Technical Appendix 4.1: Heritage Assets Gazetteer

November 2024

Asset Number	1
Asset Name	BACKSIDE
Type of Site	Standing Structure
NRHE Number	
HER Number	NJ43NW0112
Status	Non-designated
Easting	341082
Northing	836147
Parish	Glass
Council	Aberdeenshire
Description	<p>Post-Medieval (from 1560 AD). Farmstead, still in use. The 1867 OS 1st edition shows a U-shaped steading, open to the south with an attached enclosure to the west and with a rectangular building occupying part of the south side of the court. To the east is a long range and to the north a rectangular building. To the west is an oval pond. By the time of the 1888 2nd edition map the building on the south side of the court and the long range had been removed, its site now partly occupied by a new rectangular building attached to the east wing of the steading. The pond, now sub-rectangular and a mill dam are also shown. The current OS map indicates that the northern rectangular building has since been removed, the site now occupied by a larger structure. The north wing of the steading has been extended into the former court. Another building has been added to the west and the pond appears to have been infilled.</p>

Asset Number	2
Asset Name	Timberford
Type of Site	Enclosure(S) (Period Unassigned), Farmstead (Period Unassigned)
NRHE Number	
HER Number	NJ43NW0054
Status	Non-designated
Easting	340682
Northing	836521
Parish	Glass
Council	Aberdeenshire
Description	<p>Post-Medieval (from 1560 AD). Two long buildings lying on the same axis, almost in a straight line, with a small single building to the east, are depicted on the OS map of 1867. Attached enclosures lie to the east and west. By the OS map edition of 1888 there is an L-shaped farmstead with a single building lying to the east and two mill ponds, one to the north, the other to the south. The most southerly long building is no longer depicted. Now all buildings are roofless.</p> <p>The remains of a farmstead and enclosures survive in fair condition on a gentle NE-facing slope in agricultural ground at an altitude of 310m OD.</p> <p>NMRS, MS/712/38.</p>

Asset Number	3
Asset Name	Gowels
Type of Site	Artefact
NRHE Number	NJ43SW18
HER Number	NJ43SW0006
Status	Non-designated
Easting	341000
Northing	834000
Parish	Glass
Council	Aberdeenshire
Description	The discovery of a lozenge- or leaf-shaped flint arrowhead is recorded at Gowels (Gouls); it is now held at Beldorney Castle.

Asset Number	4
Asset Name	CHAPELHILL
Type of Site	Farmstead (Period Unassigned)
NRHE Number	NJ43NW72
HER Number	NJ43NW0072
Status	Non-designated
Easting	340792
Northing	836696
Parish	Glass
Council	Aberdeenshire
Description	Post-Medieval (from 1560 AD). Remains of a longhouse and part of an enclosure.

Asset Number	5
Asset Name	BUTTERWARDS
Type of Site	Hut Circle (Prehistoric)
NRHE Number	NJ43NW25
HER Number	NJ43NW0042
Status	Non-designated
Easting	340710
Northing	836010
Parish	Glass
Council	Aberdeenshire
Description	Prehistoric period uncertain. Possible hut circle. On NE slope, N of Craig Dorney fort (NJ43NW 20), a hut circle visible in snow on air photographs. Greig and Ralston, M K and I B M. (1989) 'Butterwards (Glass parish), hut circle', Discovery

Excav Scot, 1989. Page(s): 21

Asset Number	6
Asset Name	MOSS OF BELDORNEY
Type of Site	Farmstead (Period Unassigned)
NRHE Number	NJ33NE12
HER Number	NJ33NE0017
Status	Non-designated
Easting	339956
Northing	835573
Parish	Glass
Council	Aberdeenshire
Description	Post-Medieval (from 1560 AD). Remains of houses and part of an enclosure.

Asset Number	7
Asset Name	GREENHOWE
Type of Site	Farmstead (Period Unassigned)
NRHE Number	NJ43NW37
HER Number	NJ43NW0057
Status	Non-designated
Easting	340254
Northing	835786
Parish	Glass
Council	Aberdeenshire
Description	Post-Medieval (from 1560 AD). Remains of two buildings and an enclosure.

Asset Number	8
Asset Name	CHAPELHILL
Type of Site	Farmstead (Period Unassigned)
NRHE Number	NJ43NW69
HER Number	NJ43NW0068
Status	Non-designated
Easting	340790
Northing	837294
Parish	Glass
Council	Aberdeenshire
Description	Post-Medieval (from 1560 AD). Ruined farmstead. It is depicted on the OS 1st edition map as

two rectangular buildings within an enclosure. The SW building is shown as roofless on the OS 2nd edition map, which also depicts a well within the enclosure. Both buildings are shown as ruinous on current OS maps.

Asset Number	9
Asset Name	MIDTHIRD
Type of Site	Farmstead (Period Unassigned)
NRHE Number	NJ43NW62
HER Number	NJ43NW0052
Status	Non-designated
Easting	341106
Northing	837052
Parish	Glass
Council	Aberdeenshire
Description	Post-Medieval (from 1560 AD). Remains of a farmstead; three adjoining buildings with a fourth lying at right-angles to them are depicted on the OS map of 1867 and 1888. Now ruinous.

Asset Number	10
Asset Name	CRAIGDORNEY
Type of Site	Farmstead (Period Unassigned)
NRHE Number	NJ43NW38
HER Number	NJ43NW0058
Status	Non-designated
Easting	340529
Northing	835662
Parish	Glass
Council	Aberdeenshire
Description	Post-Medieval (from 1560 AD). Remains of farmstead and enclosures, depicted on 19th century OS maps. The OS 1st edition sheet shows two long rectangular buildings, the SE one with an attached enclosure on its SE side. On the 2nd edition map, the W end of the N building is shown as roofless and two more buildings have been added to the S and N. All of the buildings are now ruinous.

Asset Number	11
Asset Name	CHAPELHILL
Type of Site	Farmstead (Period Unassigned)
NRHE Number	NJ43NW70
HER Number	NJ43NW0069
Status	Non-designated

Easting	340606
Northing	837172
Parish	Glass
Council	Aberdeenshire
Description	Post-Medieval (from 1560 AD). Ruined farmstead, depicted on the OS 1st and 2nd edition maps as a long rectangular building. This is depicted as ruinous on current OS maps, but a new building has been added to the E.

Asset Number	12
Asset Name	LYMBAIN, GLASS
Type of Site	Artefact
NRHE Number	
HER Number	NJ43NW0023
Status	Non-designated
Easting	341000
Northing	835000
Parish	Glass
Council	Aberdeenshire
Description	Neolithic (4000 - 2500 BC). Arrowheads; two leaf or lozenge-shaped flint arrowheads.

Asset Number	13
Asset Name	CHAPEL HILL
Type of Site	Chapel (Period Unassigned)
NRHE Number	NJ43NW12
HER Number	NJ43NW0037
Status	Non-designated
Easting	340498
Northing	836802
Parish	Glass
Council	Aberdeenshire
Description	Medieval (1100 - 1560 AD). Site of chapel; a very small chapel existed on the brow of Chapel Hill but only a few scattered stones remain; nothing known locally of its history other than its association with Walla Kirk OS NJ43NW009. Ordnance Survey (Name Book. Object Name Books of the Ordnance Survey (6 inch and 1/2500 scale). Page(s): Book No. 37, 27 RCAHMS

Asset Number	14
Asset Name	TIMBERFORD

Type of Site	Building(S) (Period Unassigned), Enclosure(S) (Period Unassigned)
NRHE Number	NJ43NW65
HER Number	NJ43NW0055
Status	Non-designated
Easting	340401
Northing	836375
Parish	Glass
Council	Aberdeenshire
Description	Post-Medieval (from 1560 AD). Remains of two buildings and an enclosure. On the OS map of 1867 it is depicted as a single building with an enclosure immediately to the north-east. By the 1888 edition there is an L-shaped building with an attached enclosure to the north and south.

