- Panorama with Wireline (90° HFOV)
- Photomontage with Wireline (53.5° HFOV)

Existing View
This view looks out from a hilltop viewpoint on Great Cumbrae which offers panoramic views along the Firth of Clyde to hills beyond to the north; across to the mainland to the north-east and east where operational wind farms are visible along the skyline, and out to the Isle of Bute, Arran and the Kintyre Peninsula to the west and south-west.

Predicted Change
The proposed turbines would be seen as a closely grouped cluster on the open skyline to the north, above the forestry on hills above Dunoon. They would be seen a different direction to those at Ardrossan wind farm, but of a similar apparent scale – smaller than the nearer turbines at Millour Hill and Kelburn Estate wind farms. At night two of the aviation lights would be visible in the context of other lights seen in coastal settlements.

Cumulative
Crosbie wind farm would be visible to the southeast and would appear markedly larger and closer than operational wind farms. 11-12 aviation lights may be visible on Crosbie wind farm at night. It is likely that all or most of the turbines at Inverchaolain wind farm (depending on its final design) may be visible from this viewpoint, seen to the left of the Proposed Development.
