

- Panorama with Wireline (90° HFOV)
- Photomontage with Wireline (53.5° HFOV)

Existing View
This viewpoint is located on a mountain top to the west of Loch Eck. From the summit there are panoramic views available in all directions. These views comprise hill and mountain tops in all directions with glimpses of water bodies between. A'Cruach and Cruach Mhor wind farms can be seen set among the hills to the west. More distant wind farms on the skyline to the south-east are less readily seen.

Predicted Change
The Proposed Development would be seen on lower hills to the south, between the Firth of Clyde and Holy Loch. The turbines would be markedly larger in the view than the operational wind farms, but still a relatively small component in this wide panorama. This viewpoint is not likely to be visited at night.

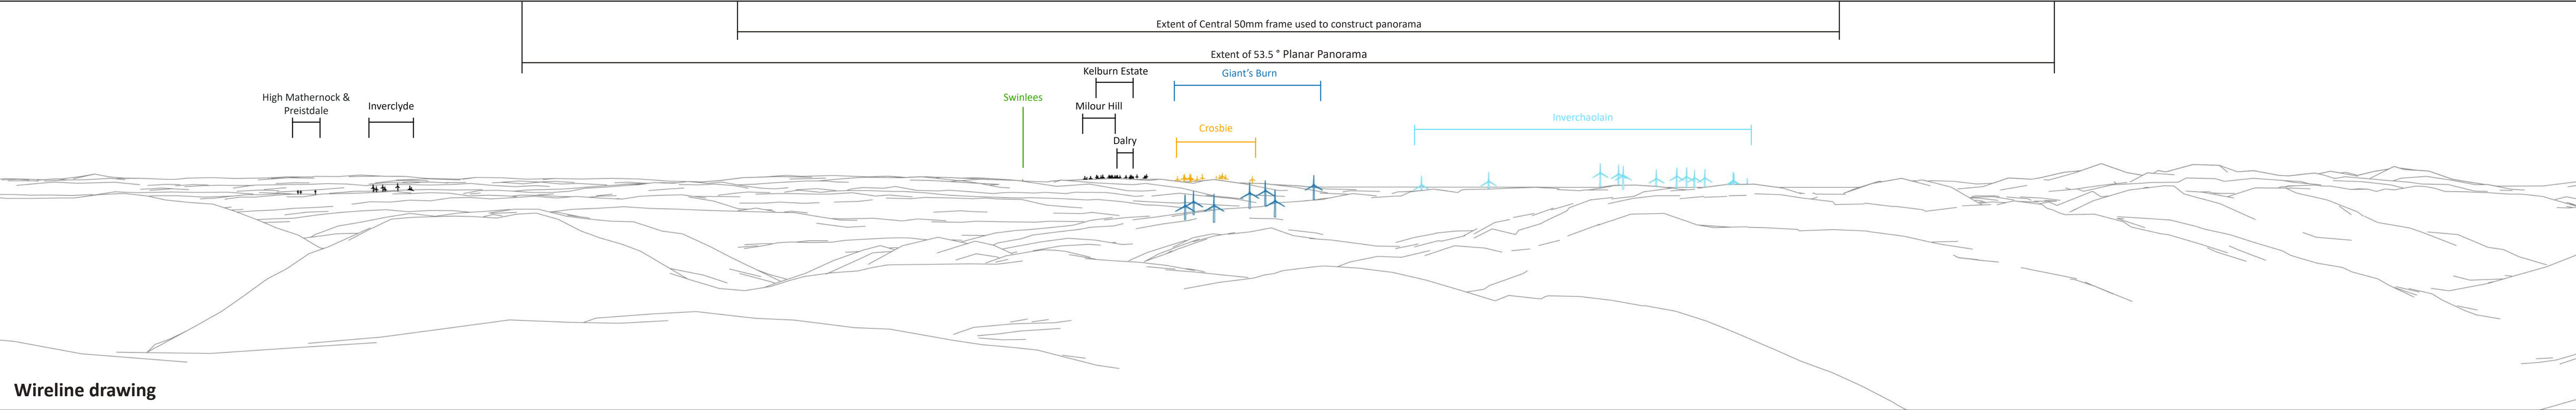

Cumulative
Vale of Leven wind farm would be visible in the distance to the east, and Crosbie wind farm to the south. Neither is likely to be particularly noticeable. It is likely that all or most of the turbines at Inverchaolain wind farm (depending on its final design) may be visible from this viewpoint, seen extending to the right the Proposed Development.