Asset Number	15
Asset Name	GREENS OF GLENBEG
Type of Site	Building (Period Unassigned)
NRHE Number	NJ43NW67
HER Number	NJ43NW0066
Status	Non-designated
Easting	340528
Northing	837310
Parish	Glass
Council	Aberdeenshire
Description	Post-Medieval (from 1560 AD). Ruined building.

Asset Number	16
Asset Name	CRAIG DORNEY
Type of Site	Building (Period Unassigned), Enclosure(S) (Period Unassigned), Rig And Furrow (Medieval)(Poss
NRHE Number	NJ43NW73
HER Number	NJ43SW0010
Status	Non-designated
Easting	340150
Northing	834912
Parish	Glass
Council	Aberdeenshire
Description	Post-Medieval (from 1560 AD). Area of upstanding enclosures, building footings and circular features with possibly some rig and furrow.

Asset Number	17
---------------------	----

Asset Name	BUTTERWARDS
Type of Site	Hut Circle (Prehistoric)
NRHE Number	NJ43NW23
HER Number	NJ43NW0026
Status	Non-designated
Easting	340134
Northing	835547
Parish	Glass
Council	Aberdeenshire
Description	<p>Prehistoric period uncertain. Possible Hut circle, north of Craig Dorney hill fort.</p> <p>On slopes N of Craig Dorney fort (NJ43NW 20), a hut circle is visible in snow on air photographs.</p> <p>Canmore Record has noticeably different coordinates than HER record I Ralston 1989.</p> <p>Ralston, I. (1989c) 'Butterwards (Glass parish), hut circles', Discovery Excav Scot, 1989. Page(s): 21</p>

Asset Number	18
Asset Name	BLUE STONE
Type of Site	Natural
NRHE Number	
HER Number	NJ33NE0016
Status	Non-designated
Easting	339806
Northing	835690
Parish	Glass
Council	Aberdeenshire
Description	Nil Antiquity. A small conical rock, so-called because of its bluish colour. It is a natural feature.

Asset Number	19
Asset Name	LINN BURN
Type of Site	Farmstead (Period Unassigned)
NRHE Number	NJ33NE13
HER Number	NJ33NE0018
Status	Non-designated
Easting	339850
Northing	835313
Parish	Glass
Council	Aberdeenshire

Description Post-Medieval (from 1560 AD). Remains of a building and part of an enclosure.

Asset Number 20

Asset Name CRAIG DORNEY

Type of Site Fort (Period Unassigned)

NRHE Number SM13746

HER Number NJ43NW0016

Status Scheduled Monument

Easting 340431

Northing 835352

Parish Glass

Council Aberdeenshire

Description The monument comprises the remains of a fort likely to date to the Early Medieval period (AD 400 – 1000) but with possible origins in the Iron Age (800 BC – AD 400). The fort is visible as a roughly oval-shaped rampart, now reduced to a terrace feature, enclosing the summit of Craig Dorney hill. A lower, second terrace feature and sections of an enclosing ditch are partially visible in the northeast, southeast and southwest quadrants. These features enclose a space approximately 90m northeast to southwest by 50m transversely. The monument is located atop a locally prominent natural rock outcrop, overlooking the natural routeway along the river Deveron, to the southeast, at 410m above sea level.

Limited archaeological investigations within the fort reveal the presence of a shallow ditch and the position of possible internal platforms or building stances. A sample of charcoal indicates a date of between 430-565 AD, confirming the early historic use of the monument. Monuments of this type in northeast Scotland are also associated with later prehistoric activity. It is therefore possible that this example was first constructed in the Iron Age and re-used over the succeeding centuries.

The scheduled area is circular and measures 200m in diameter. It includes the remains described above and an area around within which evidence relating to the monument's construction, use and abandonment is expected to survive. Specifically excluded from the scheduling are the above ground remains of boundary features, including fences.

Asset Number 21

Asset Name CHAPELHILL

Type of Site Standing Structure

NRHE Number

HER Number NJ43NW0067

Status Non-designated

Easting 340642

Northing 837285

Parish Glass

Council Aberdeenshire

Description Post-Medieval (from 1560 AD). Two ruined buildings, depicted on the OS 1st and 2nd edition maps as rectangular buildings each with a small attached enclosure to the W.

Asset Number	22
Asset Name	REID'S MOSS
Type of Site	Building (Period Unassigned), Enclosure (Period Unassigned)
NRHE Number	NJ43NW63
HER Number	NJ43NW0053
Status	Non-designated
Easting	340464
Northing	836658
Parish	Glass
Council	Aberdeenshire
Description	Post-Medieval (from 1560 AD). A small farmstead and enclosure is depicted on the OS map editions of 1867 and 1888. There is also a long range to the west orientated NE/SW. All are now ruined.

Asset Number	23

Type of Site	Mill Building
NRHE Number	
HER Number	NJ43NW0099
Status	Non-designated
Easting	341148
Northing	835112
Parish	Glass
Council	Aberdeenshire

Description Post-Medieval (from 1560 AD). Mill building still in use as a residential dwelling. It is depicted on the 1867 1st edition OS map. The map shows two rectangular buildings, a L-shaped building with a mill lead running to it, and a subrectangular enclosure. By the 1888 2nd edition map the L-shaped building has become square. Both maps show a suspension footbridge across the River Deveron to the south. The 2005 map shows one rectangular building is still complete.

Asset Number 25

Asset Number	38
Asset Name	FORTEATH
Type of Site	Artefact; Cist(S) (Period Unassigned), Beaker(S)
NRHE Number	NJ43SW3
HER Number	NJ33SE0054
Status	Non-designated
Easting	339145
Northing	833242
Parish	Cabrach
Council	Moray
Description	Bronze Age (2200 BC - 800 BC)

A beaker was found when the farmer of Forteath was digging a pit to bury a dead sheep in c.10 years ago (information from Sandy Stephen, Kingsmill, Turriff, son of farmer, 2001). In c.1990 another beaker was found in this vicinity, although the exact location is unknown, while a pit was being dug to bury a sheep. The beaker broke on discovery. It is a finely made step 4 beaker, decorated with bands of squarish-toothed comb impressions. On a visit to this site in

2003 several large stone slabs were located near a dyke which may have come from a cist.

(NJ 3999 3325) Stone Coffins containing Urns and Human Remains found (NAT)
OS 6" map, Banffshire, 2nd ed., (1904)

A number of cists containing crouched burials and beakers, were discovered during ploughing and sanddigging at Lesmurdie between c. 1830 and 1911. Three of the beakers, one type Ca and two Cb, also some flint arrowheads, found in 1851 when 5 cists, were opened, went to the National Museum of Antiquities (Beaker Accession nos. EQ 30-32). Two more beakers were reported to be in the possession of Mr Taylor of Boghead of Lesmurdie and the Rev A Gordon. Others had been destroyed.

A Robertson 1855; Gentleman's Magazine 1862; J Christie 1865; A Gordon 1884; J Taylor 1913-14; M E C Mitchell 1934

According to Mr A Stephen (Eastertown, Cabrach, Banffshire) the stone cists remain in situ, but there are no surface traces. The whereabouts of the two beakers reported to be held locally could not be ascertained.

Visited by OS (RL) 31 January 1967.

(Name cited as Lesmurdie). This location is in arable ground on the E-facing terrace of the River Deveron at an altitude of about 250m OD.

NMRS, MS/712/48.

