

## We're innovative and community focused

Statkraft is dedicated to engaging with communities and bringing meaningful benefits.

We would like to speak with you about how this project can bring new investment to your community. We are open to your ideas.

### Community Benefit Fund

For West Andershaw we have committed to a Community Benefit Fund that delivers £5,000 per MW installed, per year.

### Shared Ownership

We are pleased to offer Shared Ownership on our new development projects, if there is local interest. We would like to hear your views on enabling the community to have a financial share in West Andershaw.

### Improved Broadband

Join our virtual exhibition to tell us more about the broadband service in your area and to find out more about our approach to facilitate improved broadband access near our West Andershaw development.

### Local Supply Chain

We want to work with local businesses to deliver our projects. Visit our project website for information on how local businesses can register their interest.

# Invitation to Virtual Exhibition: 9 August – 27 August 2021

## West Andershaw Wind Farm Proposal

We would like to tell you more about ourselves and our proposal for an extension to the west of Andershaw Wind Farm, of up to 11 turbines.

We are bringing forward a proposal for West Andershaw Wind Farm, with the nearest turbine of the current layout located approximately 3.3km south of Glespin, 4km west of Crawfordjohn and 4.9km south of Douglas in South Lanarkshire.

The existing 11 turbine site has been producing renewable energy since 2016 and to date has contributed nearly £500,000 of community benefit funds to the local area.

New community benefit funding and initiatives will be available through the West Andershaw project, if consented, and we look forward to exploring these with you and hearing your ideas.

We continue to follow Scottish Government advice in relation to Covid-19 and are holding a series of online consultation events, where you can find out more about our plans and help shape the project.

## About Us

Statkraft is Europe's largest generator of renewable energy, with origins going back 125 years in Norwegian hydro power. Our Scottish headquarters are in Glasgow and we have 4,500 employees across 18 countries.

# West Andershaw Wind Farm Proposal

## West Andershaw Project Summary

**11**

Up to 11 wind turbines proposed

**£5,000**

Per MW installed per year for a Community Fund

A maximum height to blade tip:

**250m**

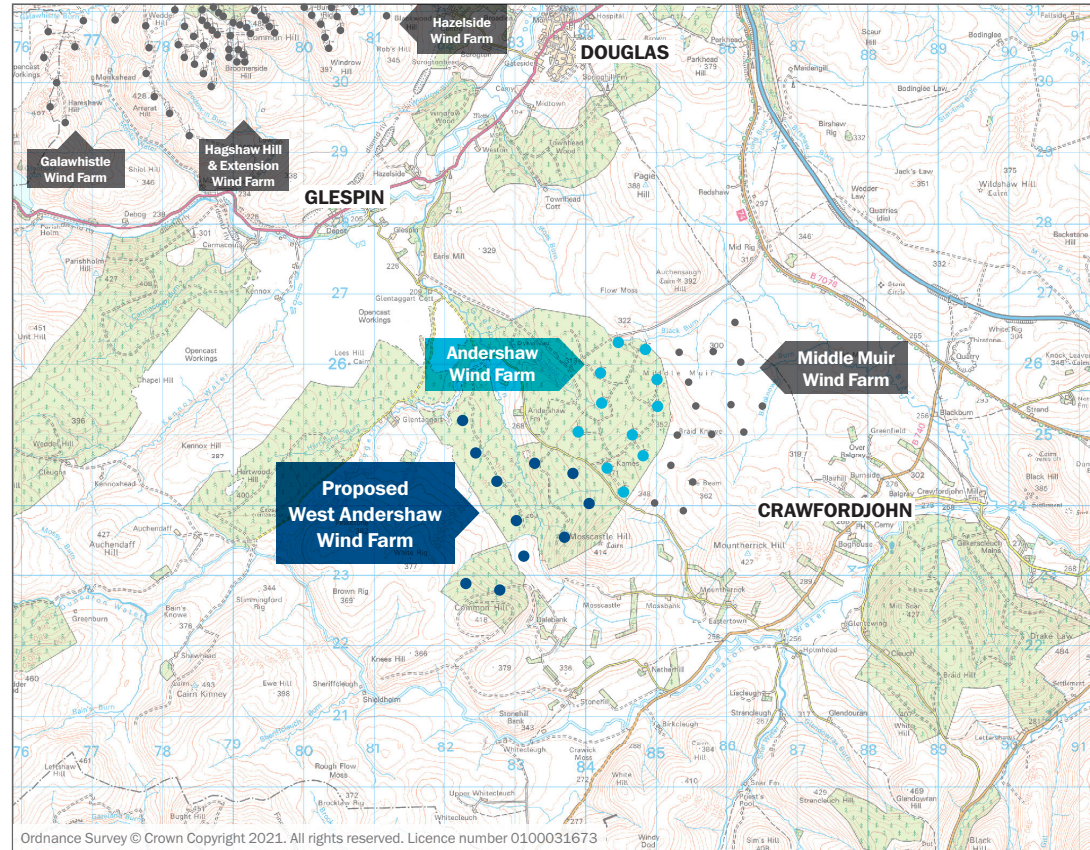

Exciting new opportunity to talk about shared ownership and local suppliers

Potential for improved broadband provision

## Community engagement is very important to us.

We would like to invite you to our virtual exhibition. We are committed to listening to communities to help shape and inform our proposal.

Plan showing proposed West Andershaw Wind Farm and current operational wind farms.

**We would like to hear your views on this project, your thoughts on access to improved broadband and your ideas on how community funding and shared ownership could deliver benefits to the area. Please visit our virtual exhibition to provide your views.**

## Virtual Exhibition:

[www.westandershaw.co.uk](http://www.westandershaw.co.uk)

**Our virtual exhibition is being held online due to Covid-19 restrictions.**

**Visit our online exhibition between 9 August - 27 August.**

**Ask questions, chat online or book a phone call.**

**Visit our live chat sessions with the Project Team on:**

**17 August: 12pm – 2pm  
5pm – 7pm**

**27 August: 12pm – 2pm**

**Visit the exhibition and live chat sessions at:**
