

GIANT'S BURN WIND FARM

VIEWPOINTS

31 March - 21 April 2025

Viewpoints

Six visualisations from local viewpoints have been provided to demonstrate how the proposed wind farm could look based on the current proposal of up to 7 turbines up to 200m to blade tip height. These illustrations provide a good representation of the current plans from several local viewpoints.*

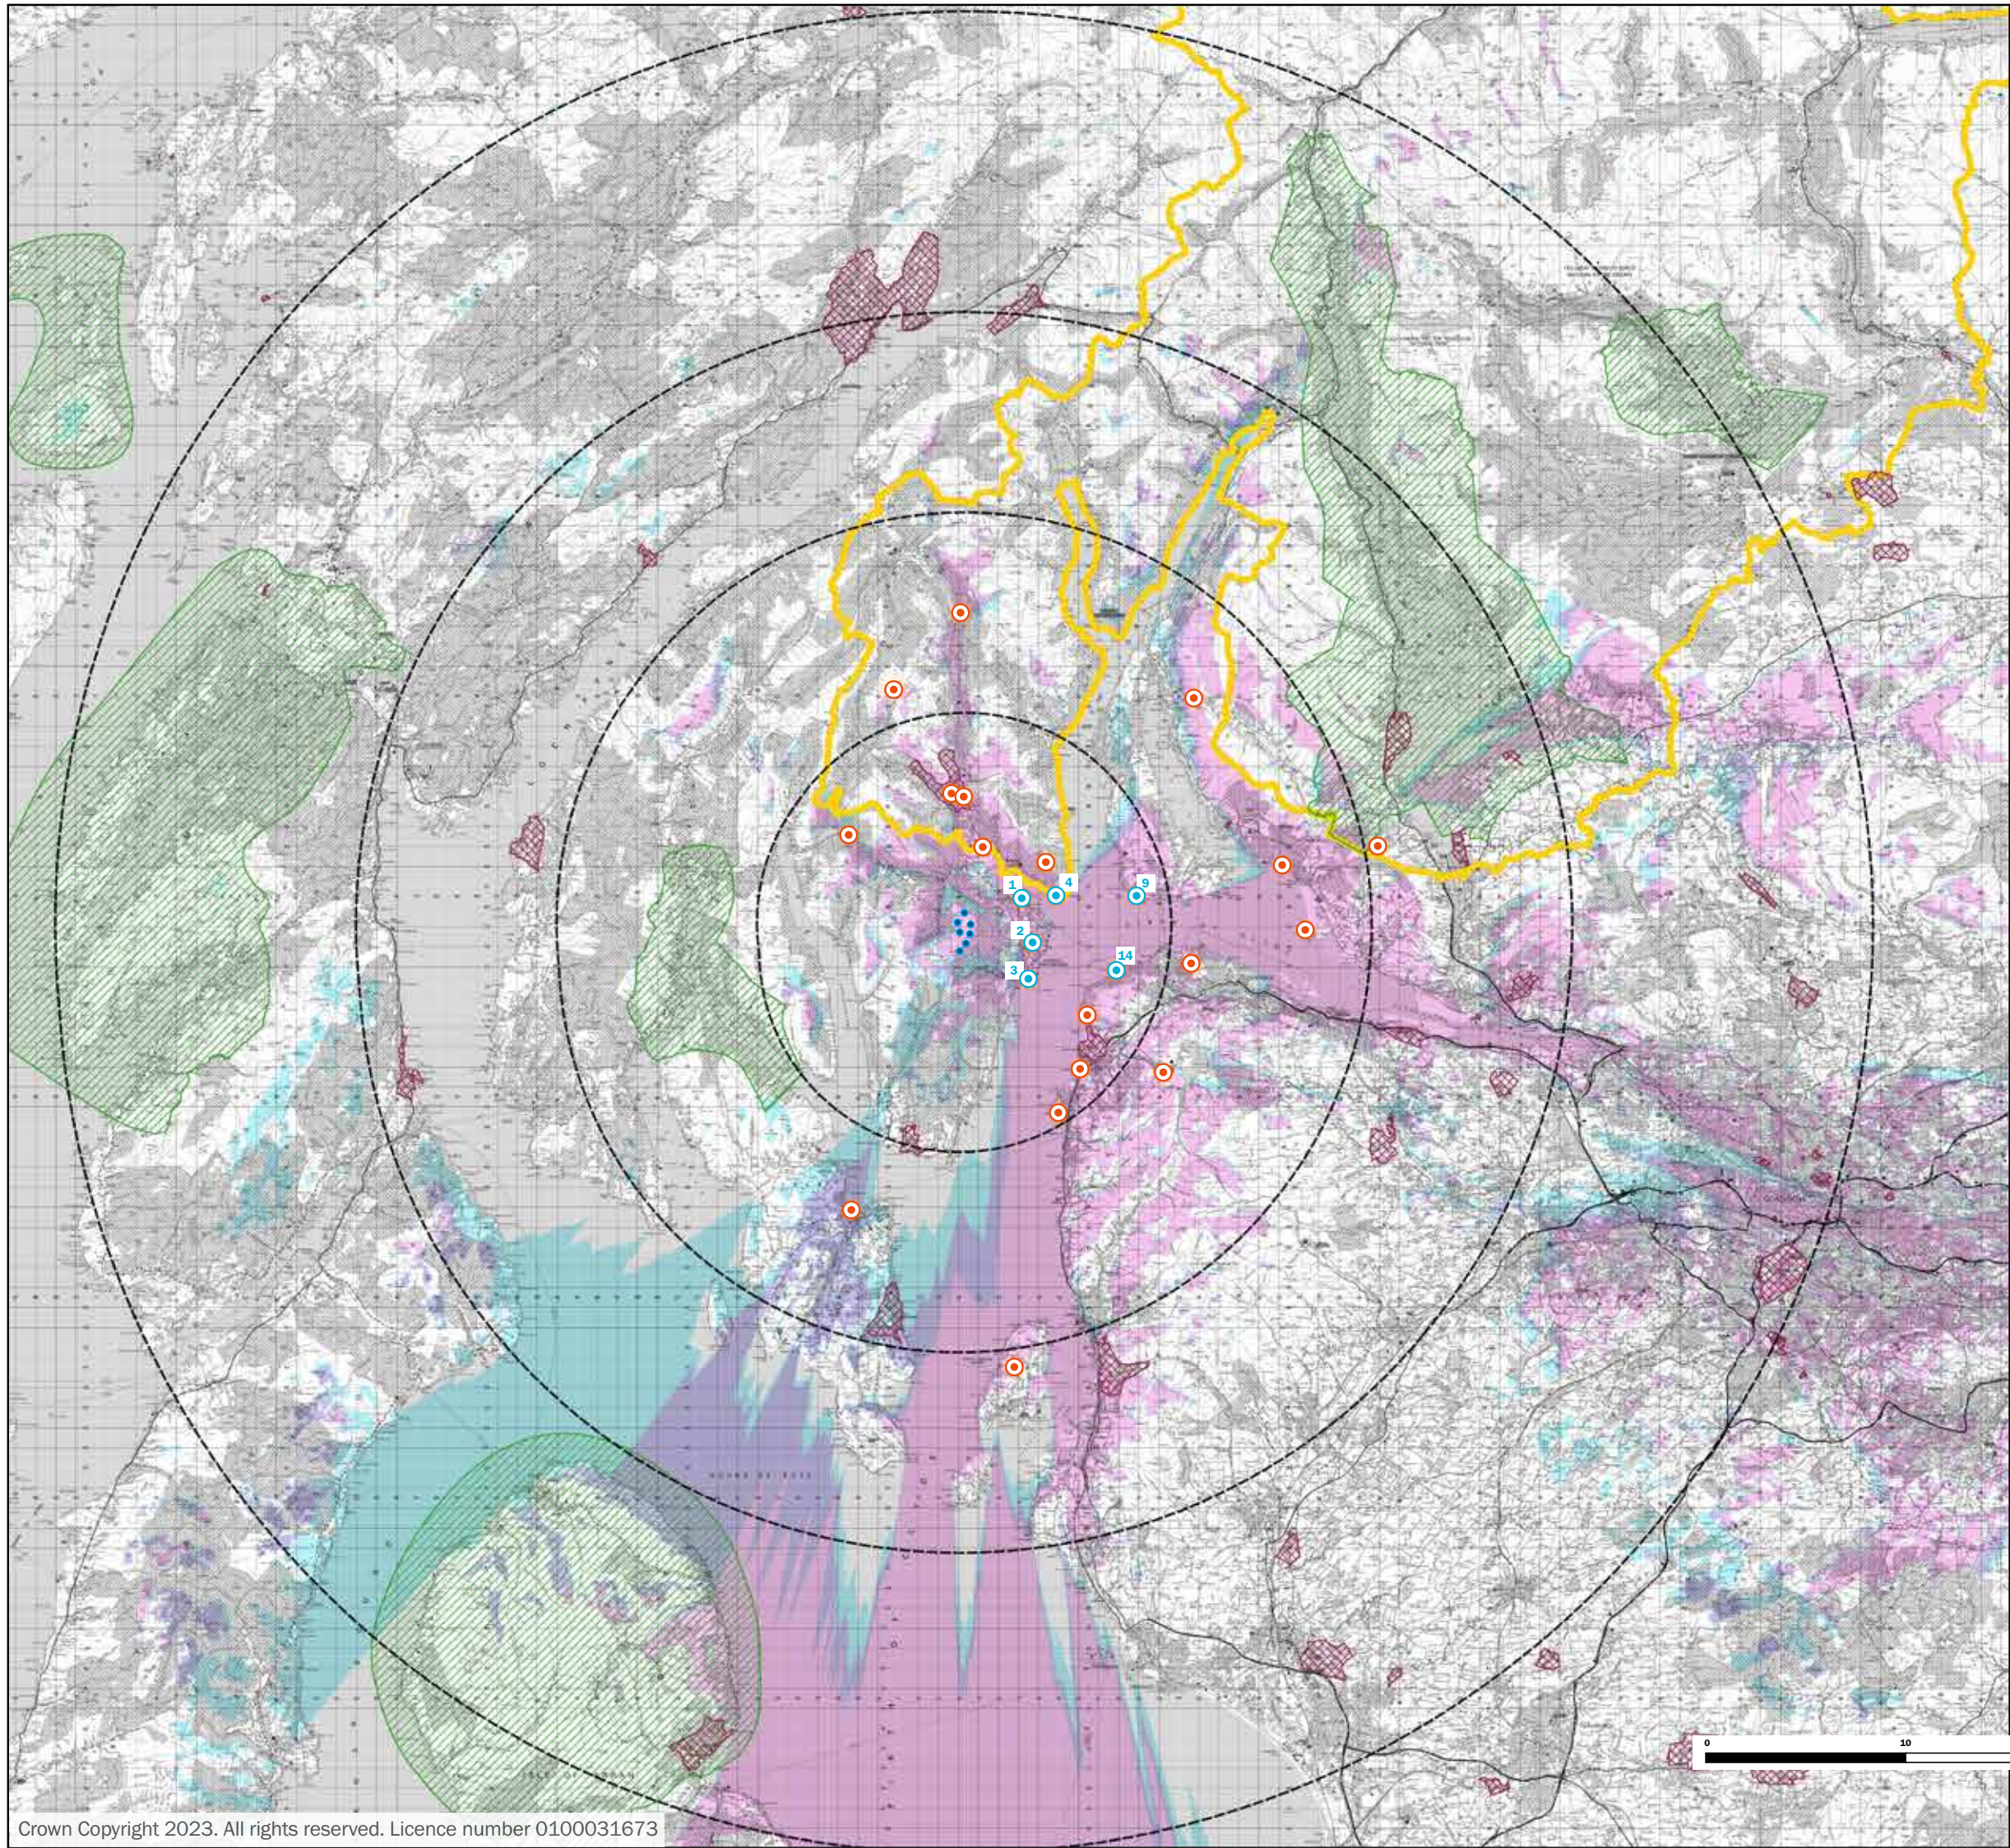

We have discussed with Argyll & Bute and Inverclyde Councils and NatureScot. As the proposed turbines are over 150m and will require aviation lighting, night time viewpoints have also been discussed.

At this exhibition 6 visualisations from local viewpoints are available to demonstrate how the current proposal could look.

A full set of visualisations for each agreed viewpoint, which includes a baseline photo, a wireline and a photomontage of how the wind farm may look, will be provided as part of the Environmental Impact Assessment Report (EIAR) submitted as part of the application for the wind farm.

* These visualisations are based on photographs taken recently. For the EIAR, photographs will be taken during clear weather conditions as per requirements.

