

Proposed Turbine Locations

Panorama with Wireline (90° HFOV)

Photomontage with Wireline (53.5° HFOV)

Existing View

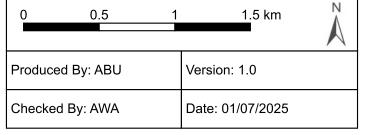

This viewpoint is located at Dunoon Castle and looks out from the castle mound and ruins. The view to the north-west looks out over the town to the forestry and moorland on the hillside beyond. In other directions the views are open and panoramic, looking out over the Firth of Clyde to villages and hills beyond. A number of small wind turbines can be seen set within the sloping farmland to the southeast.

Predicted Change

The proposed turbines would be seen along the nearby open skyline to the north-west, above the forestry. Only 3 of the turbines would be mostly visible, with the remainder seen as blades, or hub and blades. Two of the aviation lights would be openly visible, seen above the nearby streetlights and lights in nearby buildings, the remaining lights would be screened by the hillside.

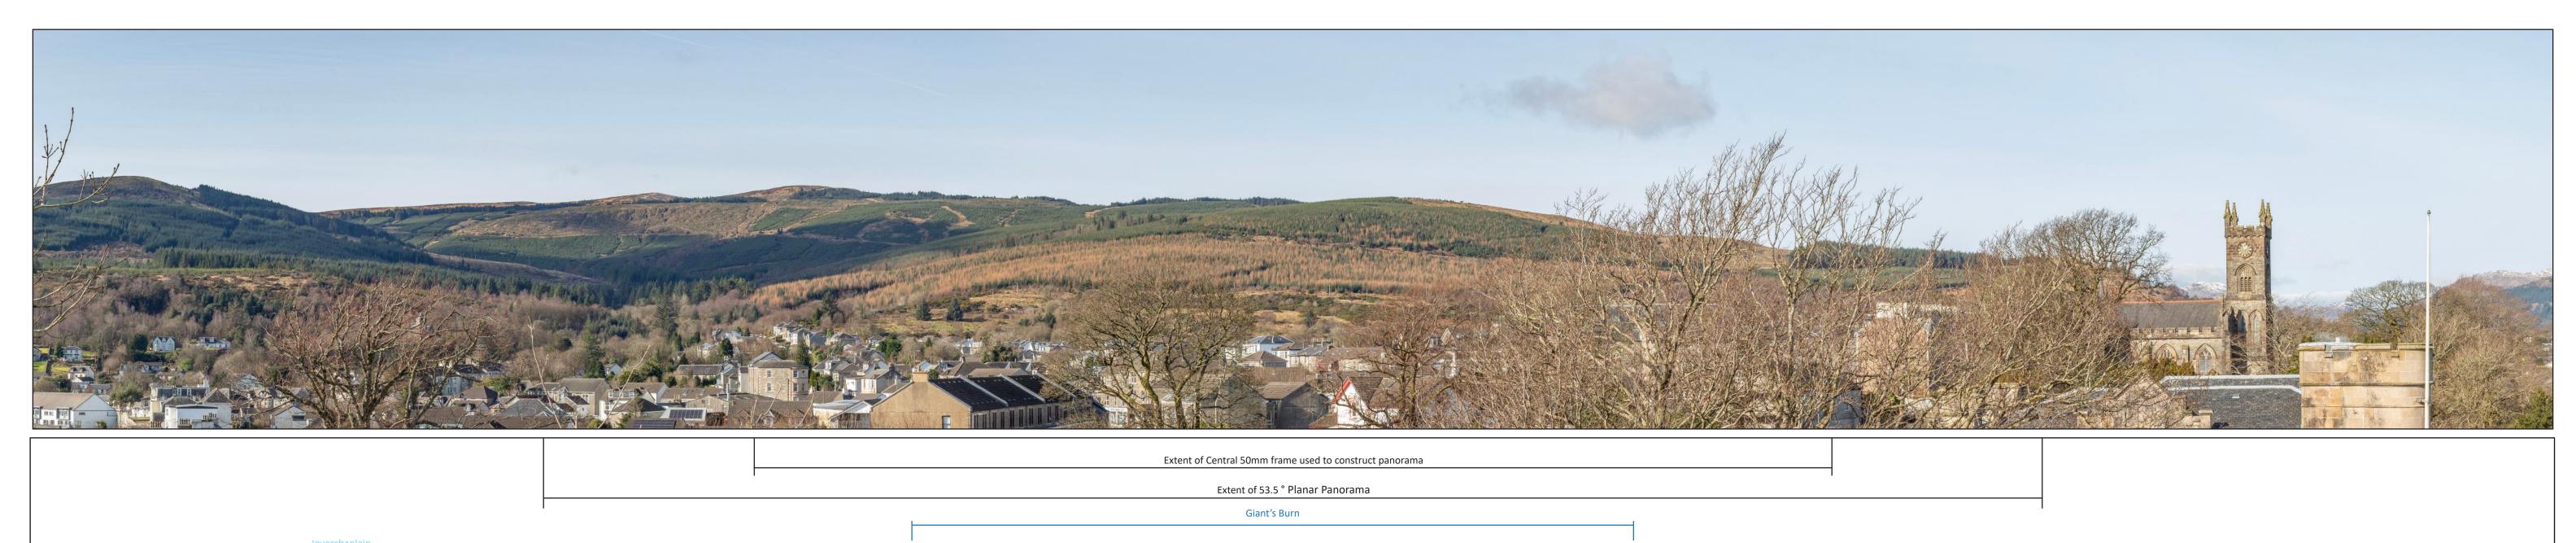

Cumulative

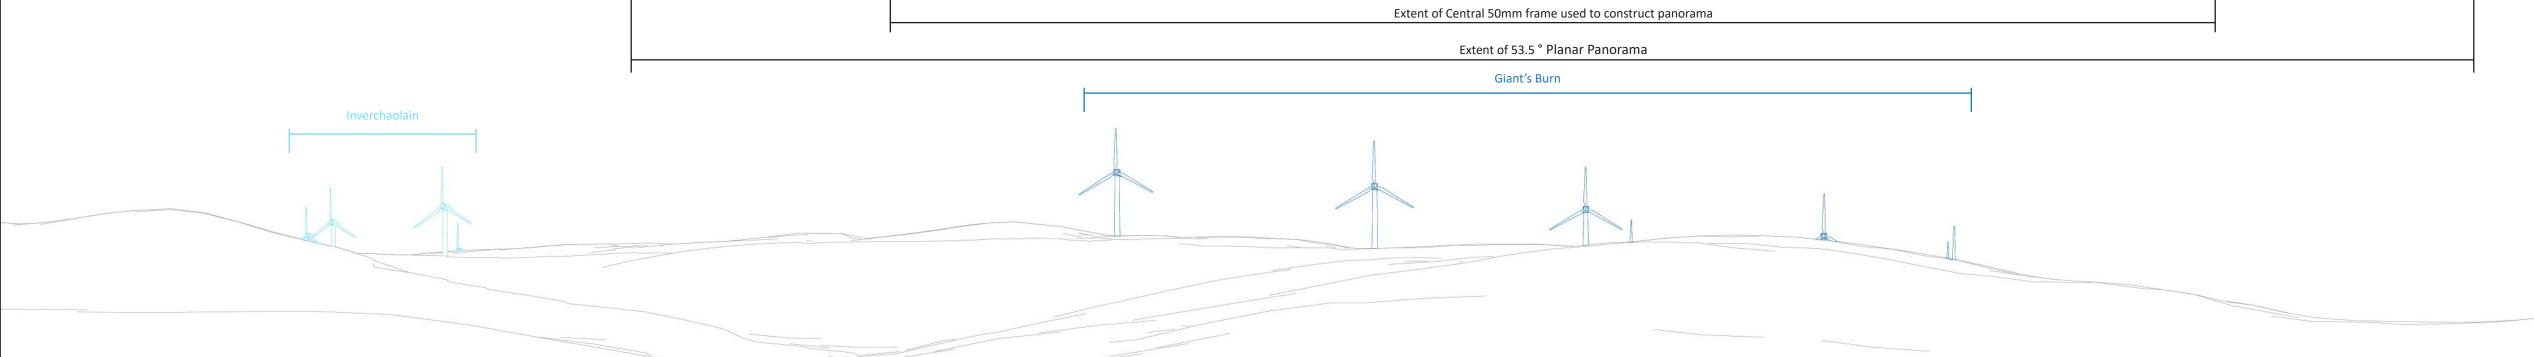

Some of the turbines at Inverchaolain wind farm may be visible from this viewpoint, depending on the final design of that project. Crosbie wind farm would be visible in the distance to the south and Vale of Leven wind farm would be visible in the distance as blades above housing and woodland in Gourock to the east.