NJ 401 332 A Beaker was found at least 10 years ago while burying a sheep at Forteach (aka Lesmu[i]rdie; Easterto[w]n). It broke on discovery, revealing a clear coil joint line, and has since been repaired but is incomplete. No further details of the findspot are available. It is a finely made step 4 Beaker, decorated with bands of squarish-toothed comb impressions. Donated to the national collections in 2001. A number of cists with crouched inhumations and Beakers were found during ploughing and sand extraction between c 1830 and the 1910s; three Beakers from this cemetery were acquired for the national collections in 1852 (NMRS NJ43SW 3). A Sheridan and F Hunter 2001

Status	Non-designated
Easting	337408
Northing	832320
Parish	Cabrach
Council	Moray
Description	Post-Medieval (from 1560 AD). A Farmstead comprising four buildings is shown on the 1846 OS map. A L-shaped range composed of two of these forms an open sub-rectangular irregular court with the third and fourth buildings. This court is open to the south-east and north-west. A sluice is also marked to the north-west. A further range attached to the north-east corner of the L-shaped building is shown on the 1888 OS map. This makes the building U-shaped with the court facing the south-east. The main building today is of two ranges, mainly composed of the northern extension on the 1888 map. The two other buildings which formed the original court in 1846 are still in use today. The sluice possibly still exists as the pond is still marked.

Description	<p>Bronze Age (2200 BC - 800 BC). LBA gold armlet; found when ploughing in 1943 and remained on mantlepiece in farmhouse until publicity of Easter Ross gold hoard brought it to the attention of IAGS by the farmer. Claimed as treasure trove; now in museum.</p> <p>[Site-name and location not specified]. LBA gold armlet. A single gold bracelet with expanded terminals, which had been ploughed up over 30 years ago was reported last year. The site was investigated archaeologically, but no further information or objects were recovered.</p> <p>D Clarke, I Shepherd and A Barlow 1980.</p> <p>(Location cited as NJ c. 409 333 and name as Tomnaven). This object was originally ploughed up in 1943 or 1946 in an area of permanent pasture on a N-facing hillside above the head-dyke at an altitude of about 300m OD. After it was reported to the NMAS, an area of 1760 sq m was searched over a period of four days without return. The armlet, which is complete but slightly scratched, is held in Aberdeen Art Gallery.</p> <p>[Newspaper references and ground photography listed].</p> <p>NMRS, MS/712/36.</p> <p>Clarke, Shepherd and Barlow, D {V}, I {A G} and A. Description	Post-Medieval (from 1560 AD). NJ33SE 62 3642 3476 to 3734 3436 BS (marked F/L) [NAT] at NJ 3642 3476 (in Cabrach ph.) Stone (marked F/L) [NAT] at NJ 3660 3451 (in Cabrach ph.) Stone (marked F/L) [NAT] at NJ 3714 3416 (in Mortlach ph.) Stone (marked F/L) [NAT] at NJ 3734 3436 (in Mortlach ph.)

OS 1:10,000 map, 1971.

(Name also cited as Carbet Hill). Four boundary stones marked 'F/L' are situated on the moderate N-facing slope of Garbet Hill at an altitude of about 490m OD.

NMRS, MS/712/38.

The line of these stones corresponds broadly (but not exactly) to the boundary between the parishes of Mortlach and Cabrach that is indicated on the 1971 edition of the OS 1:10,000 map.

Information from RCAHMS (RJCM), 13 April 1999.

Field Visit (24 July 1943)

Emergency Survey (archaeology) Cairns, etc. Meikle Balloch and Garbet Hills.

All the stones and small cairns on these hills are surveyor's marks. At the stone pillar marked LF [NJ 3596 3512], 200 yds N of pt.1521 there is a pit or dug-out lined with rough masonry, but this also seems to be of modern construction.

Visited by RCAHMS (AG) 24 July 1943

Description	<p>Prehistoric period uncertain</p> <p>(NJ 398 378) Cairns (NR). OS 6" map, Banffshire, 2nd ed., (1905)</p> <p>A number of cairns on the summit of White Hillock supposed to be burial places. Name Book 1869.</p> <p>A field system indicated by about 50 stone clearance heaps. Only one field, defined by clearance heaps, and measuring 23.0m by 12.0m, is visible. There are no associated hut circles. Visited by OS (N K B) 3 January 1967.</p> <p>Field Visit (22 July 1943) Cairns, Greens of Glenbeg.</p> <p>On the top of the broad ridge of moorland that separates Markie Water from the Burn of Edinglassie, at the point—about 1000 ft above sea level—where the OS map marks 'Greens of Glenbeg', there is a widely scattered group of small cairns measuring in general about 12ft in diameter and 1ft or less in height. They are heavily covered with peat and overgrown with heather, but seem to be made of the broken stone that lies under the surface in many parts of this district although exactly here everything seems to be covered up with peat. Towards the SE the cairns extend into the uppermost field of the farm-lands that slope towards the Burn of Edinglassie, and here the foundations of a large oblong hut can be seen measuring 30ft by 20ft and having an internal subdivision. It is probably that many more remains of the same kind, both cairns and huts, would be found on the moorland if the heavy growth of heather was burned off; at present only the most distinct cairns can be seen among the deep heather, and no hut-foundations at all could be identified here.</p> <p>Visited by RCAHMS (AG) 22 July 1943.</p> <p>Ordnance Survey (Name Book. Description	Bronze Age (2200 BC - 800 BC)

(NJ 3999 3325) Stone Coffins containing Urns and Human Remains found (NAT)
OS 6" map, Banffshire, 2nd ed., (1904)

A number of cists containing crouched burials and beakers, were discovered during ploughing and sanddigging at Lesmurdie between c. 1830 and 1911. Three of the beakers, one type Ca and two Cb, also some flint arrowheads, found in 1851 when 5 cists, were opened, went to the National Museum of Antiquities (Beaker Accession nos. EQ 30-32). Two more beakers were reported to be in the possession of Mr Taylor of Boghead of Lesmurdie and the Rev A Gordon. Others had been destroyed.

A Robertson 1855; Gentleman's Magazine 1862; J Christie 1865; A Gordon 1884; J Taylor 1913-14; M E C Mitchell 1934

According to Mr A Stephen (Eastertown, Cabrach, Banffshire) the stone cists remain in situ, but there are no surface traces. The whereabouts of the two beakers reported to be held locally could not be ascertained.

Visited by OS (RL) 31 January 1967.

(Name cited as Lesmurdie). This location is in arable ground on the E-facing terrace of the River Deveron at an altitude of about 250m OD.

NMRS, MS/712/48.

NJ 401 332 A Beaker was found at least 10 years ago while burying a sheep at Forteach (aka Lesmu[i]rdie; Easterto[w]n). It broke on discovery, revealing a clear coil joint line, and has since been repaired but is incomplete. No further details of the findspot are available. It is a finely made step 4 Beaker, decorated with bands of squarish-toothed comb impressions. Donated to the national collections in 2001. A number of cists with crouched inhumations and Beakers were found during ploughing and sand extraction between c 1830 and the 1910s; three Beakers from this cemetery were acquired for the national collections in 1852 (NMRS NJ43SW 3).

Description Cabrach Royal Observer Corps post, opened in June 1960 and closed September 1991. The surface features remain, within a small rectangular compound, but internally the post has been stripped. Building survey of the post was carried out by Cameron Archaeology in 2018. The visible surface features comprise an air vent, brick and concrete plinth with a concrete cap and cast iron vents, a ground zero indicator, a bomb power indicator and access with a cast iron hatch. Underground, the post was built of concrete blocks and divided into two rooms, the main room measuring 4.6m by 2.3m wide. Few fittings remain.

Description (NJ 3885 3186) Chapel (NR). (In Ruins). Grave Yard (NR). (Remains of). OS 6" map, Banffshire, 2nd ed., (1904)

The remains of a chapel and burial ground situated opposite the mill of Corinacy. New Statistical Account (NSA) 1845; J Taylor 1914.

