

## We're innovative and community focused

Statkraft is dedicated to engaging with communities and bringing meaningful benefits.

We would like to speak with you about how this project can bring new investment to your community. We are open to your ideas.

### Community Benefit Fund

For Oliver Forest we have committed to a Community Benefit Fund that delivers £5,000 per MW installed, per year, for the operational lifetime of the project.

### Shared Ownership

We are keen to offer Shared Ownership on our new development projects, if there is local interest. We would like to hear your views on enabling the community to have a financial share in Oliver Forest Wind Farm.

### Local Suppliers

As a member of the local Chamber of Commerce we would like to get to know and foster links within the local business community. We want to work with local businesses to deliver our projects. Scan the QR code below or visit our project website for more information and to register interest.

# Invitation to Public Exhibition: 5 March – 6 March 2024

## Oliver Forest Wind Farm

We invite you to review our updated proposals.

Andershaw Wind Farm, South Lanarkshire, 11 turbines, 140m tip height

VISIT OUR:

2 LOCAL  
EXHIBITIONS

3 WEEK  
ONLINE  
EXHIBITION

This is our first development proposal within the Scottish Borders Council area. The proposed wind farm is located at Tweedsmuir, approximately 12.5km south of Broughton and 19km north of Moffat.

Since the first exhibition we have carried out further studies and listened to your feedback. Our revised proposal has reduced the number of turbines to 7 and the tip height to 200 metres.

Come along to find out more about our updated plans. The project team at the exhibition events at Tweedsmuir or Broughton are interested to hear your feedback over a cup of tea and a biscuit. If you are unable to make it along please visit our online exhibition. We plan to submit our proposals in late summer 2024.

## About Us

Statkraft is Europe's largest generator of renewable energy, with origins going back over 125 years in Norwegian hydropower. Our Scottish headquarters are in Glasgow and we have 5,700 employees across 21 countries.

# Oliver Forest Wind Farm Proposal

## Community engagement is very important to us.

We have listened to community feedback and incorporated findings of further studies to help shape and inform our revised proposal. The project now consists of 7 turbines, reduced from 10, of up to 200m, reduced from 250m, across the site.

Visit our online exhibition for more information:

[www.oliverforestwindfarm.co.uk](http://www.oliverforestwindfarm.co.uk)

**7** Up to 7 wind turbines proposed

**£5,000**

Per MW installed per year for a Community Fund  
As recommended by Scottish Government

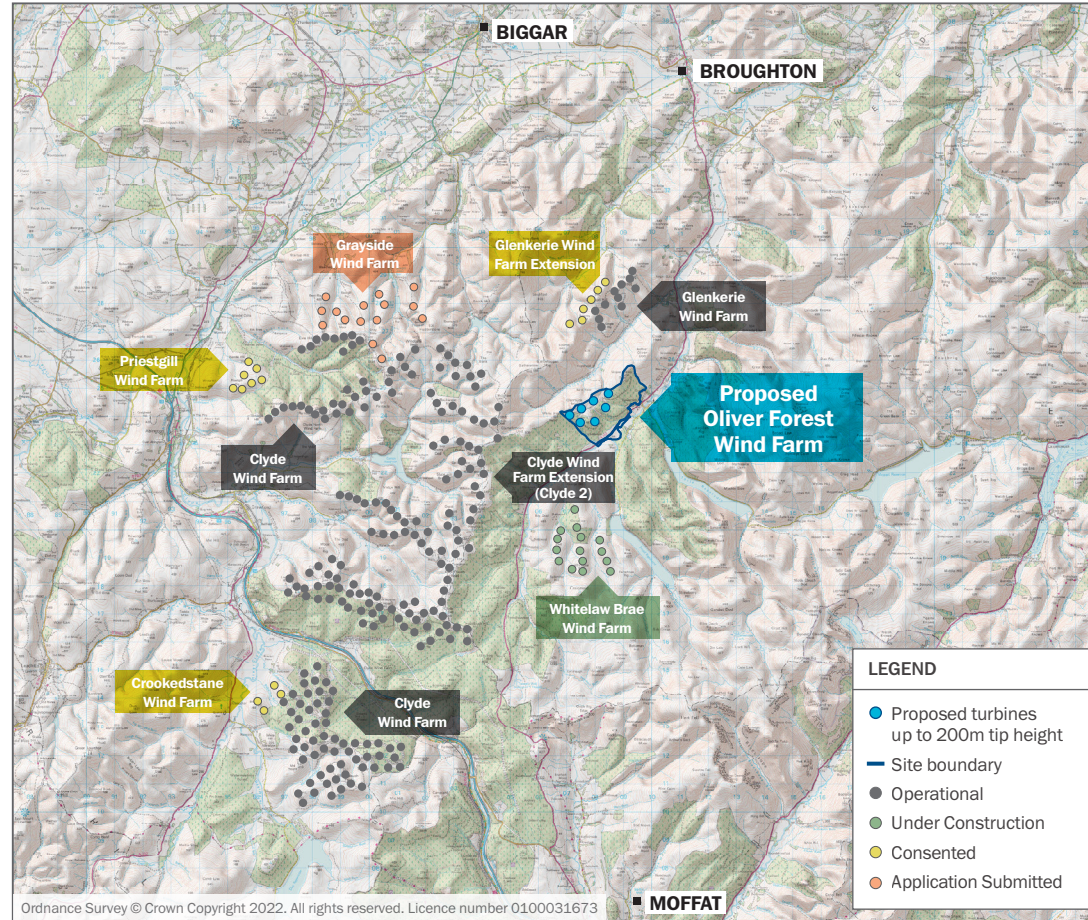

A maximum height to blade tip:  
**200m**

Exciting new opportunity to talk about **shared ownership**
