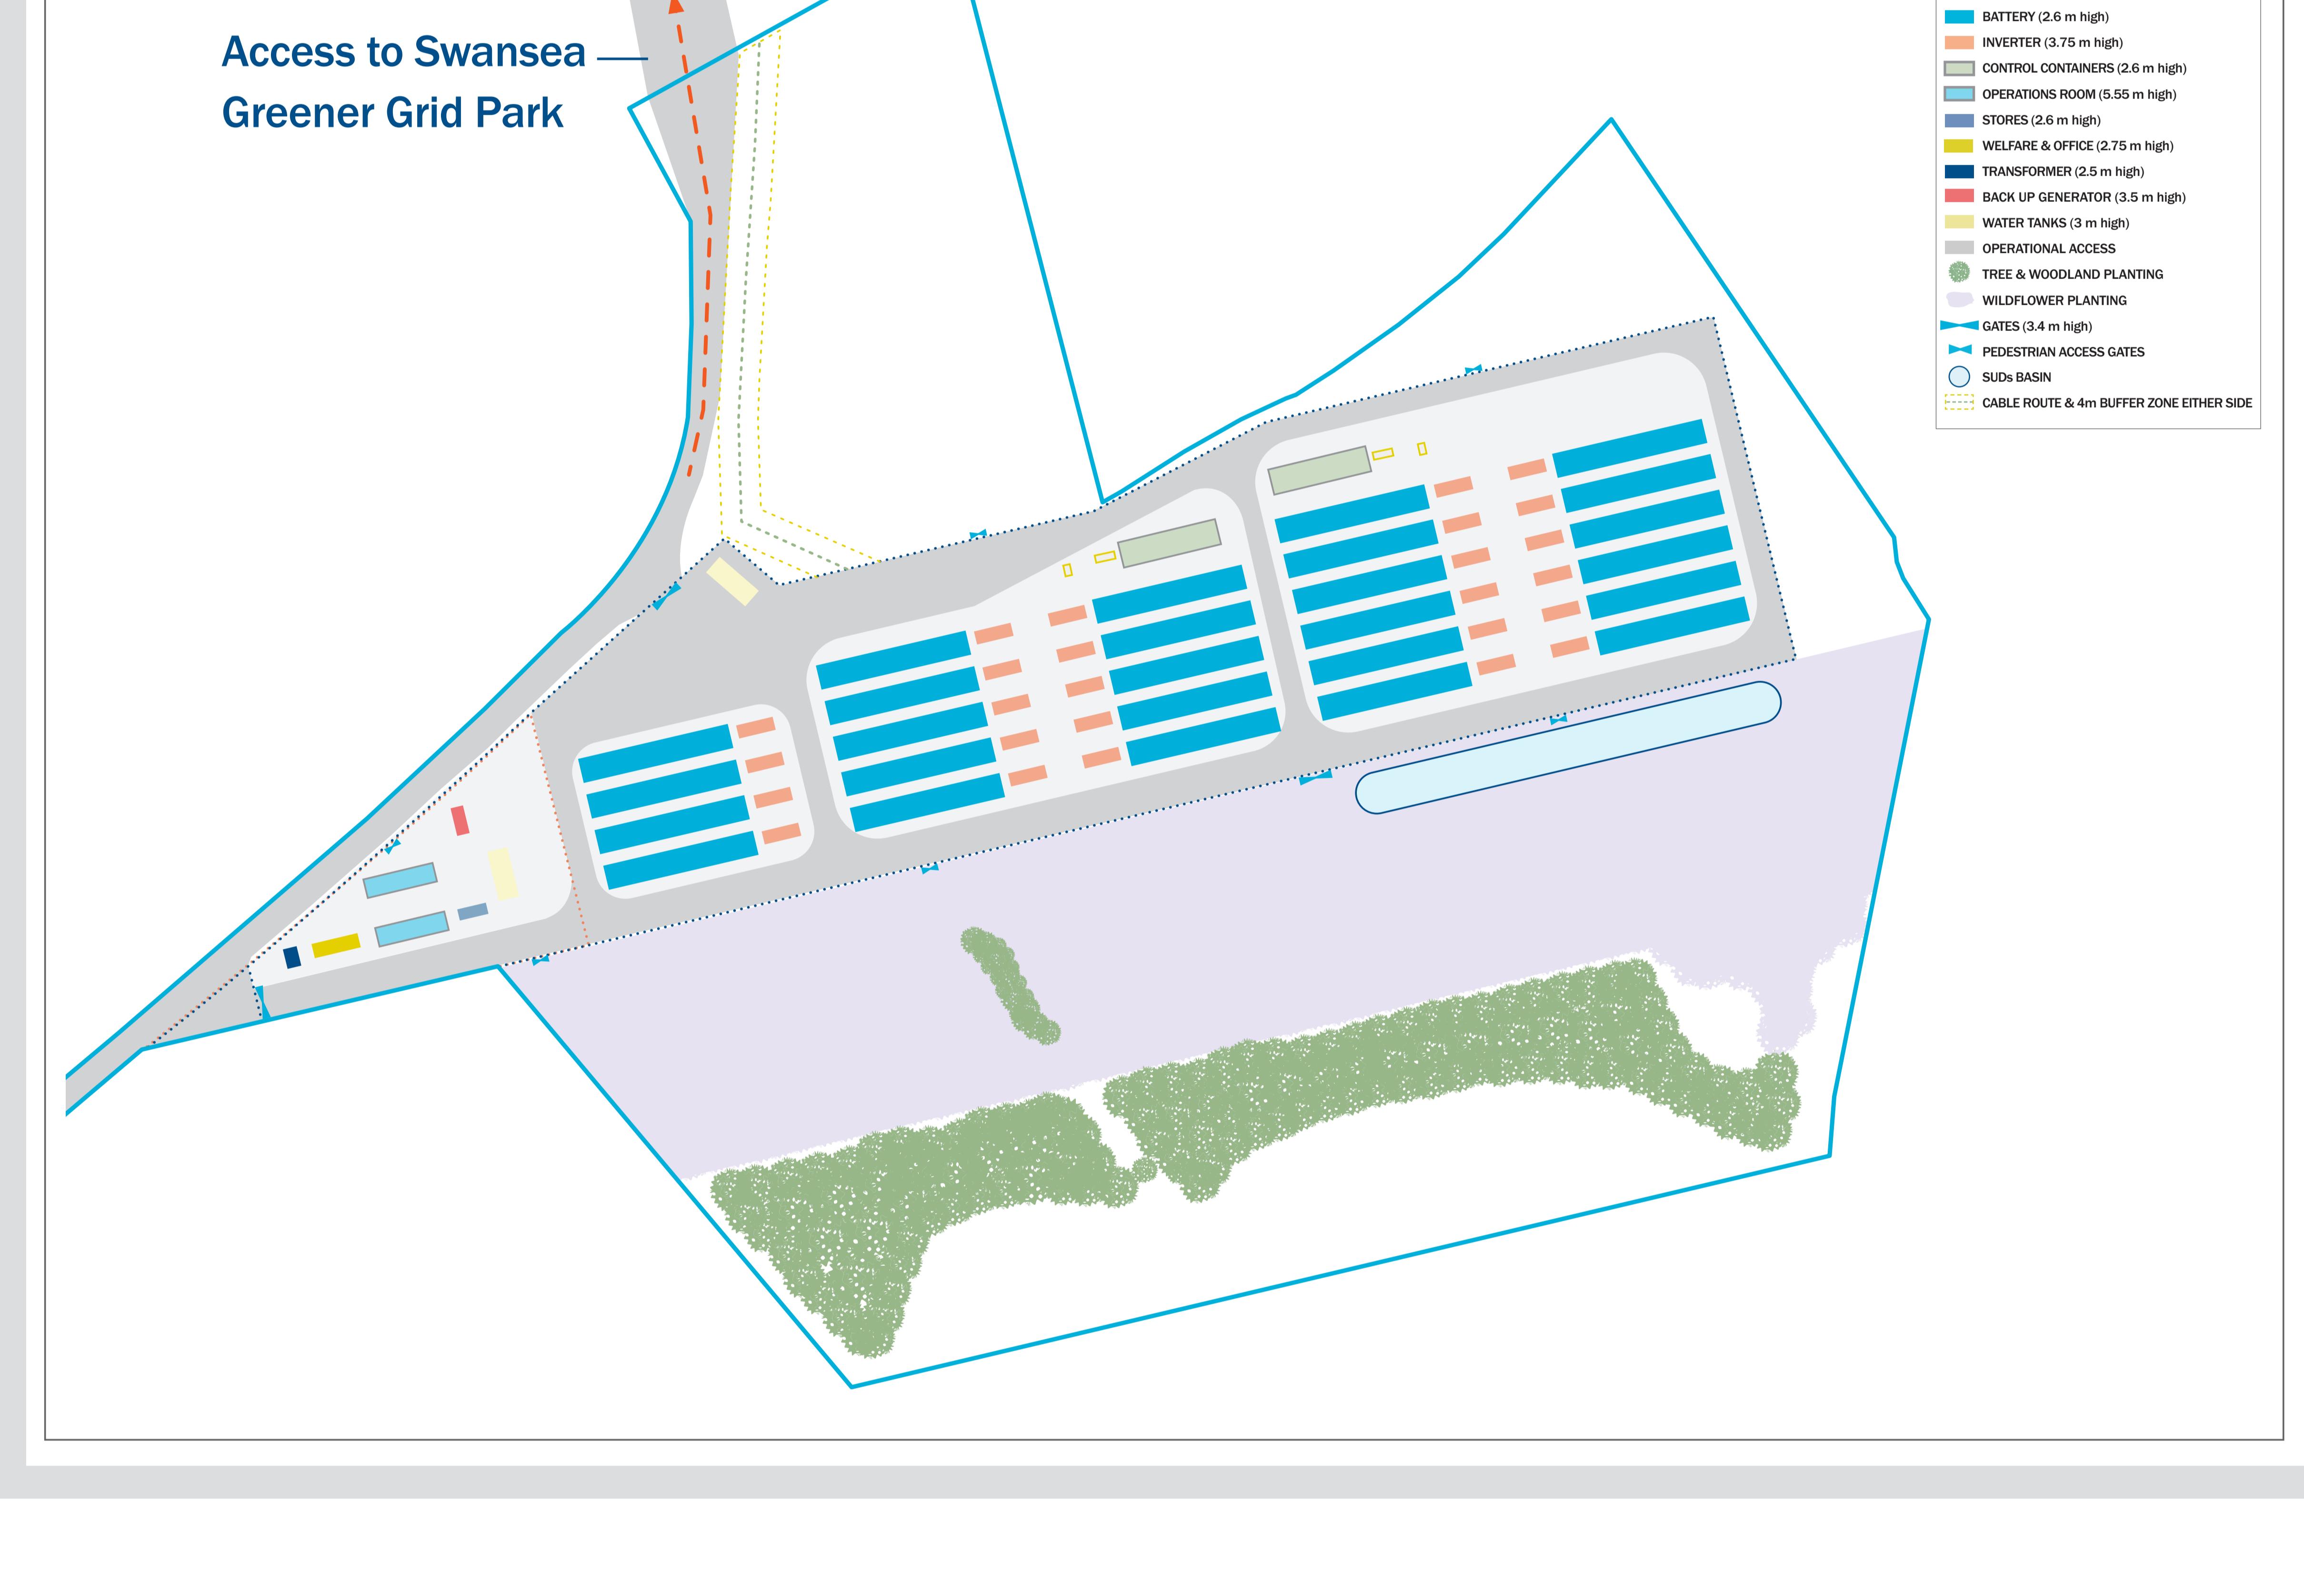

Consented Project Layout (2021)

Consented Construction Layout (2023)