All that remain of the chapel are the turf-covered wall footings of a building lying approximately E to W, with an entrance in the S side. The wall footings are c.1.2m wide and c.1.0m maximum height. The building measures c.9.5m by c.4.1m internally.

According to A Stephen (Mr A Stephen, Eastertown, Cabrach, Banffshire) the burial ground occupied the whin-covered mound immediately to the S of the chapel, but no gravestones are now visible and the limits of the burial ground could not be ascertained.

Revised at 1/2500. Visited by OS (R L) 26 January 1967.

Description Farmstead, still in use, depicted on OS 1st and 2nd edition maps on which it is named

Invercharach. These show a quadrangular-plan steading open at the southeast corner, the northwing extended to the east. The 2nd edition also shows an attached horse mill on the south side. To the east is an L-plan building. To the north stands a possible smithy NJ33SE0043. A standing building survey of the steading was carried out by Cameron Archaeology between June and September 2018 and at least four phases of development were recorded. The earliest phase was probably the west wing of the steading, the other three wings added some time before the mid 19th century. Extensions on the east side of the farmstead as shown on the 1st and 2nd edition maps have since been demolished and a wooden extension added. Large tractor doors were added to several rooms around the 1960s and various openings blocked. South of the steading is a Nissen-style Dutch barn purchased from Dalloch after World War 2, and another Dutch barn added in the 1980s. Geophysical survey was carried out by RGC in July and September 2018 in advance of renovation work. Amorphous anomalies in the courtyard may indicate remnants of a cobbled surface, Stronger anomalies in the southeast of the survey area beyond the main building complex probably relate to remnants of foundations visible at the surface and of relatively modern date. Anomalies in the southwest of the survey area are likely to relate to recent work and modern ground disturbance. A trial trenching evaluation was carried out by Cameron Archaeology in September 2018. Trenches within the steading buildings revealed evidence of the early 19th century farm, including cobbled surfaces where animals had been stalled, and animal feeders of 19th and 20th century date. Below the cobbled surfaces the finds were of mid 19th century date. Trenches within the steading court were all dug through modern rubble and backfill of what had been a sunken midden. no features or artefacts earlier than the early 19th century were recorded. It has been suggested that there was formerly a castle on the site, though there is no firm evidence for this. The earliest record of Inverharroch goes back to the 8th century when the land was granted: it came into the possession of the House of Gordon in 1488 and 'Invercharach' is shown on the 1636 Robert Gordon map. The castle was said to be still standing in 1725, but by the late 18th century was described as a 'visible ruin'.

Easting	334204
Northing	836866
Parish	Mortlach
Council	Moray
Description	<p>The farmstead of Laggan is depicted on the OS map of 1846 as a U-shaped steading with open court to the SE. A rectangular building lies within the court. The house lies to the SE with an attached enclosure to its east. There appear to be several small buildings in the corners of it. To the SW is another building. North of the steading is a single building, possibly a mill, with a mill pond to its south. By the 1888 map edition the farmstead has been moved c90m to the north and nothing is depicted of the original steading, although the house and two of the other buildings survive. A new building lies south of the pond which still survives. The farmstead is U-shaped with open court to the NW. Today part of the later farmstead survives but with other additions. The pond has gone although the area remains. The three buildings in the south still survive.</p>

Asset Number	111
Asset Name	Innesbrae, buildings 320m SW of
Type of Site	Secular: domestic buildings; shieling
NRHE Number	SM11720
HER Number	
Status	Scheduled Monument
Easting	343624
Northing	824947
Parish	Auchindoir And Kearn
Council	Aberdeenshire
Description	<p>The monument comprises a group of turf-built structures of later medieval or post-medieval date, situated along a low ridge covered in heather approximately 300m S of the main modern road at Innesbrae and to the west of the Stripe of Clashandail burn. None of the structures appear on the Ordnance Survey First Edition map (1870), suggesting that they had fallen out of use by this date.</p>

Four rectangular and sub-rectangular turf-built buildings survive to a height of about 0.3m. The three largest buildings are orientated NNE-SSW. The interiors of the two southern buildings have been dug into the slope of the ridge and have internal compartments. The southernmost building has four compartments and an outshot attached on its NE side. The buildings lie approximately 750m to the SW of a deserted township and may represent the remains of a shieling site used by the township's inhabitants.

The scheduled area is sub-rectangular on plan, to include the buildings and an area around and between the buildings in which evidence relating to their construction and use may survive.

Bibliography

RCAHMS records this site as NJ42SW 9.

Asset Number	112
Asset Name	Innesbrae, farmhouse, farmsteading and township 450m NE of
Type of Site	Secular: farmstead; settlement, including deserted and depopulated and townships
NRHE Number	SM11721
HER Number	
Status	Scheduled Monument
Easting	344089
Northing	825557
Parish	Auchindoir And Kearn
Council	Aberdeenshire
Description	<p>The monument comprises the remains of a farmhouse and farmsteading of the late 18th to 19th century and a clustered township, or fermtoun, of the late medieval or later period. It lies in rough pasture on a wide shelf on the S side of Bairn's Hill, next to some distinctive stone outcroppings. The Ordnance Survey First Edition map shows that several of the buildings were roofed in 1870, suggesting that the site may still have been occupied at this date.</p>

The structures shown as roofed in the First Edition map consist of the remains of the one-and-a-half storey farmhouse, standing to wall-head height, and the remains of an L-shaped range and horse-engine platform lying immediately to the WSW. A small enclosure lies to the NW of these structures. Thirteen much more ruined buildings lie to the N of the farmsteading. The First Edition map depicts only one of these, suggesting that these buildings represent the remains of a township of earlier date than the farmsteading itself. They cluster tightly and are rectangular in plan, often built of substantial stone blocks but only surviving to one or two courses in height. All are orientated E-W. Part of a ruined infield lies to the W side of the township, while Improvement-period fields surround the site to the E and S.

The scheduled area is irregular on plan, and include the upstanding remains of the farmhouse, farmstead and township, part of the infield and an area around in which evidence relating to the construction and use of the site may survive. The scheduling excludes the modern boundary fence that bounds the area on its S side.

Bibliography

RCAHMS record the site as NJ42NW 56.

Description	<p>The monument comprises the remains of 11 later prehistoric round houses and cultivation systems probably associated with them.</p> <p>The houses are between 16m and 11m across and the field systems take the form of lynchets, clearance cairns and banks throughout the northern area.</p> <p>There are two areas. The larger contains 7 of the houses and the field systems; it measures a maximum of 470m N to S by a maximum of 370m E to W, as marked in red on the attached map. The smaller area includes the remains of 4 houses each in a small clearing in a forestry plantation. It measures a maximum of 100m E to W by a maximum of 50m N to S.</p> <p>Bibliography RCAHMS record the site as NJ34SE 5.</p>

Asset Number	114
Asset Name	Balvenie Castle
Type of Site	Secular: castle
NRHE Number	SM90028
HER Number	
Status	Scheduled Monument
Easting	332598
Northing	840894
Parish	Mortlach
Council	Moray
Description	<p>The monument comprises the remains of a castle of 13th- to 16th-century date. It lies on a promontory above the River Fiddich, at around 150m OD, and comprises the remains of Balvenie Castle. Sub-rectangular on plan, it measures approximately 55m NW-SE by about 40m</p>

transversely, surrounded on the NW and SW by a ditch measuring about 12m wide with vertical, stone revetted sides.

The earliest remains of the castle probably date to the latter half of the thirteenth century. They comprise the remains of a castle of enceinte, represented by a quadrangular curtain wall measuring about 2m thick and up to about 10m high, enclosed by a berm and a wide ditch. The castle had salient towers at the W and N corners, and probably on the E. The ditch survives on the NW and SW; on the NE it has been replaced by a cultivation terrace, while on the SE it appears to have been filled in. The footings of buildings against the inside faces of the NW, SW and SE walls of the courtyard probably date to the late 14th century or early 15th century. Under John Stewart, 4th earl of Atholl (1542-79), however, a three storey lodging (the Atholl Lodging) was built in the NE part of the SE range, with a rounded tower protruding from its E corner.

