Giant's Burn Wind Farm – Request for Scoping Opinion under The Electricity Works (Environmental Impact Assessment (Scotland) Regulations 2017.

Dear sir/madam,

The Applicant, GB Wind Farm Ltd intends to submit an application for consent under Section 36 of the Electricity Act 1989, for the construction, operation and decommissioning the proposed Giant's Burn Wind Farm (the Proposed Development), approximately 2.1km to the north-west of Dunoon and 1.5km south-west of Sandbank, Argyll and Bute.

The Proposed Development will require an Environmental Impact Assessment (EIA) under the Electricity Works (EIA) (Scotland) Regulations 2017.

On behalf of the Applicant, Green Cat Renewables (The Agent) requests a Scoping Opinion under Regulation 12 of the EIA Regulations in respect of the forthcoming application. This request is accompanied by a Scoping Report which provides:

- A plan showing the location of the Proposed Development;
- A brief description of the nature and purpose of the development; and
- An explanation of the likely significant effects of the Proposed Development on the environment.

We trust that this letter and accompanying Scoping Report will allow Scottish Ministers to provide a Scoping Opinion.

Kind regards,

Corey Simpson