Proposed Extension

Project website

Gwefan y prosiect

www.statkraft.co.uk/swansea-extension-cy/

Ongoing Construction

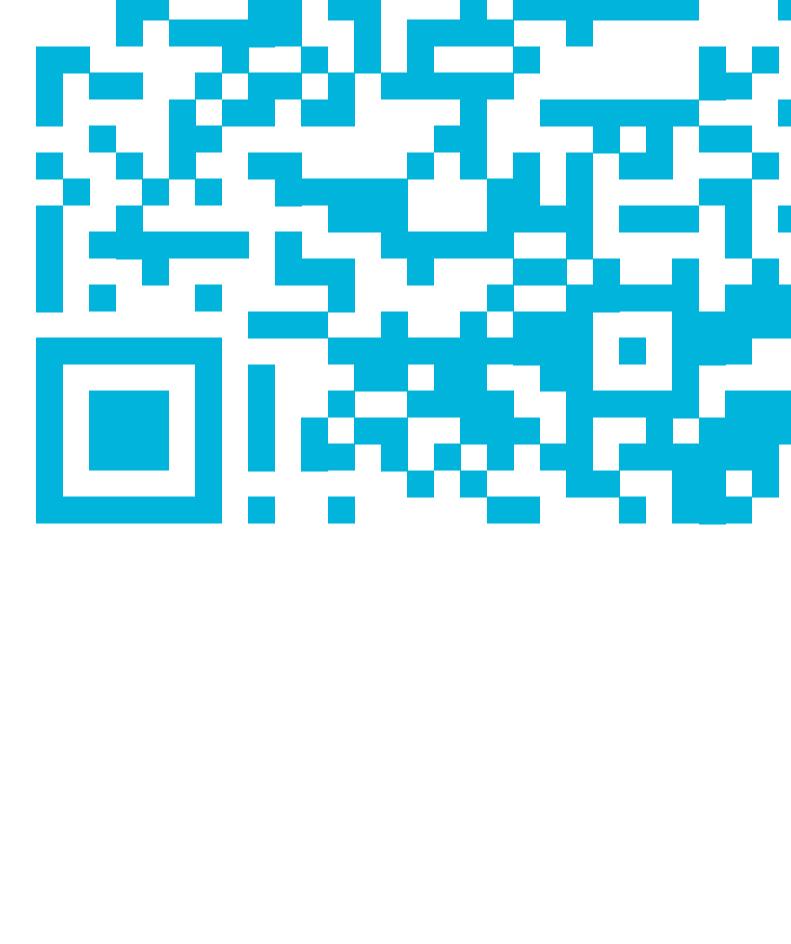

Construction of Swansea Greener Grid Park began in Autumn 2024.