The scheduled area comprises the remains described and an area around them within which related material may be expected to be found. It is irregular with maximum dimensions of 120m from its northernmost point to its southernmost point and 170m from its easternmost point to its westernmost point, bounded for most of its perimeter by a fence, the above-ground elements of which are specifically excluded from the scheduling. The scheduling excludes the modern building erected as a custodian's hut and also the top 30cm of the modern road and carpark surfaces to allow for maintenance.

Asset Number	115
Asset Name	Auchindoun Castle, castle and fort
Type of Site	Prehistoric domestic and defensive: fort (includes hill fort and promontory fort), Secular: castle;
NRHE Number	SM90024
HER Number	
Status	Scheduled Monument
Easting	334886
Northing	837467
Parish	Mortlach
Council	Moray
Description	The monument consists of a 15th-century L-plan towerhouse, with an underlying prehistoric fort.

Auchindoun is attributed to James Cochrane, Earl of Mar, or Thomas Cochran, favourite of James III. By the 16th century it belonged to the Ogilvies, who sold it to the Gordons in 1535. By 1725 it was derelict, and William Duff of Braco was granted permission to remove stones from it for his new house at Balvenie.

Built on the L plan, it is unusual in having the entrance not in the re-entrant angle but towards the W end of the S wall. It leads into a barrel-vaulted basement, with a drain in the W wall and a small barrel-vaulted chamber (2 x 1.7m, and 1.7m deep) below the floor.

This chamber was accessible from the first floor by a stair in the NW corner, but there was no direct means of communication between it and the cellar beneath the jamb, which would only have been accessible from above, possibly through a trap door; it may have been a prison.

On the first floor was the hall, 9.3m long by 5.8m wide. The stair emerges at the SW corner of the screens end. In the adjacent W wall is a wall closet. At the E end of the screens passage another door leads into a jamb-chamber, with garderobe and window seats. This may have been the steward's quarters, supporting the idea of the chamber below having been a prison. The hall was rib-vaulted in two bays, the vaulting springing from corbels; at the N end the

angle-groins were incorrectly set out, so that an intermediate capital had to be inserted to enable a fresh start to be made at a higher level. At the N, upper, end of the hall is a large fireplace, flanked by windows with stone seats in the E and W side walls.

The floor above may have been an upper hall, with large windows. In the jamb there were two storeys in the height of the hall, and other rooms above. It is not clear how they were accessible.

The tower was surrounded by a high wall measuring some 22.4m E-W by 32 m N-S. On the south this contained the gatehouse range. On the E the wall was later pushed out some 6.5m to accommodate another range containing kitchen, bakery and other offices. A rounded tower with gun-loops was also added to the NW corner.

The castle stands inside a bivallate hillfort, assumed to be of Iron Age date. The inner rampart of the fort, formed by a ditch and outer bank, is mutilated by approach ramps to the castle on the W side and by quarrying on the S. The outer defences are formed by natural rocky slopes on the E and by a ditch and outer bank on the N and S; on the W the rampart has been destroyed by cultivation. On the E side are remains of a lime kiln of more recent date. The scheduled area includes the remains of the castle, fort and lime kiln, representing an irregular area some 200m E-W by 230m N-S.

Asset Number	116
Asset Name	Gallows Hill Cairn, 460m SSE of Mains of Lesmoir
Type of Site	Prehistoric ritual and funerary: barrow, Secular: gallows, gibbet; mound (unallocated to other c
NRHE Number	SM11576
HER Number	
Status	Scheduled Monument
Easting	347229
Northing	827727
Parish	Rhynie
Council	Aberdeenshire
Description	The monument comprises a burial mound that lies in a stony, semi-improved pasture on the NE flank of The Peirk, 460m SSE of Mains of Lesmoir.

The mound is made of earth and stone, and measures 20 m in diameter and approximately 2m in height. The size, regular shape and location within the landscape indicate that it is a burial barrow, dating to the Bronze Age. The placename suggests later use as the site of a gallows.

The scheduled area is circular in plan, centred on the cairn, to include the barrow and an area of ground around within which evidence for its construction and use can be expected to survive.

Council	Aberdeenshire
Description	<p>The Iron Age hillfort on Tap O' Noth is one of the largest in Scotland, consisting of 21 ha enclosed by a stone rampart. More than 100 house platforms have been recorded between the rampart and a massive wall that further protects the hill's summit. This stone and timber wall, more than 6m in width and 3m high, is vitrified in places - the stones have fused together through intense, prolonged heat. The extremely high temperatures generated by the burning timbers causes the surrounding stone to melt, and this phenomenon has been observed at many forts. On the summit there is a rock cut well or cistern.</p> <p>Information from RCAHMS (SC) 13 August 2007 RCAHMS 2007 Armit, I 1998 Ritchie, A and Ritchie G, 1998</p>

Asset Name	Mortlach, Battle Stone, symbol stone
Type of Site	Crosses and carved stones: cross slab; symbol stone
NRHE Number	SM350
HER Number	
Status	Scheduled Monument
Easting	332411
Northing	839248
Parish	Mortlach
Council	Moray
Description	<p>The monument comprises the carved stone called the Battle Stone, which stands in the middle of the lower cemetery to the south-east of Mortlach parish church.</p> <p>It is of green slate (1.8 by 0.56 m) and on its front are carved in low relief a Celtic cross, two fish and an unidentified beast, while on the reverse side are a serpent, a bull's head or bucranium, a horseman and a dog. The cemetery appears to have been laid out around the stone, which formerly stood in a field; however, since it is leaning at an angle, it does not seem to have been moved or reset when the cemetery was extended. The stone is traditionally associated with a battle said by Fordun to have been won by Malcolm II over Norwegian invaders at Mortlach in the first year of his reign (1005-6). Malcolm II is also supposed to have founded a bishopric at Mortlach in the seventh year of his reign. Fordun does not, however, mention the Battle Stone</p> <p>The scheduled monument comprises the symbol stone and the ground extending for 2m around it.</p>

Description	Castle, extensively ruined, especially on the north, south and east side where only the inner wall face can occasionally be seen. Also known as Boharm Castle. A box plinth was discernible at the north end of the west wall but it has been robbed out and undercut. To the east of the castle is a level area, probably a courtyard, in which can be seen the overgrown footings of a building 9 x 4m. This abuts the remains of a wall which bounds the south side of the courtyard. All other traces of a surrounding wall have disappeared save for a portion leading from the northeast angle of the castle. W. D. Simpson believed Gauldwell Castle to be a 13th Century hall-house, similar to Rait Castle (near Nairn), although Shaw states that a castle was established in Boharm Parish in the 12th century, probably on the site of the present ruined castle. An account by the parish minister in 1796 records the castle and the discovery of several silver spoons. Excavation in 1955 recovered pottery sherds, animal bones and metal objects although the whereabouts of these objects is not known. Survey of the castle was carried out by RCAHMS in July 1984 following clearance of vegetation.

