

## Invitation to Drop-in Sessions – 12 March 2024

Dear Resident,

### Introducing ourselves – new owners of Red John Pumped Storage Hydro Scheme

In December last year Statkraft acquired the above project from Intelligent Land Investments Group (ILI). The project was consented in June 2021, and we are getting to know the project and the community as we work towards a construction programme starting late 2025.

There is plenty to do over the next eighteen months or so, to prepare for construction, and we are keen to introduce ourselves to you in person.

### Drop-in Sessions - Tuesday, 12 March 2024

**2pm – 5pm**                      **Farr Community Hall, Inverarnie Park, IV2 6AX**  
**7.30pm – 9pm**                  **Dores Village Hall, Dores, IV2 6TT**

We invite you to come along and meet some of the project team. We have a ‘good neighbour’ ethos and aim for open communication and consultation with the local communities where we operate. We may not have all the answers on the day at our Drop-in Sessions, but things you can expect to see information on include:

- Statkraft, our origins in hydropower and our renewable energy projects across Scotland
- Some of the site investigations and surveys being undertaken before construction starts
- An overview of construction traffic management
- Our approach to maximising economic benefits
- News on a re-naming of the project

**If you are unable to attend or would like to share your questions or comments in advance, please return the enclosed reply card in the envelope provided or visit our website.**

### Local Suppliers

A variety of goods and services will be required throughout the construction and operation of the project. Register your interest or recommend a supplier at [www.redjohnpsh.co.uk](http://www.redjohnpsh.co.uk)