It is expected to be fully operational around 18 months from the start of construction. The site currently being constructed will help deliver stable, secure and cheaper power to households and businesses in Wales.

A groundbreaking ceremony in December 2024 was attended by the First Minister of Wales – Rt. Hon. Eluned Morgan MS and the Energy Minister – Michael Shanks MP.

We are committed to keeping local people informed throughout the construction of Swansea Greener Grid Park; you can keep up-to-date on progress at our project website www.statkraft.co.uk/swansea/

Scan the QR code to view the existing project webpage

Adeiladu Parhaus

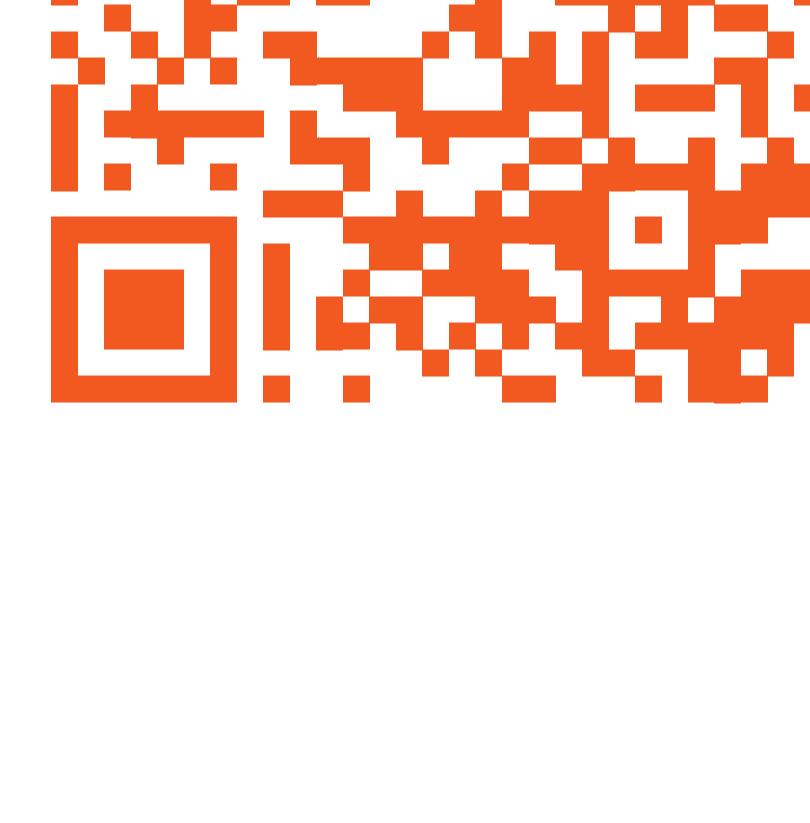

Dechreuodd y gwaith o adeiladu Parc Grid Gwyddach Abertawe yn hydref 2024.

Disgwyllir iddo fod yn gwbl weithredol o fewn tua 18 mis i ddechrau'r gwaith adeiladu. Bydd y safle sy'n dal ar y gweill yn helpu i ddarparu pŵer sefydlog, diogel a rhatach i gartrefi a busnesau yng Nghymru.

Mynychwyd seremoni i dorri'r dywarchen gyntaf ym mis Rhagfyr 2024 gan Brif Weinidog Cymru – y Gwir Anrhydeddus Eluned Morgan AS a'r Gweinidog Ynni – yr Aelod Seneddol Michael Shanks.

Rydyn ni wedi ymrwymo i roi'r wybodaeth ddiweddaraf i bobl leol gydol y gwaith o adeiladu Parc Grid Gwyddach Abertawe; gallwch gael y wybodaeth ddiweddaraf am gynnydd ar wefan y prosiect www.statkraft.co.uk/swansea-cy/

Local Benefits

The Swansea Greener Grid Park already delivers a community benefit fund of £20,000 each year. If consented, the proposed BESS extension would add another £20,000 per year into that fund.

Community Benefit Fund

We are committed to increasing the Community Benefit Fund by a further £20,000 per year. These funds are available for local projects that help accelerate the transition to a low carbon society. We would like to hear your ideas for worthwhile local projects.

