Dear Sir/Madam

Re: Trecwn Green Energy Hub

Following previous engagement and consultation, we are pleased to invite you to the formation of the Community Liaison Group (CLG).

Independently facilitated by the local community development charity, PLANED, the CLG will enable local residents and elected representatives from the area to discuss and engage on Statkraft's proposals for a green hydrogen electrolysis plant powered by three wind turbines and solar panels at Trecwn. The meeting will support suggestions and ideas from all those attending to be captured and considered as the plans evolve.

Taking the form of multiple small round table groups for discussions, it will allow all voices the opportunity to be heard, and contribute positively, and then informally meet and discuss with others during the break.

The structure and outputs expected for future meetings of the CLG will also be discussed, to enable continued meaningful and positive discussions to be held via this transparent forum, as well as nominations for local champions to liaise directly with colleagues involved in the project. Please find enclosed draft Terms of Reference for consideration in advance.

We look forward to welcoming you at Letterston Community Hall on Tuesday 6 June at 6pm until 7:30pm, where there will be refreshments provided and a warm welcome.

If you can let us know if you are able to attend by 1 June it would be much appreciated, or if you have any queries in advance. Please get in touch by calling 0800 772 0668 or emailing [ukprojects@statkraft.com](mailto:ukprojects@statkraft.com).

Yours faithfully

**The Team at PLANED**