Zone of Theoretical Visibility (ZTV)

Key

- Proposed Turbine – 200m tip
- Distance from site (10, 20, 30, 45km)
- Loch Lomond and the Trossachs National Park
- National Scenic Areas
- Gardens and Designed Landscapes

No. of Turbines Theoretically Visible

- 1 - 3 turbines
- 4 - 5 turbines
- 6 - 7 turbines

Photomontage provided

- 1 Lazaretto Point Ardnadam
- 2 Dunoon Ardenslate Road
- 3 Dunoon Castle
- 4 Strone Pier
- 9 Kilcreggan
- 14 McInroy's Point Gourrock

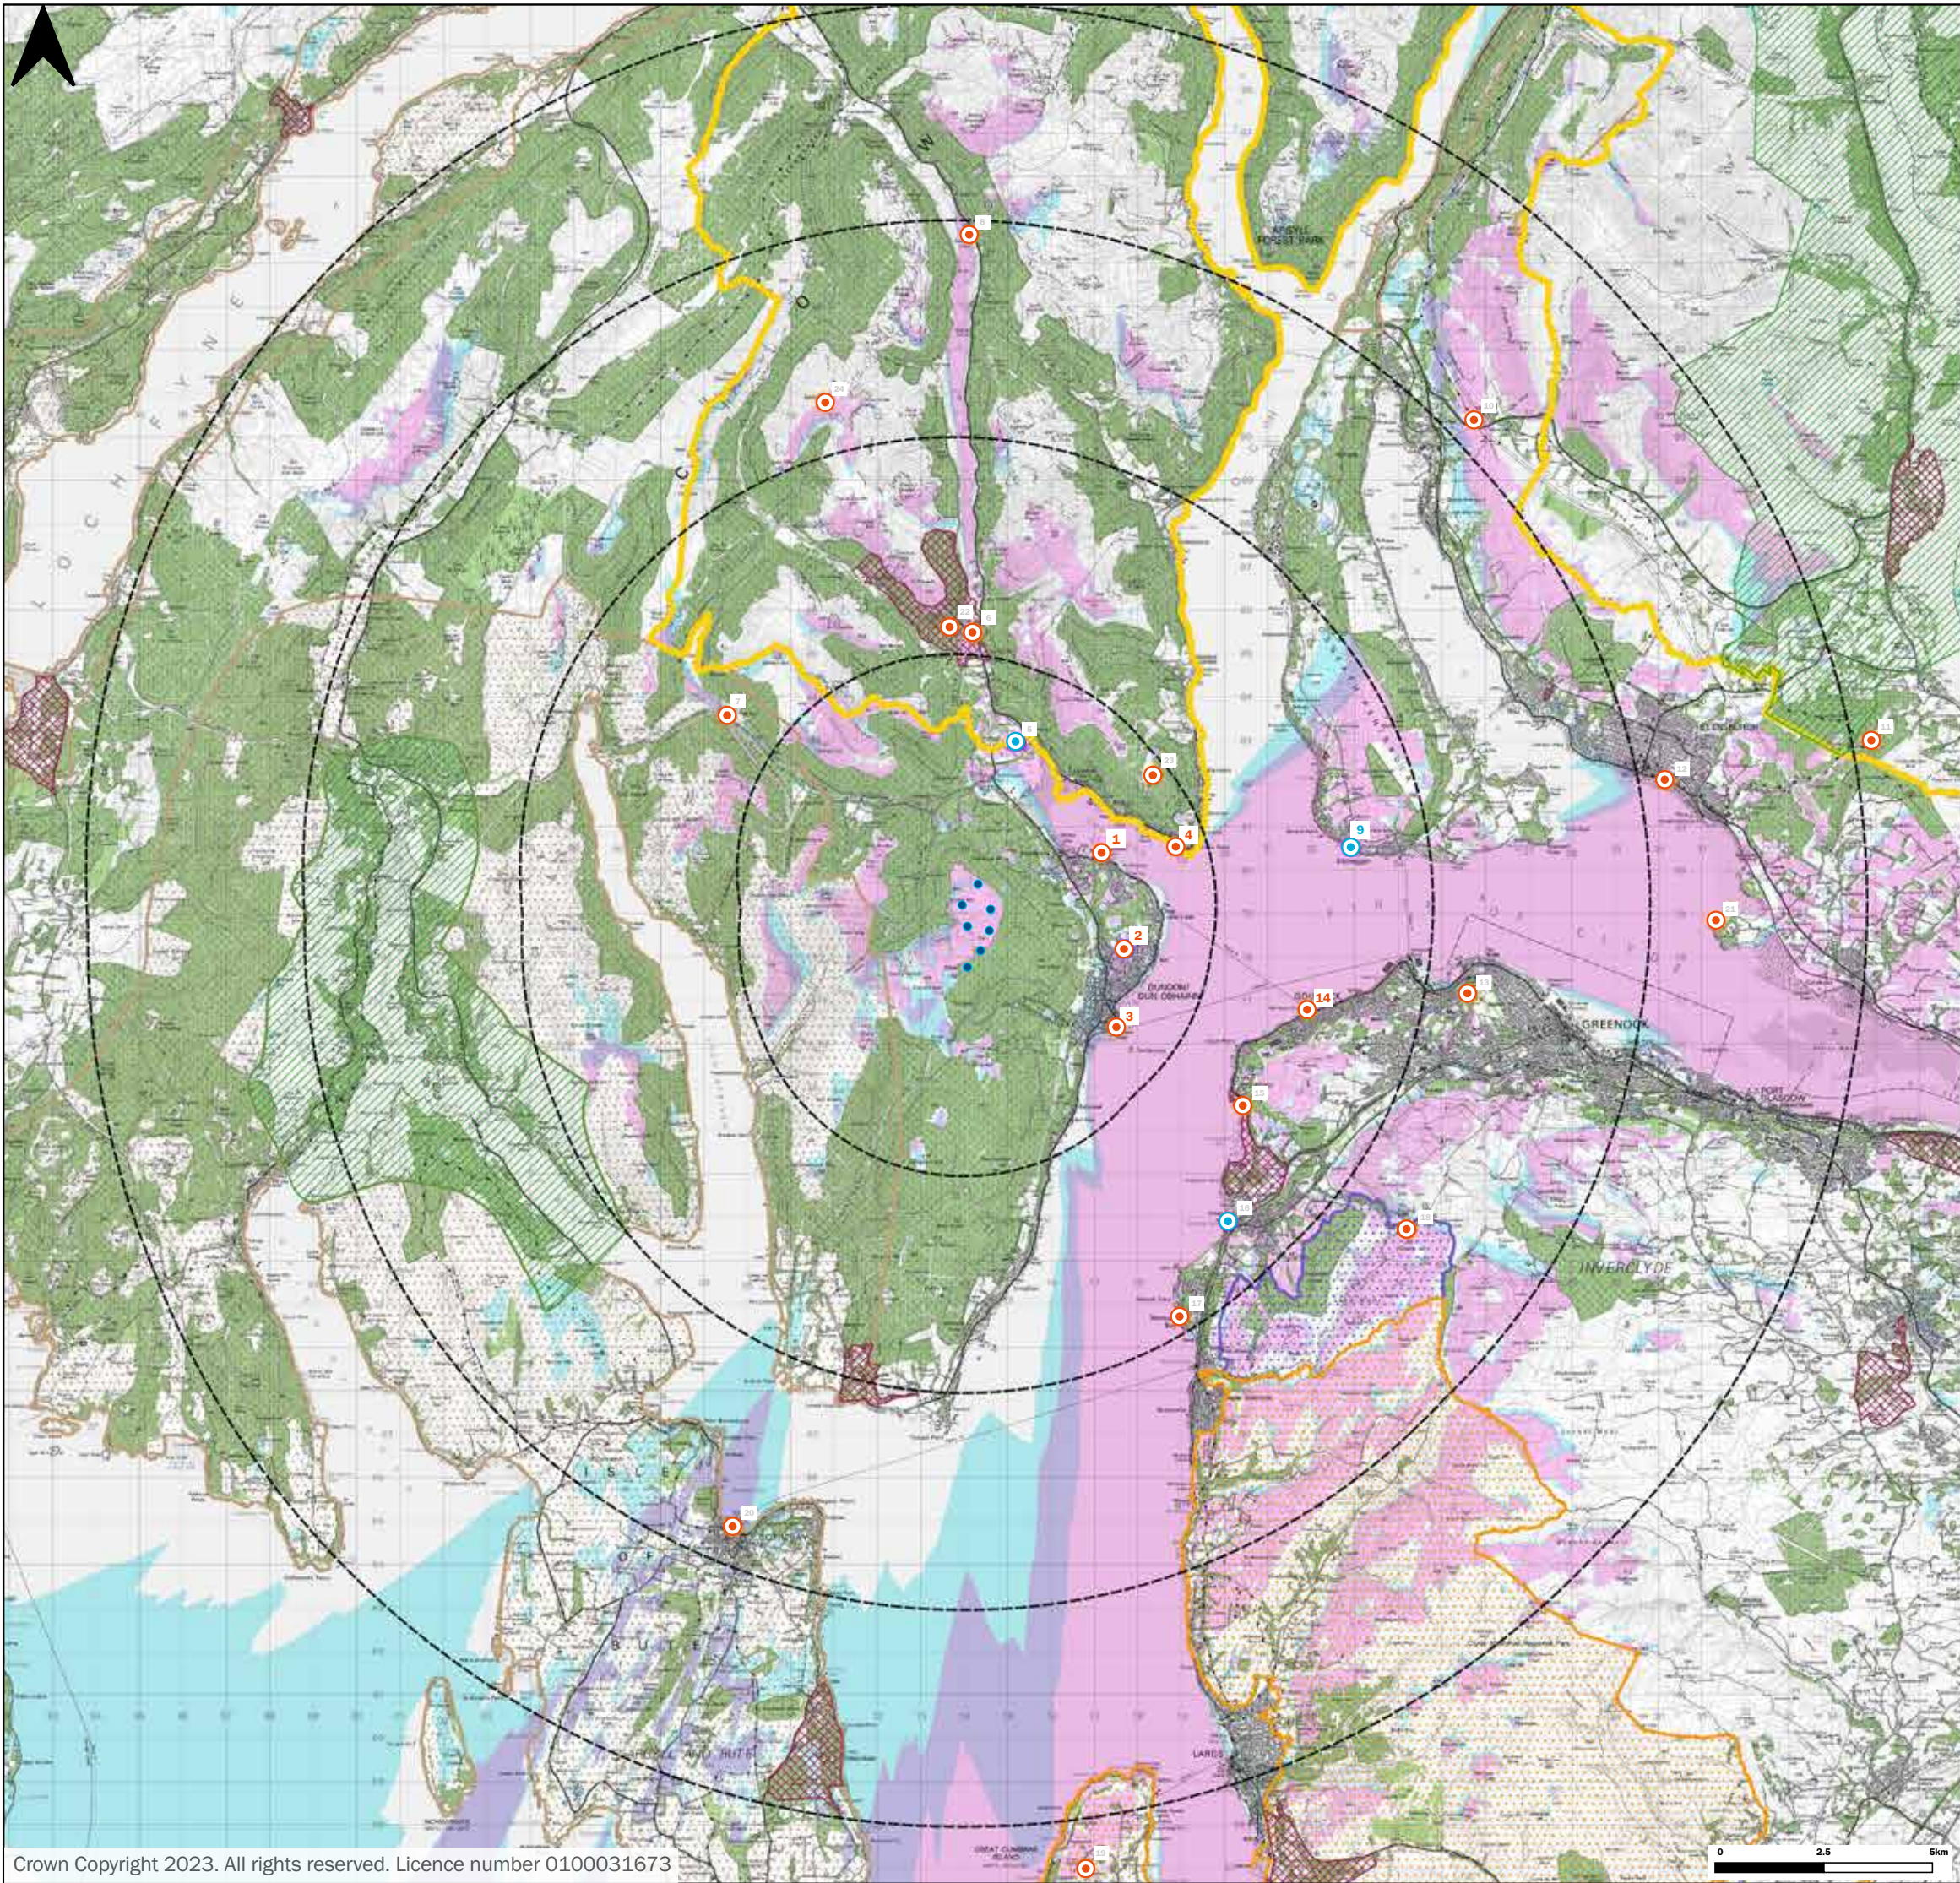

Other viewpoints proposed at scoping

The ZTV illustrates the theoretical visibility of the Proposed Development, based on what is referred to as a “bare earth” model. It does not include the screening effect of ground cover features, such as woodland, vegetation and buildings, which can reduce the extent of actual visibility of wind turbines from some locations.

Viewpoints

The screened ZTV takes into account topography, woodlands and buildings. As not all localised features are taken into account i.e. hedgerows, or individual trees, the actual extent of visibility on the ground will be less than that suggested on the plan.

Zone of Theoretical Visibility (ZTV)

Key

- Proposed Turbine – 200m tip
- Distance from site (5, 10, 15, 20km)
- Loch Lomond and the Trossachs National Park
- National Scenic Areas
- Gardens and Designed Landscapes
- Area of Panoramic Quality
- Special Landscape Area
- Local Landscape Area
- Woodland

No. of Turbines Theoretically Visible

- 1 - 3 turbines
- 4 - 6 turbines
- 7 - 9 turbines

Daytime only viewpoints

Day and nighttime viewpoints

Photomontage provided

- 1 Lazaretto Point Ardnadam
- 2 Dunoon Ardenslate Road
- 3 Dunoon Castle
- 4 Strone Pier
- 9 Kilcreggan
- 14 McInroy's Point Gourrock