Swansea Greener Grid Parks' Community Benefit is now open for applications.
Scan the QR code for further information about applying.

Our first Greener Grid Park Community Benefit Fund at Keith, Moray, helped fund the purchase of a new solar panel and battery storage for the local Keith and District Men's Shed, a men's health and wellbeing charity.

Helpodd Cronfa Budd Cymunedol ein Parc Grid Gwyddach cyntaf yn Keith, Moray, i ariannu pryniant panel solar newydd a batr storio ar gyfer Men's Shed Keith a'r Ardal, sef elusen lechyd a lles i ddaynion.

Local Supply Chain

We work with local businesses and residents to increase awareness and provide opportunities to be involved in the construction or operation of our projects. A variety of goods and services are required throughout construction and many local companies would be suited to get involved.

Our Swansea Greener Grid Park scheme currently equates to around £70 million of investment in the Welsh energy transition.

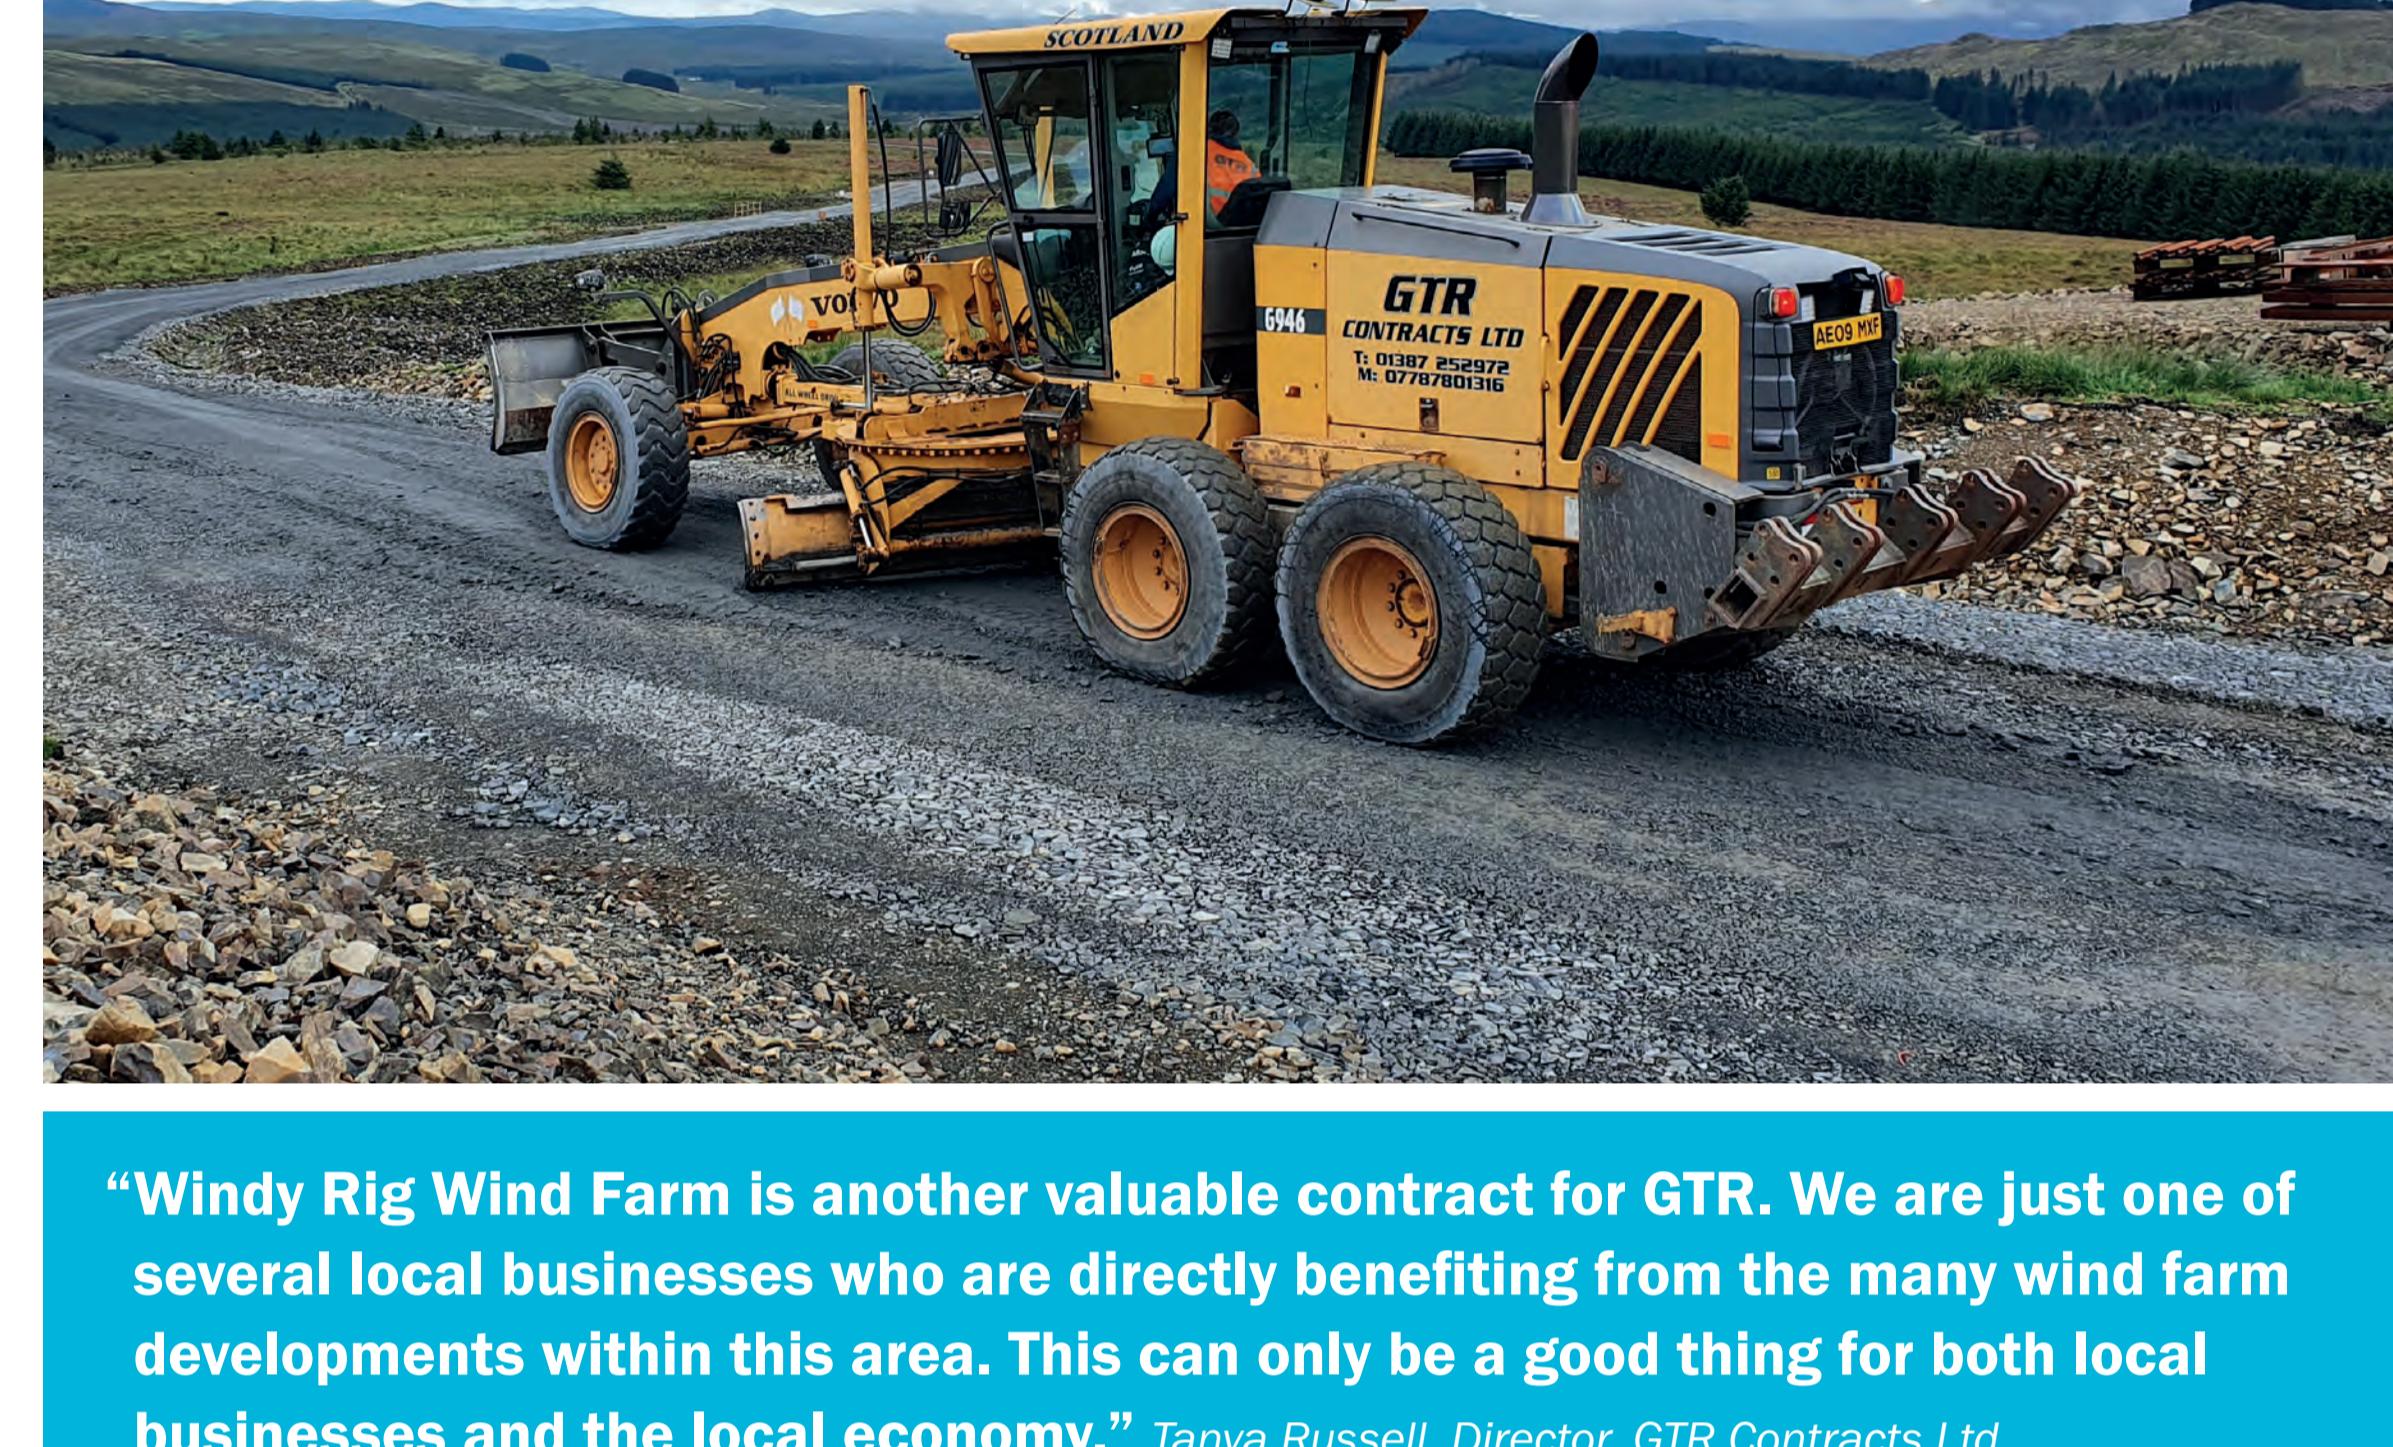

Buddion Lleol

Mae Parc Grid Gwyddach Abertawe eisoes yn darparu cronfa budd cymunedol o £20,000 bob flwyddyn. Pe bai'n cael ei gydysynio, byddai'r estyniad BESS arfaethedig yn ychwanegu £20,000 y flwyddyn arall i'r gronfa honno.

Cronfa Budd Cymunedol

Rydyn ni wedi ymrwymo i gynyddu'r Gronfa Budd Cymunedol o £20,000 arall y flwyddyn. Mae'r cronfeydd hyn ar gael ar gyfer prosiectau lleol sy'n helpu i gyflymu'r broses bontio i gymdeithas carbon isel. Hoffem glywed eich syniadau ar gyfer prosiectau lleol gwerth chweil.

Mae Budd Cymunedol Parc Grid Gwyddach Abertawe bellach ar agor ar gyfer ceisiadau.
Sganiwch y cod QR i gael rhagor o wybodaeth am wneud cais.

