

Maximising Community Benefits

Statkraft is dedicated to engaging with communities and bringing meaningful benefits.

Using Local Skills

We have engaged with HIE to review the workforce requirements for the construction on Mossy Hill and other Shetland projects, to stimulate and increase local skills and training.

Community Benefit Fund

We have committed to a Community Benefit Fund that delivers £5,000 (index linked) per MW installed, per year, for the operational lifetime of the project.

Shared Ownership

We are keen to offer Shared Ownership if there is local interest. We would like to hear your views on enabling the community to own a share of the project.

Local Supply Chain

We want to work with local businesses. We're interested in hearing from all types of local suppliers, please register your interest via the project website.

Meet the Project Team:

Tracey Leslie
Assistant Project Manager
(Shetland)

John Thouless
Principal Project Manager
(Shetland)

Our team of specialists will be able to answer questions and provide more information throughout the exhibition. Please visit our website to find out more.

Invitation to Public Exhibition: 20 - 21 August 2024

Mossy Hill Wind Farm Redesign

We are writing to you to introduce the team and our proposal for Mossy Hill Wind Farm Redesign.

Mossy Hill Wind Farm, which was consented by Shetland Island Council in 2019, was purchased by Statkraft in 2023. Statkraft are proposing a redesign of the existing consented scheme, reducing the number of turbines in the scheme. Your feedback will help us to shape our final application, which will be submitted in late 2024.

Come along to our exhibitions in Lerwick and Scalloway to find out more about Statkraft and our redesign of the project. We look forward to meeting with you and the local community and hearing your feedback on our plans.

If you are unable to make it along please visit our online exhibition or get in touch if you require resources or information in a different format.

About Us

Statkraft is Europe's largest generator of renewable energy, with origins going back over 125 years in Norwegian hydropower. Our Scottish headquarters are in Glasgow and we have more than 6,000 employees in over 21 countries. Statkraft owns the consented wind farm projects Energy Isles and Beaw Field on Yell. Both projects are in pre-construction.

Mossy Hill Wind Farm Redesign Proposal

Community engagement is very important to us.

We are committed to listening to communities to help shape and inform our redesign. The project will be refined throughout the development process as studies and surveys are completed and feedback received.

For more information, visit:
www.mossy-hill.co.uk

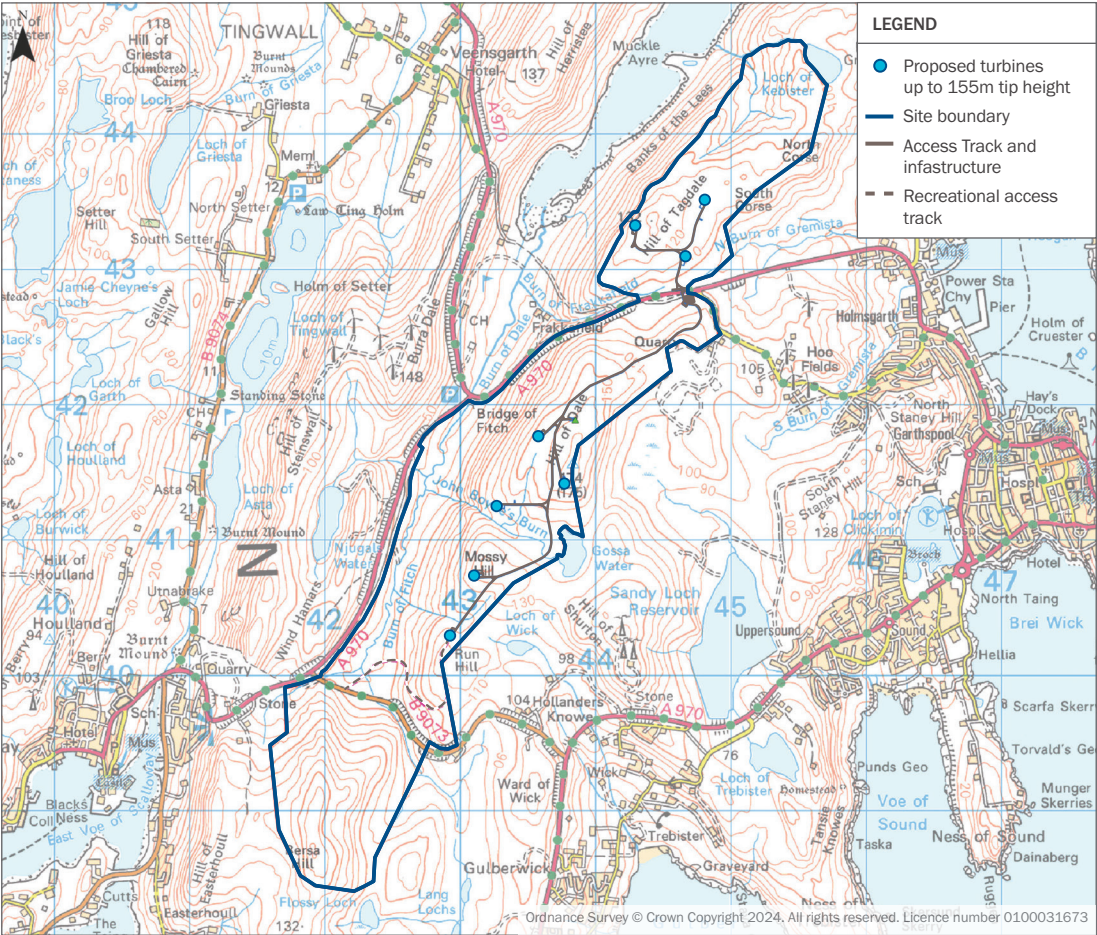

**8** 12 consented turbines **reduced to 8 turbines**

Up to
£180,000
Community Benefit Fund per year

**155m** to blade tip
Height increase of remaining 8 turbines from 145m to

Single storey office building for Statkraft colleagues and **enhanced facilities on-site for visitors** to the wind farm

Opportunities to explore other **community benefits**

Plan showing Mossy Hill Wind Farm redesign proposal layout.

We look forward to hearing your views on this project and your ideas on how community funding could deliver benefits to the area.
