

- Proposed Turbine Locations
- Panorama with Wireline (90° HFOV)
- Photomontage with Wireline (53.5° HFOV)

Existing View

This viewpoint looks out from the A815 near the garage close to the head of Holy Loch. Hills and trees contain the view looking in most directions, with the only longer views looking along the Glen to the south-east, though even these views are curtailed by hedges and trees bounding the flat pasture seen in this direction. Inverclyde windfarm is visible in theory to the south-east, but mostly screened by nearby trees – even in winter.

Predicted Change

The proposed turbines would be seen atop the nearby hills to the south. All of the turbines would be seen with the bases of towers screened by the hill to a greater or lesser degree, and all three aviation lights would be visible at night.

Cumulative

Some of the turbines at Inverchaolain wind farm may be visible from this viewpoint, depending on the final design of that project.