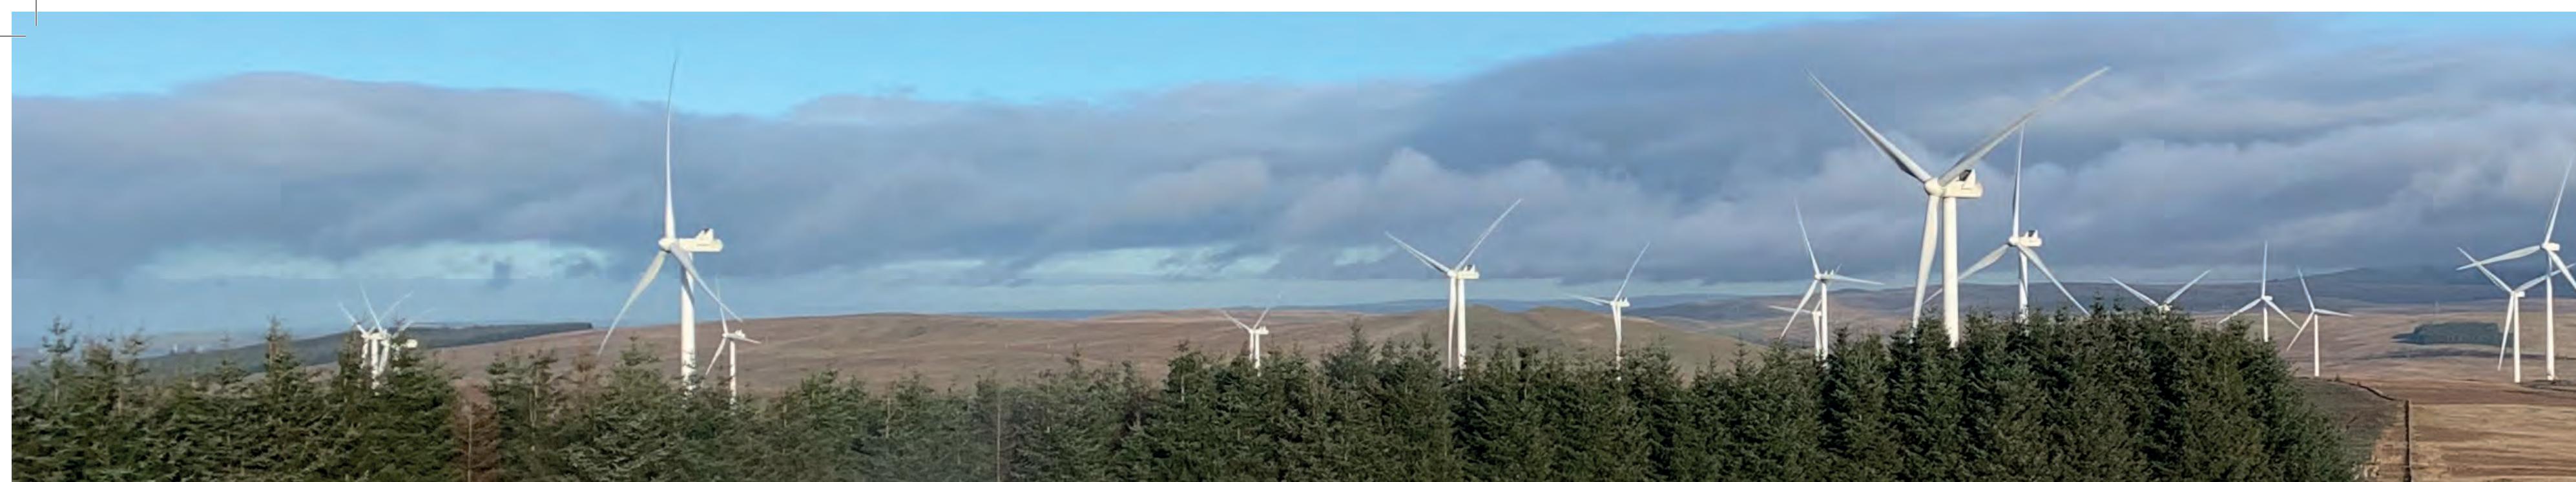

"Windy Rig Wind Farm is another valuable contract for GTR. We are just one of several local businesses who are directly benefiting from the many wind farm developments within this area. This can only be a good thing for both local businesses and the local economy." Tanya Russell, Director, GTR Contracts Ltd

"Mae Ffwrn Wynt Windy Rig yn contract gwerthfawr arall i GTR. Rydyn ni'n un o sawl busnes lleol sy'n eiwa'n uniongyrchol ar y datblygiadau ffermydd gwyntif erbyn yr ardal hon. Gall hyn ond fod yn beth da i fusnesau lleol a'r economi leol." Tanya Russell, Cyfarwyddwr, GTR Contracts Ltd

Cadwyn Gyflenwi Leol

Rydyn ni'n gweithio gyda busnesau a thrigolion lleol i gynyddu ymwybyddiaeth a darparu cyfleoedd i fod yn rhan o'r gwaith o adeiladu neu weithredu ein prosiectau. Mae angen amrywiaeth o nwyddau a gwasanaethau gydol y gwaith adeiladu a byddai llawer o gwmniau lleol yn addas i gymryd rhan.

Ar hyn o bryd mae ein cynllun ym Mharc Grid Gwyddach Abertawe yn cyfateb i tua £70 miliwn o fuddsoddiad yn y pontio i ynni gwydd yng Nghymru.