Asset Number	121
Asset Name	Brawland, cupmarked boulder 270m WSW of
Type of Site	Cup-marked boulder
NRHE Number	SM11611
HER Number	
Status	Scheduled Monument
Easting	347085
Northing	826671
Parish	Auchindoir and Kearn
Council	Aberdeenshire
Description	<p>The monument comprises a large cupmarked boulder that lies in improved pasture. The nature of the carvings suggests a date in the Bronze Age.</p> <p>The boulder measures 3.7m in length, 2.3m wide and 1.2m in height. At least 21 cupmarks, the largest measuring 80mm in diameter, are visible on its upper surface. Three have been subject to more recent drilling, perhaps as an effort to break up the stone.</p> <p>Cultural Significance</p> <p>The monument's archaeological significance can be expressed as follows:</p> <p>Intrinsic characteristics: The Brawlands stone bears well-preserved cupmarkings that have the potential to enhance the study of Bronze Age communities and their ritual practices in Britain and Ireland.</p> <p>Contextual characteristics: The ritual association of cupmarking is evidenced by their occurrence at 12 central Grampian stone circles where they are located either on the recumbent (eg Sunhoney) or the flankers of the stone adjacent to the recumbent (eg Loanhead). Recent research has shown that the cupmarks cluster here at the point where the (major standstill) moon rises or sets. Cupmarks, either on their own or as cup and rings are also found on boulders and outcrops with no apparent associated features and on stones within cists.</p>

National Importance

The monument is of national importance because it has an inherent potential to make a significant addition to the understanding of the past, in particular of the ritual life of Bronze Age communities in Grampian and their cultural links with other areas of the British Isles.

The monument is recorded by RCAHMS as NJ42NE 48.

Asset Number	122
Asset Name	Newseat, hut circles and platforms 240m NNE of
Type of Site	Hut circle; platform
NRHE Number	SM11651
HER Number	
Status	Scheduled Monument
Easting	348859
Northing	828372
Parish	Rhynie
Council	Aberdeenshire
Description	<p>The monument comprises the remains of two hut circles and two platforms, surviving as upstanding earthworks and mounds. These sites are regarded as dwellings dating to the later prehistoric period and are situated close together on flat open rough grazing at 285 m OD on the south facing slopes of Tap O' Noth.</p> <p>The S hut circle, measuring 10 m in diameter, survives as an earth bank. Located 30 m to the NNW, the second hut circle is also distinguished by an earth bank with occasional stones within it and measures 10 m in diameter. The two platforms are immediately adjacent to the northern hut circle being grassy circular mounds, 6 m and 10 m in diameter respectively. The larger platform is distinguished by larger boulders set on the eastern edge of the platform. The monument is surrounded by numerous cairns and traces of an ancient field system.</p> <p>Cultural significance</p> <p>The monument's archaeological significance can be expressed as follows:</p> <p>Intrinsic characteristics: the monument is a well-preserved archaeological site. It has not been excavated and therefore has the potential to provide high quality archaeological evidence for the construction, use and abandonment of prehistoric dwellings.</p> <p>Contextual characteristics: the site is a good example of a type known throughout northern Scotland. The site is probably associated with ancient cairns and a field system. These features may well be contemporary and therefore enhance the potential to understand the agricultural context of domestic activity on the site.</p> <p>Associative characteristics: the monument is the product of prehistoric peoples and demonstrates the dominant type of dwelling using during the Bronze and Iron Ages in northern Scotland.</p>
National Importance	

The monument is of national importance because it has an inherent potential to make a significant addition to the understanding of the past, in particular the settlement and economy of Scotland during the Bronze and Iron Ages. This potential is enhanced by its relatively good preservation. The loss of this example would affect our ability to understand the Bronze and Iron Ages in Scotland

RCAHMS record the monument as NJ42NE 158. There are further related RCAHMS NMRS entries for the immediate area which are NJ42NE 159 and NJ42NE 46.

Council	Aberdeenshire
Description	<p>The monument comprises two hut circles, visible as upstanding earthworks in gently-sloping rough pasture on the SE flank of Wheedlemont Hill. These sites are regarded as dwellings dating to the later prehistoric period.</p> <p>The E hut circle, measuring about 12 m in diameter, survives as a stone and earth bank about 1.2 m wide. Inner and outer facing stones are visible on this wall and the N part of the interior has been terraced into the slope. The entrance is visible as a gap in the wall on the S. The W hut circle, which partly overlies the E hut circle, measures about 11 m in diameter and survives as a grassy bank 1.3 m wide. The entrance is visible on the S, although the SW part of the wall is visible only as a linear depression.</p> <p>Cultural Significance</p> <p>The monument's archaeological significance can be expressed as follows:</p> <p>Intrinsic characteristics: The monument is a well-preserved archaeological site. It is unexcavated and therefore has the potential to provide high quality archaeological evidence for the construction, use and abandonment of later prehistoric dwellings. The sequence of</p>

building evidenced here enhances this potential.

Contextual characteristics: The monument is a good example of a type known throughout northern Scotland. The site is probably associated with the surrounding field system and cairn and this therefore enhances the potential to understand the agricultural context of domestic activity on the site.

Associative characteristics: The monument is the product of prehistoric peoples and demonstrates the dominant type of dwelling in use during the Bronze and Iron Ages in northern Scotland.

National Importance

The monument is of national importance because it has an inherent potential to make a significant addition to the understanding of the past, in particular the settlement and economy of Scotland during the Bronze and Iron Ages. This potential is enhanced its relatively good preservation and the evidence for a building sequence. The loss of this example would affect our ability to understand the Bronze and Iron Ages in Scotland.

RCAHMS records this site as NJ42NE 47. It is recorded in the Aberdeenshire SMR as NJ42NE0050.

Asset Number	124
Asset Name	DRUMMUIR CASTLE
Type of Site	Castle
NRHE Number	LB2296
HER Number	
Status	Listed Building - Category A
Easting	337150
Northing	844110
Parish	Botriphnie
Council	Moray
Description	Thomas MacKenzie, 1846-7, additions Alexander Reid (A and W Reid), Elgin, 1865. Rainwater goods dated 1847 and 1865. Picturesque turreted castellated mansion, mainly of 3 storeys over raised basement with SW garden front and NE entrance elevation. Coursed rubble, tooled and polished ashlar dressings.

Asymmetrical NE front with entrance fronting square 3-storey tower and masked at ground by substantial porte-cochere, itself with large Gothic traceried window and angle turrets. Main outer ranges terminate with angle turrets rising above wallhead and with projecting library

window at left of main entrance; 2-storey service range and service court linked to main frontage by single storey, 4-bay block; 2 17th century Duff armorials re-set in wall of service court.

Picturesque 7-bay SW garden front somewhat regularised in 1865 by raising W portion to 3 storeys. Advanced centre bay with projecting canted window rising 2 storeys above raised basement; shallow Tudor- arched lintels to raised basement windows in SW and NW elevations; hoodmoulded 1st floor fenestration; square or horizontal multi-pane glazing. One drum and one corbelled octagonal angle drum-tower.

Hoodmoulded ground floor fenestration; corbelled and crenellated wallheads; batteries of tall coped stacks; slate roofs.

INTERIOR: double-leafed studded entrance door with applied Gothic detailing leading to octagonal vestibule with lierne ribbed ceiling and central boss, angle niches under cusped canopies; glazed door to stair hall with cusped detailing and cusped fanlight. Also entrance left to billiard room.

STAIRHALL: top lit under 3-storey tower. Broad staircase with cusped moulded wooden balustrade; compartmented boarded ceiling with armorial bosses.

LIBRARY: white marble chimneypiece; later cast-iron grate; later 19th century bookcases.

DRAWING-ROOM: cusped panelled dado, doors, window shutters all white painted with gold detailing. Very unusual white and gold wallpaper (1847) reproduced and replaced 1988; cusped panelled white marble chimneypiece; decorative plaster ceiling.

BOUDOIR (between drawing- and dining-rooms): small octagonal room with surviving 1847 white and gold decoration; panelled fittings as in drawing-room.

DINING-ROOM: green and gold painted cusped panelled dado, doors; shutters; monogrammed doors; original Celtic scrolled wallpaper (1847); decorative plaster ceiling; French windows to garden (later enlargement of window).

