

- Panorama with Wireline (90° HFOV)
- Photomontage with Wireline (53.5° HFOV)

Existing View

This view is taken from an open space on the waterfront in Helensburgh. Buildings in the town screen views to the east and north and there are open views out over the Firth of Clyde to the south and west. Coastal settlement and the port at Greenock can be seen along the southern shore, with Inverclyde wind farm and the smaller turbines at High Mathernock and Priestside on the skyline above. Rosneath peninsula can be seen to the north-west, extending in front of the more distant skyline which includes the Site.

Predicted Change

The Proposed Development would be partly visible above the skyline formed by Rosneath Peninsula and beyond the large communications mast. Only two of the turbines would be fully visible, with the others partly or largely screened by the landform of the peninsula. At night two of the turbine lights would be visible, adding to the panorama of lights seen looking across the water, including bright lights at the port and red lights on the port cranes.

Cumulative

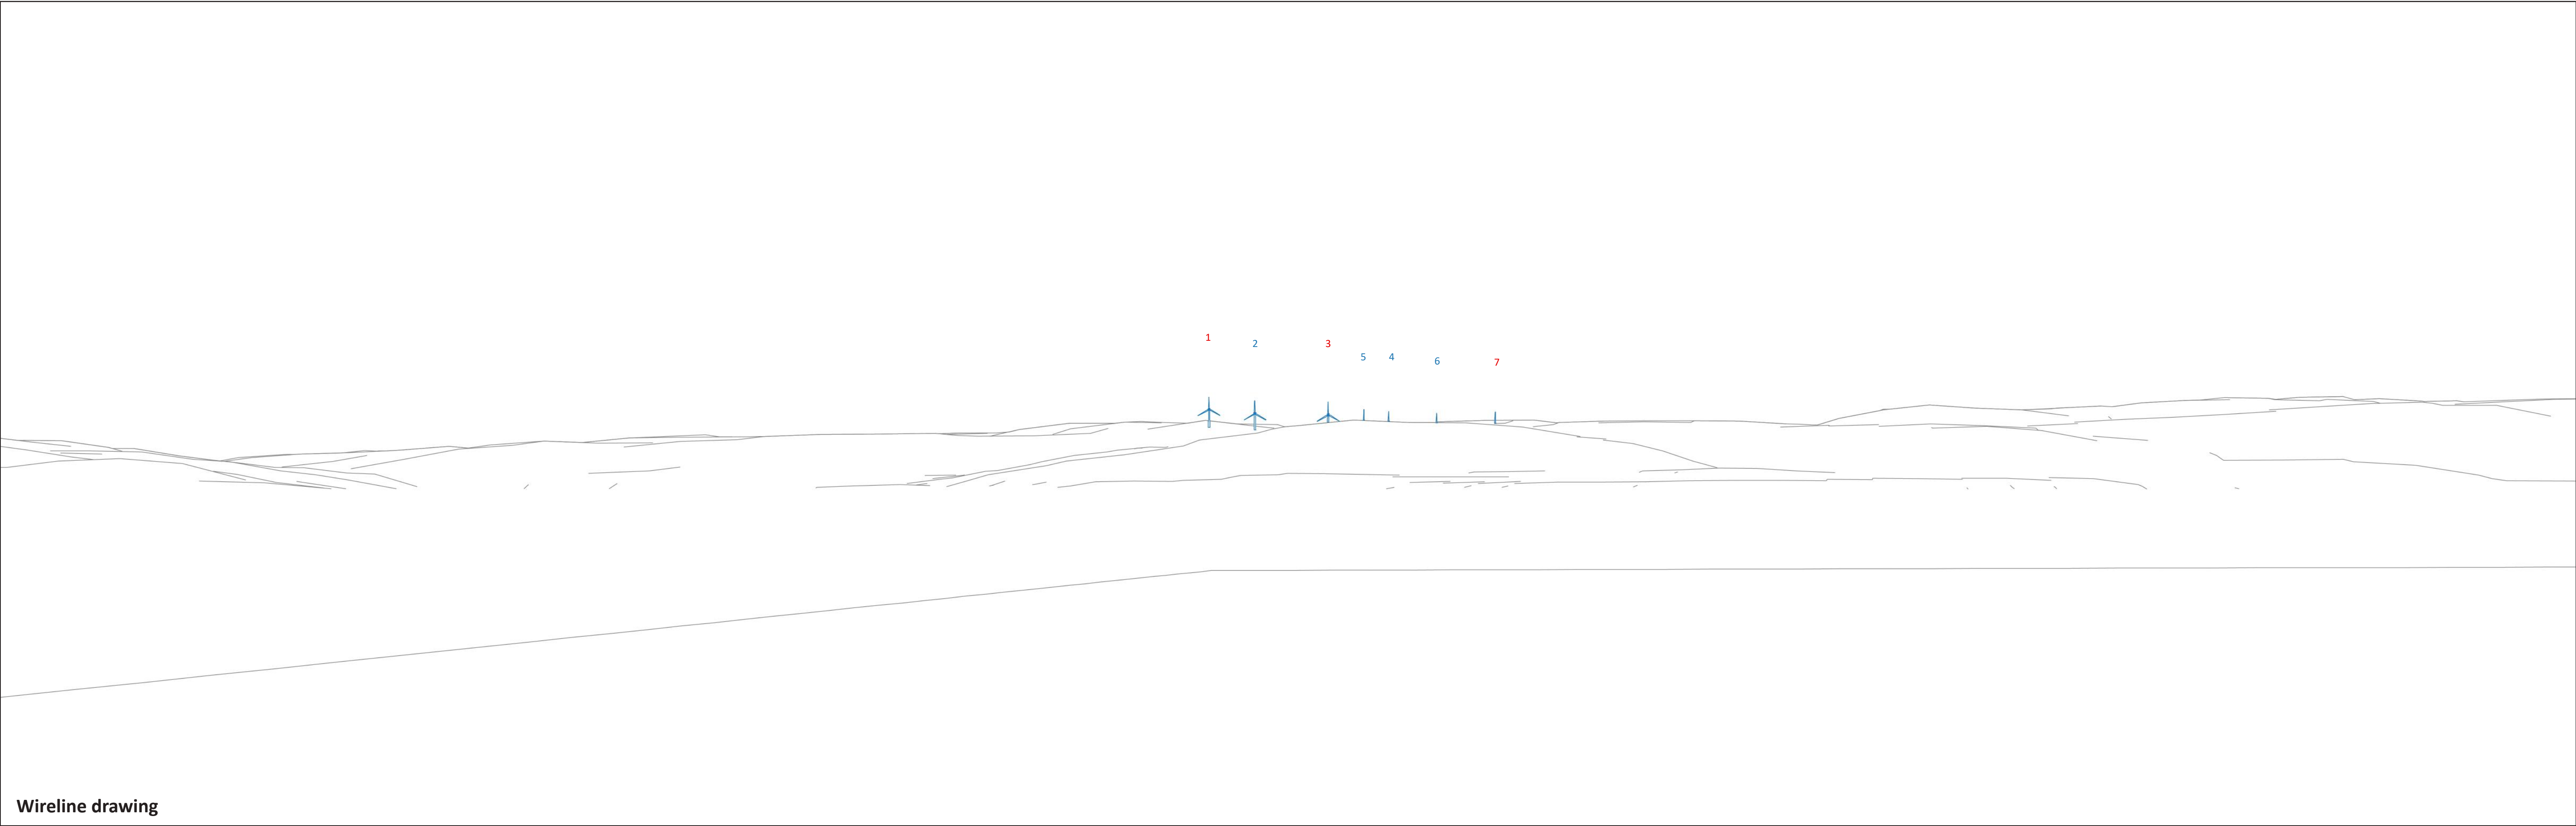

It is likely that all or most of the turbines at Inverchaolain wind farm (depending on its final design) may be visible from this viewpoint, seen to the left of the Proposed Development.
