

- KEY**
- Indicative Turbine Locations
 - Distance Radii from Outermost Turbine (15, 30, 45km)
 - Viewpoints
- Zone of Theoretical Visibility to Blade Tip (250m)**
- 1 - 4 turbines may be visible
 - 5 - 8 turbines may be visible
 - 9 - 11 turbines may be visible

FIGURE DATA:
 This figure has been based on the following data:
 Layout file: obvs-250m-BT-45km.shp
 Terrain data: T50-DTM.asc
 Viewer's eye height: 2m above ground level
 Calculation grid size: 50m

Notes:
 This drawing is based upon computer generated Zone of Theoretical Visibility (ZTV) studies produced using the Viewshed routine in the Visibility Analysis plugin for QGIS.

The areas shown are the maximum theoretical visibility, taking topography into account.

This visibility map is based on a 'bare earth' model of the landform and does not show any effects of screening from obstacles such as buildings and vegetation.

The ZTV includes an adjustment that allows for Earth's curvature and light refraction. It is based on a DTM and has a 50m² resolution.

Scale 1:175,000 @ A3