1ST FLOOR LANDING: arcaded landing surrounds open central square balustraded void (under tower), each side supported by paired Tudor arches with Tudor rose motif in spandrels.
Statement of Special Interest

Castle built by Admiral Archibald Duff at cost of \$10,000, 1846-7.

The vestibule and stairhall pay striking homage to those at Taymouth Castle, the influence on Drummuir appearing to be direct.

Council	Aberdeenshire
Description	<p>Description</p> <p>Courtyard castle comprising:- Z-PLAN TOWER HOUSE, Probably c. 1550 and before 1575 3-storey and attic harled with square N.W. Dog Tower, larger circular tower at S.E. Very finely detailed, moulded square headed door in Dog Tower with late gothic bases, sunk panels over. Rich gothic ogee panel, now empty on W. wall of centre section. Other sculptured details in angles, dog finial to Dog Tower.</p> <p>Interior: ground floor vaulted, hall at 1st floor divided into dining and drawing rooms late 17th century with bolection moulded chimney piexes and coved ceilings at a lower level than original which has joists on carved corbels; has been painted, mostly renewed. Top of house remodelled with straight skews and wall head gable late 17th or early 18th century; present doorpiece on W. wall architraved, later 18th century.</p> <p>N. WING Probably originally 17th century, remodelled or rebuilt early 19th century and added to; additions remodelling and repairs, A. Marshall Mackenzie 1890.</p>

S. WING

Single-storey remodelled or rebuilt second half of 18th century.

GATE AND COURTYARD WALL ON W.

Gate dated 1673 on E. face. Arched, Renaissance detail, semi-circular tympanum above entablature with ball finials.

Statement of Special Interest

The initials 'GG' on the S.E. tower are those George Gordon, son of Adam Gordon, Dean of Caithness. He bought Beldorney in 1545 and obtained Crown confirmation in 1550. He died September 1575. Bulloch believed that the initials referred to the 3rd laird and that the castle was built or completed in the 17th century soon after 1627 but the late gothic character of the detail makes so late a date very unlikely. The details suggest that it is earlier than Terpersie and if so it is the oldest surviving Z-plan house after Huntly.

Description	Description

Said to be 1523 tower house, additions 1610. Further extensive additions and alterations by William Robertson, 1840. Some further alterations and additions 1929-30. Mainly 2 storeys over raised basement (site slopes to W); irregular

S facing U-plan house with mainly 1840 E entrance front. Harled rubble, polished ashlar dressings, contrasting tooled ashlar margins.

Gabled E elevation with near centre round-headed recessed entrance porch in advanced gabled bay approached by flight of steps oversailing raised basement; 2 long windows at left lighting 1840 library. Irregular S garden front incorporates 3 builds; at W 1523 single bay tower house of 4 storeys and attic, with abutting drumtower stair turret corbelled out as small square caphouse at upper stage. Entrance in re-entrant angle with small flanking gun loops and arrow slits. Centre 1610, 3- storey, 2-bay block (remodelled 1840); outer 1840 advanced and gabled wing with large windows. Centre 1st floor windows barely break wallhead under gablets with centre armorial; re-set armorial panels in S and W elevations. Mainly 1840 multi-pane glazing with thick moulded wooden mullions (and transom to 1 window). 1840 angle bartizans; original rolled moulded copes to 16th and early 17th century stacks, copied 1840 margined end and ridge stacks. Slate roofs. 1929-30 addition bay to N and remodelling of rear service area.

INTERIOR: vaulted entrance lobby to 16th century tower house; single room in each floor served by wheel stair, some deep moulded cornices; pegged and numbered roof timbers in attic.

1840 HOUSE: entrance hall with public rooms left and right (sitting room and dining room). Dining room with re-used panelling (installed 1929); reeded detailing to wooden chimneypiece; bracketted ceiling cornice.

DRAWING ROOM: (former late 16th century 1st floor hall) carved wooden Adamesque overmantel to 1930's brick chimneypiece; fine late 18th century fielded panelled door and doorpiece with overdoor and acanthus detailing; plain 6-fielded panels to passage face. Ornate turned balusters, in sets of 3 with differing

patterns to staircase installed during 1929 alterations.

LIBRARY: simple moulded ceiling cornice; plain grey marble chimneypiece.

Statement of Special Interest

Home of Leslie's of Kininvie and Tullich from 1523-1943. Lands of Kininvie granted in 1521 by John, third Earl of Athole, to Alexander Leslie who died circa 1549 and whose effigy is in Mortlach Parish Church. Datestones of 1610 and 1726, the former resited after blocking of 1610 entrance in 1840.

Description

Description

T-plan church of mainly 19th and 20th century appearance, but incorporating medieval and post-medieval fabric. Restored and re-cast, A Marshall Mackenzie and Son and George, 1930-1. Harled, rubble N return gable, tooled ashlar dressings. Important monuments inside. Substantial (circa 1830?) N wing with 2 later 19th century pointed-headed entrances linked by continuous hoodmould; large pointed-headed 3-light window under hoodmould in gable, similar window in S gable. E gable lit by 3 re-worked medieval lancets; similar lancet in E bay of long S elevation. Centre projecting shallow gabled bay in S elevation flanked by paired square-lintelled later 18th century windows, each window with 2 mullioned lights and shutter hooks embedded in margins.

Rear gallery gabled dormer windows; varied glazing. Steeply pitched slate roof to main portion of church with circa 1700 skewputts; slated roofs elsewhere. Rear forestair to organ loft. Canted minister's porch in NE re-entrant angle (1930-1).

INTERIOR: entrance lobby in N wing housing collection 16th and 17th century tombstones; also celtic cross. Main body of church re-modelled 1931, orientated to raised chancel at E with 1931, pulpit and communion table. Recumbant effigy of circa 1550 in segmental mural recess (recess of 1931) at NE. Substantial 1694 mural monument (J Faid, Elgin) at S. With armorial, inscription and 2 sculptured busts. Recessed war memorial chapel in centre of S wall (in former organ bay); N and W galleries with plain panelled fronts, organ houses in W gallery. Some stained glass including circa 1918 memorial window in E gable by Douglas Strachan. Various 19th century mural tablets.

WATCH HOUSE: small square harl pointed watch house with canted W front. Centre door with flanking pointed-headed windows; tall rear renewed stack; piended local slate roof.

BURIAL GROUND: large irregular shaped walled burial ground sloping S and E to valley bottom. Coped rubble walls with spear-head railings fronting road. Pair carriage entrances at E and W with simple flanking capped piers. Interesting 17th, 18th, 19th and 20th century tombstones. Statement of Special Interest

Ecclesiastical building in use as such.

Listing does not include modern burial ground on E side of Dullan Water. Celtic cross in entrance lobby a Scheduled Monument. Recumbant knight in armour in N wall of chancel is effigy of Alexander Leslie of Kininvie, died circa 1549. Mural monument at S wall inscribed 'Mifecit Johannes Faid' (of Elgin) dedicated to Alexander Duff of Keithmore and Helen Grant his wife (tombstones in lobby). Inscription records happy marriage of 40 years and 'a flourishing family of liberally educated children'.

Listed A for medieval E end and monuments. Upgraded B to A 9.11.87

Description	<p>Circa 1897. Whisky distillery complex comprising malt barn, kiln and warehouses on large site next to river Dullan. Rubble with harl pointing, some tooled dressings, graded slate roofs to all buildings.</p> <p>2-storey, 14-bay former malt barn (now a store) with integrated taller 2-bay square-plan kiln with piended roof and pagoda cupola (known as No 2 Kiln and No 5 Store).</p> <p>Set of warehouses to south west of the site (at NJ 32753 39770, known as No 3 and No 4). Range of 6 gabled bays, 2 storey gables, single storey and attic to long elevations.</p> <p>Variety of glazing patterns in timber frames; former malt barn with boarded timber shutters below 3- or 6-pane fixed glazing. Metal bars to window openings of warehouses.</p> <p>The interiors were seen in 2013. The former malt barn warehouses have timber floors</p>

supported on cast iron columns and I-beams, and timber roof trusses. Kiln divided into ground and first floor. Water tanks at first floor of former malt barn.

