

- Panorama with Wireline (90° HFOV)
- Photomontage with Wireline (53.5° HFOV)

Existing View

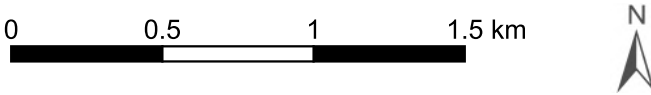

This view is taken from a short track which connects the car park to the gardens at Benmore. Trees and shrubs along the track, river or in the gardens screen views in most directions, but there are more open views across the nearby field to the south-west to steep forested hills beyond, and in places it is possible to gain a glimpse such as that shown by this viewpoints where there is a longer view to the south.

Predicted Change

The proposed turbines would be seen as a closely spaced cluster, through the gap in the surrounding vegetation and hills, partly screened by nearby tree branches. This location is not likely to be visited at night, or in winter months when the gardens are closed.

Cumulative

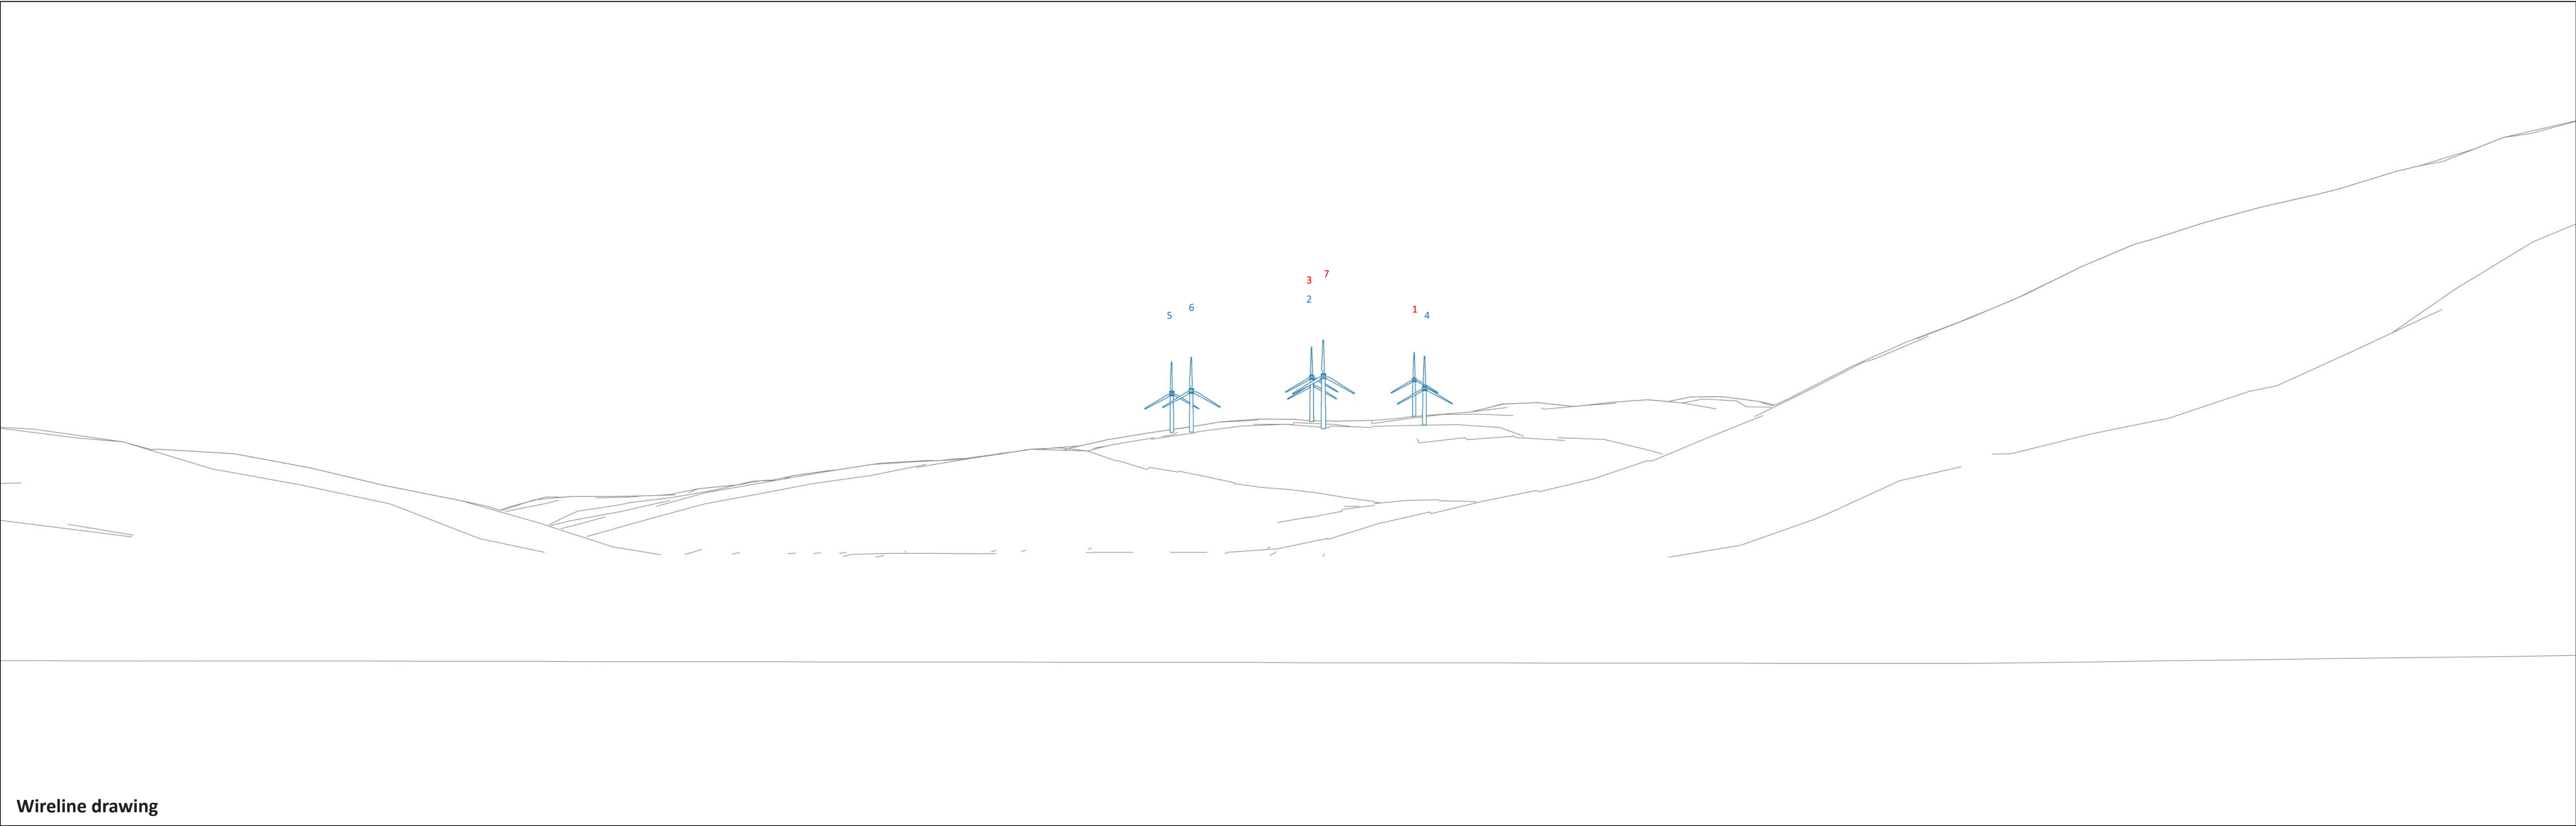

Some of the turbines at Inverchaolain wind farm may be visible from this viewpoint, depending on the final design of that project.
