

- Panorama with Wireline (90° HFOV)
- Photomontage with Wireline (53.5° HFOV)

**Existing View**  
This view is taken from the B836 through Glen Lean. Forested hills rise to enclose the glen to both sides, and more open hills are seen enclosing the ends of the glen. A house is seen across the road nearby and the grass bank of the reservoir dam can be seen along the glen to the north-west.

**Predicted Change**  
The proposed turbines would be seen on the skyline looking along the glen to the south-east, with the towers partly screened by the hillside, and some of the turbines further screened by forestry on the nearby hillsides. Two of the aviation lights would be visible at night.

**Cumulative**  
No wind farms in planning or scoping stages would be visible from this location.