The former malt barn, kiln and warehouses at Mortlach distillery are likely to date to the 1897 expansion of the distillery and together represent a good example of a large traditional whisky distillery at a time when the industry was expanding in Speyside. The buildings survive predominantly intact and retain original details such as gabled elevations, small openings with timber shutters, slate ogee roof to the kiln and internally the cast iron columns supporting timber floors. The traditional form and good quality construction of the buildings at Mortlach distillery are indicative of their original function. Whisky is intrinsically associated with Scotland and a distinctive architecture developed to house the distilling process. These buildings are an important part of Scotland's architectural heritage, particularly in Speyside which has almost half of the country's historic malt whisky distilleries. Mortlach is one of the earliest distilleries founded in Speyside and is still in operation.

Mortlach distillery was founded in 1823 and was the first distillery in Dufftown. The same year an Excise Act was passed, which cut the duty on spirits produced, allowing a rebate on malt tax and opening the export trade to all distillers. The Excise Act had a dramatic effect on the industry with the licensing of over 200 new distilleries within two years. Though many of these new distilleries soon disappeared, the survivors, like Mortlach, formed the nucleus today's Scotch whisky industry.

The footprint of the former maltings and kiln and warehouses are first evident on the 2nd edition Ordnance Survey Map (published 1902). The distillery was expanded in 1897 which included the doubling of the stills from 3 to 6 (an unusually large number for the time), and a railway siding was constructed so the site could utilise the railway network. It is likely that the former maltings and kiln and warehouses were constructed as part of this expansion. Additional warehouses adjoining or linking to the extant warehouses are also evident on this map, but were demolished in the 1990s. The central core of the site has been comprehensively altered so that the 1897 warehouses and the kiln and malt barn are the only intact historic buildings remaining.

As noted by Moss, the industry boomed in the 1890s to satisfy ever growing consumption. Scotland was regularly consuming over six million gallons a year and exporting ten million. To meet this demand new distilleries were constructed and existing distilleries were rebuilt on a larger scale, such as Mortlach. Many of these were in Moray and Banffshire due to the popularity of the fruity Speyside whiskies. Distilling remains a major industry in Scotland with malt whisky exported worldwide.

Mortlach distillery was the first distillery in Dufftown and forms a significant part of the town's social and industrial history. It remained the only distillery in Dufftown until Glenfiddich distillery was founded in 1887 by William Grant, a former manager of Mortlach. In 2013 Dufftown had seven working distilleries and one disused.

The 1960s additions to the north elevation of warehouses 3 and 4 were not considered of special architectural or historic interest at the time of the listing review (2014).

Description	The Battle of Glenlivet is significant as an example of the ongoing struggles within Scotland between Presbyterians and Catholics, which colours much of Scotland's history after the

Reformation, and the relentless efforts of the kirk to eliminate the Catholic faith from the country. It also highlights in microcosm the complex nature of the relationships between Catholic and Protestant powers across Europe at this time, and the labyrinthine political manoeuvrings which occurred as a result. It is also significant as the first battle in the Highlands of Scotland where artillery appears to have played a part in the action, and archaeological evidence of this may well survive on the battlefield.

The Battle of Glenlivet (deriving from the Gaelic - Glen [glean] - a deep narrow mountain valley of the slippery smooth place [liobhaite]) was considered at the time to be a religious battle between the Catholic forces of George Gordon, 1st Marquess of Huntly, and Frances Hay, 9th Earl of Erroll, and the Protestant army of Archibald Campbell, 7th Earl of Argyll. Following a protracted period of intrigue, during which time Huntly was, on several occasions, implicated in plotting with the Catholic Spanish against James V, the Earls of Argyll and Atholl were commissioned with the Lieutenancy of the North to deal with traitorous Jesuits returned from abroad accompanied with strangers and supplied with money to 'stir up public weare'.

This programme of suppression escalated with a punitive campaign, led by Argyll, against Huntly and other rebel lords and clan allies. The two sides encountered one another high on a hillside near Ben Rinnes, where Huntly had effectively laid an ambush for Argyll as he climbed the hill. In the ensuing battle Huntly used his horse to great effect in the confined space of a pass and entirely routed Argyll's troops. According to one tradition a weeping Argyll was led from the field. Rather than risk going into battle against the king Huntly threw himself on the king's mercy and went into temporary exile. He was a consummate survivor, however, and it was not long before he was back in the country and in the king's favour.

Description	The much degraded remains of what could be a structure.

Round-house, recorded during a topographical survey of Craig Dorney by the University of Aberdeen in 2023 (NJ43NW0016). It measures up to 16 m in diameter, with the partial remains of its defining wall surviving on the eastern side to 0.2 m high and 2 m wide. Walkover survey by AOC in 2021 ahead of a proposed windfarm (NJ33NE0048) had recorded degraded remains of a possible structure at this location (NJ4023835500), and remains identified as the possible chamber of a denuded cairn (NJ4023335485).

Description	Remains of a circular feature, possibly an enclosure or round-house, recorded during a topographical survey of Craig Dorney by the University of Aberdeen in 2023 (NJ43NW0016). It consists of a very faint circular feature measuring approximately 24 m in diameter, comprised of an outer ditch measuring 2 m wide, surrounding a central feature comprising a narrow 13.5 m diameter cut feature. This could represent a burial enclosure, or a large round-house defined by an enclosure, or a large drip-gully.

Description	Two round-houses, recorded during a topographical survey of Craig Dorney by the University of Aberdeen in 2023 (NJ43NW0016). A figure-of-eight layout of two round-houses. The northeastern one is the larger of the conjoined structures, measuring 13.1 m in diameter and defined on its eastern side by a 1.8 m wide wall that survives to a height of 0.1 m. Attached on the southwestern side is another round-house measuring 11.8 m in diameter, with a defining wall measuring 2.5 m wide and up to 0.18 m high. A notable break at the southern perimeter of its wall, measuring 1.7 m wide, likely represents an original entrance to the structure.

Asset Number	245
Asset Name	Craig Dorney
Type of Site	Round house
NRHE Number	
HER Number	NJ43NW0153
Status	Non-designated
Easting	340754
Northing	835943
Parish	
Council	Aberdeenshire
Description	Remains of a circular feature, possibly an enclosure or round-house, recorded during a topographical survey of Craig Dorney by the University of Aberdeen in 2023 (NJ43NW0016). It consists of a very faint circular feature measuring approximately 24 m in diameter, comprised of an outer ditch measuring 2 m wide, surrounding a central feature comprising a narrow 13.5 m diameter cut feature. This could represent a burial enclosure, or a large round-house defined by an enclosure, or a large drip-gully.

Description	Site of a small rectangular building with enclosure, depicted on the 1st edition OS map. Not shown on the 2nd edition OS map.

Asset Number	252
Asset Name	Greenloan
Type of Site	cairn, site of
NRHE Number	
HER Number	NJ33SE0003
Status	Non-designated
Easting	339800
Northing	833900
Parish	
Council	Moray
Description	Site of a cairn. Eleven cup-marked stones formed this cairn, which later field investigation failed to locate. Six small cairns at NJ 3928 3399 are probably field clearance heaps associated with a derelict croft. Arrowheads, spearhead and scrapers have been found in area. One stone is in the NMS and one in the British Museum. The site was visited in May 2019 by Scotland's Rock Art Project, but no evidence was found of the cup-marked stones in the area around Greenloan Farm.
