

Panorama with Wireline (90° HFOV)

Photomontage with Wireline (53.5° HFOV)

Existing View

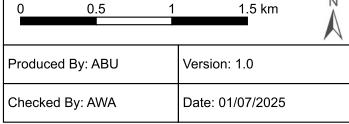

This view is taken from a small beach on Loch Eck, where parking is provided. Views are naturally directed south along the loch which is enclosed by steep wooded slopes. Trees around the parking area contain northward views.

Predicted Change

The proposed turbines would be seen on the distant skyline, beyond the end of the loch. They would form a closely spaced cluster with two of the turbines partly screened by trees on the hillsides around the loch. All 3 of the aviation lights would be visible at night if visitors choose to remain at this location after dusk, and would be incongruous features seen from this otherwise dark place.

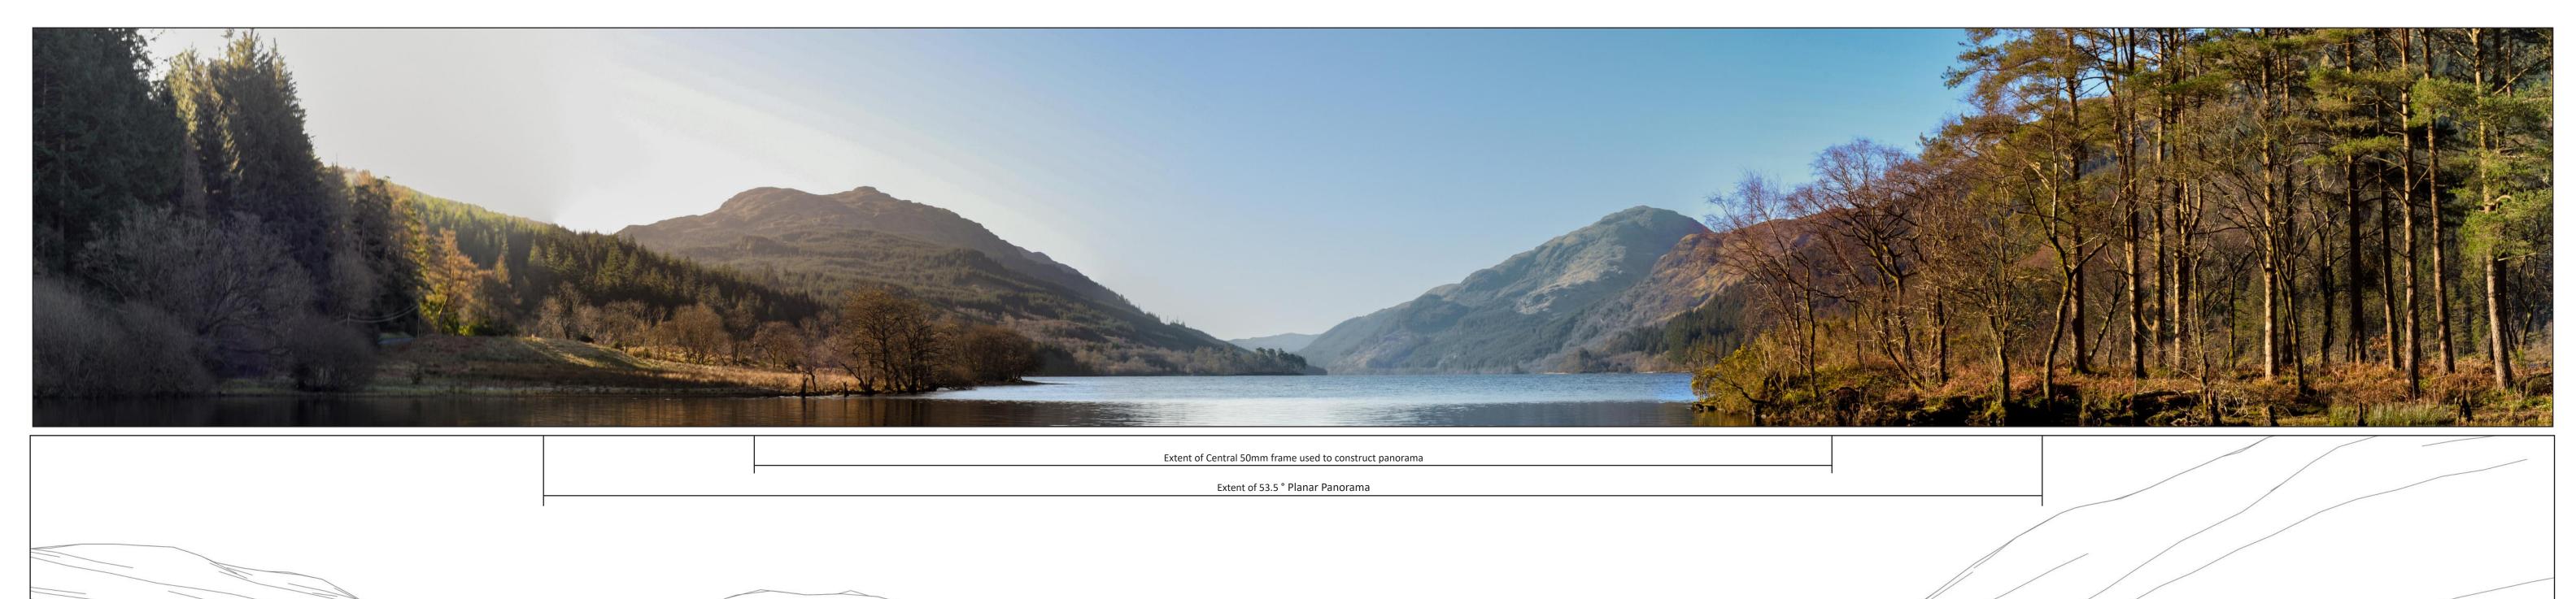

Cumulative

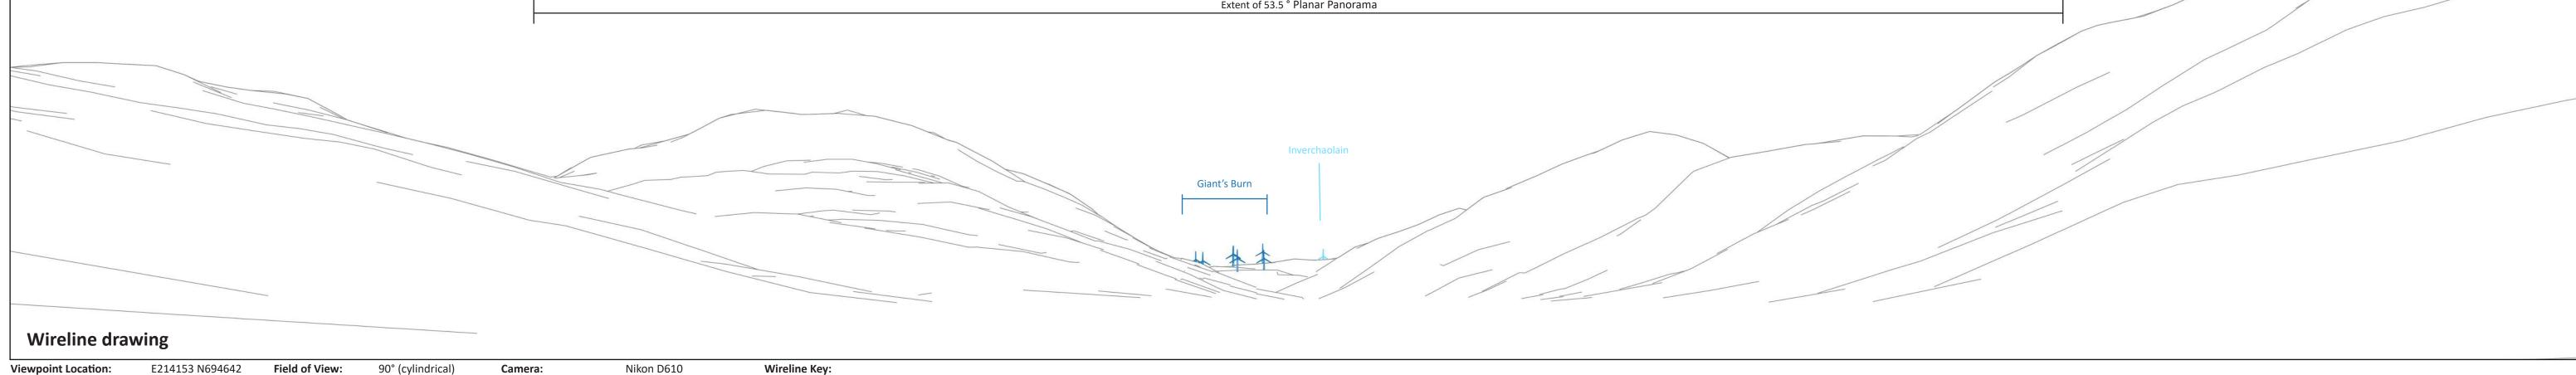

A small number of the turbines at Inverchaolain wind farm may be visible from this viewpoint, to the right of the Proposed Development, depending on the final design of that project.
