

- Panorama with Wireline (90° HFOV)
- Photomontage with Wireline (53.5° HFOV)

**Existing View**

This view looks out from the ferry port. Buildings on the far side of the coast road and rising ground and trees beyond form the views looking inland. Looking out over and along the Firth of Clyde to the north and west, coastal settlement can be seen backed by partly forested hills. The view north and northwest includes a more interesting panorama of distinctive layered hills, whilst the landform of the Site to the west appears smoother by comparison.

**Predicted Change**

The Proposed Development would be seen on the open skyline above the forestry beyond Dunoon, with the rightmost turbine bases being set in front of a more distant hill. At night all three of the turbine lights would be visible, in the context of nearby streetlights, and lights on the ferries and at the ferry terminal, as well as dimmer lights seen looking towards Dunoon.

**Cumulative**

It is likely that all or most of the turbines at Inverchaolain wind farm (depending on its final design) may be visible from this viewpoint, seen to the left of the Proposed Development.
